## I. Letter to Shareholders

## I. 2022 Business Report:

(I) Business Plan Implementation Outcome and Financial Revenue/Expenditure, Profitability:

The operating income in 2022 decreased by 21.7% compared to 2021, which was mainly due to the decrease in the sales of precious metals and gold salt products, and it also led to a simultaneous decline in the gross operating profit in 2022. However, the net loss before (after) tax for 2022 was similar to that of 2021 and did not expand. The consolidated and parent company only financial statements are summarized below:

Unit: NT\$ thousand

| Consolidated Financial Report<br>Items | 2022      | 2021      |
|--|-----------|-----------|
| Operating revenue                      | 1,161,908 | 1,484,248 |
| Gross profit (loss)                    | 1,339     | 10,201    |
| Operating (loss)                       | (99,554)  | (86,351)  |
| Net profit (loss) before tax           | (98,817)  | (98,387)  |
| Net profit (loss) after tax            | (98,817)  | (98,387)  |
| Earnings (losses) per share            | (0.96)    | (0.95)    |
| (NTD)                                  |           |           |

Unit: NT\$ thousand

| Standalone Financial Report<br>Items | 2022      | 2021      |
|--------------------------------------|-----------|-----------|
| Operating revenue                    | 1,118,454 | 1,409,273 |
| Gross profit (loss)                  | (717)     | (12,459)  |
| Operating (loss)                     | (81,421)  | (84,048)  |
| Net profit (loss) before tax         | (98,817)  | (98,383)  |
| Net profit (loss) after tax          | (98,817)  | (98,383)  |
| Earnings (losses) per share          | (0.96)    | (0.95)    |
| (NTD)                                |           |           |

## (II) Budget Implementation status:

The Company had no financial forecasting in 2022.

#### (III) Research and development status:

The global industrial supply chain is undergoing a series of restructuring and upgrade.

"Huanke Plant" was built with the Company's continuous investments over many years and was completed and inaugurated by the end of 2021. The important achievements are as follows:

- Activation of the new automatic production process for gold salt:
   We produce high-purity, high-quality gold salt products with the new automated process,
   which readily meets the requirements of customers in their electroplating processes.
- Enhance the research and development of waste recycling technologies:
   We continue to invest in purification technologies and add new metal recycling and other recycling items to develop "urban mines".
- 3. Introduction of advanced waste liquid processing technologies: By upholding our goal of "establishing processes with zero waste liquid and a recycling and reuse system", we successfully incorporated the MVR waste liquid treatment technology and planned to provide services to customers in the second half of 2022.
- 4. Technical partnerships and development of new eco-friendly composite materials: We use partnerships between the industry, government, and academia to produce new low-carbon eco-friendly renewable materials from waste containing different materials through innovative formulas and technologies. They solve the problem of disposal and treatment in the resource recycling industry, facilitate the reuse of waste resources, and can be used for high-strength construction materials and military industries in the future.

#### II. 2023 Business Plan Overview:

## (I) Business guideline

The rapid changes of high-tech products have made waste disposal increasingly difficult. Super Dragon Technology will continue to uphold our commitment to improve technologies and the main business strategies for 2023 are as follows:

- 1. Implement reasonable organizational structure and streamline human resources to increase the performance and efficiency of the organization.
- 2. Enhance the recycling of hybrid metals and waste electronics products to turn scraps into materials and support waste and carbon reduction.
- 3. Launch the high-efficiency waste liquid treatment services to attain "zero effluents and circular use".
- 4. Establish a solid waste treatment ecosystem with technical partners and find ways to reuse solid waste.

- 5. Expand into energy conservation, energy storage, and energy generation businesses to create an engine of growth for green energy in the circular economy and technological developments.
- 6. Actively reduce inventory and revitalize the value of assets to create positive cash flow and reduce financial burdens.
- 7. Focus on the circular economy and continue to develop new eco-friendly technologies, new energy, new partnerships, and new business models. Concentrate and transform operations based on the framework of four major production lines, four major platforms, and one center.

#### (II) Sales Volume Forecast and Basis

The "service business driven by the social needs" operated by the Company pursues the sustainable development with partners and customers jointly based on the principle of co-existence and co-prosperity. In 2023, based on the core of circular economy and under the development scope of four main production lines, four main platforms and one center, the Company will implement operational focus and transformation. The revenue is expected to show slight increase from the last year, and the gross profit is also expected to indicate growth from last year. Accordingly, the Company expects to achieve the goal of operating at a profit in a single quarter.

## (III) Important Production and Sale Policies

- 1. Enhance the detection capacity, implement cost control, and quality management to provide customers with satisfying services.
- 2. Target customers of waste liquid treatment businesses that have high technical difficulties and stable volumes of waste to be processed.
- 3. Form alliances with strategic partners to increase the number of solid waste items for treatment and enhance the refining capabilities.
- 4. Develop recycling product applications and turn "scraps" into materials for customers.
- 5. Transform the professional roles for 5N gold salt production and OEM and expand the production capacity utilization rate to increase the value of products.
- 6. Set up the pilot production lines a mass production lines for new eco-friendly composite materials to expand the Company's product portfolio.
- III. Impacts of External Competitive Environment, Legal Environment and Overall Operating Environment on Company's Future Development Strategy

Global awareness of environmental protection has increased and environmental issues have become important topics of discussion. Government regulations on environmental protection have become increasingly stringent as they strengthen enforcement. Due to the recent international development trends that emphasize the importance of sustainability, relevant laws and regulations and institutional amendments will become more conducive to the expansion of the environmental protection industry.

The Company's head office and Plant 3 are located in the Environmental Science & Technology Park. Our corporate mission is to become "a service company needed by the society" and our goal is to recycle and reuse resources. We continue to improve waste processing technologies and capabilities for refining precious metals. We invest in equipment to expand operations, help companies implement environmental governance, and build a society with a sustainable cycle of resources.

The Company also implements the circular economy in different ways by actively participating in the transformation of Taiwan's green economy and joint promotion of sustainable development. We set up solar PV equipment in areas of the Company that can be effectively used and we will also install grid-connected energy storage equipment to support Taipower's electricity ancillary service, join Taipower's Energy Trading Platform, and work with the government to develop renewable energy.

The Company will continue to work on improving technologies and increasing the scale of production to maximize returns for all shareholders of the Company. We hereby express our gratitude to shareholders for your long-term support and encouragement.

Super Dragon Technology Co., Ltd.

Chairman-cum-President Chieh-Hsin Wu

Chief Accounting Officer Cheng Tuan-Mu

## II. Company Profile

#### I. Establishment Date

The Company was established on September 25, 1996.

## II. Company History

September 1996 Registration of Super Engineering Ltd. approved by the Ministry of Economic Affairs (MOEA), and paid-in capital was NT\$5 million.

December 1997 Executed cash capital increase of NT\$45,000 thousand, and paid-in capital

increased to NT\$50 million.

In addition, company organization type changed to "Super Dragon

Engineering Co., Ltd.".

August 1998 Purchased Guanyin Plant I, address: No. 12, Ronggong S. Road, Guanyin

Industrial Park.

Obtained Type 1 Class A waste disposal institution establishment permit

license.

April 1999 Qualified Type 1 Class A waste disposal institution trial operation and field

survey.

August 1999 Obtained Type 1 Class A waste disposal institution operation permit license, and

engaged in the business of industrial waste treatment officially.

Qualified the waste information product treatment plant selection by the Resource Recycle Management Foundation, Environmental Protection Agency (EPA), and started the business of treatment of various waste information

products.

November 1999 Executed cash capital increase of NT\$100,000 thousand, and paid-in capital

increased to NT\$150 million, and purchased Guanyin Plant II land for the expansion construction of Plant II facility, and expected to manufacturing post-

waste treatment recycled product - artificial building material.

Company name changed to "Super Dragon Technology Co., Ltd.".

March 2000 Purchased new high precision anti-pollution crushing and soring equipment in

order to achieve precise sorting of precious metals.

May 2000 Applied for Type 1 Class A industrial waste disposal institution establishment

approval and applied for change of Type 1 Class A industrial waste establishment approval; increased the treatment volume of hazardous industrial

waste- electroplating aging solution.

Submitted the application for important technology industry applicable scope

with the Industrial Development Bureau (IDB).

| August 2000    | Obtained the approval letter for important technology industry applicable scope from IDB. |
|----------------|---|
|                | Qualified the ISO 9002 quality management system certification.                           |
|                | Qualified the ISO 14001 environmental management system certification.                    |
| November 2000  | Executed cash capital increase of NT\$35,750 thousand, and capital increase by            |
|                | retained earnings of NT\$14,250 thousand, and the paid-in capital became                  |

# (2) Independence status of independent directors

| Criteria<br>Name          | Independence status  | Number of<br>companies<br>for adjunct<br>independent<br>directors of<br>other public<br>offering<br>companies |
|---------------------------|--|---|
|                           | Each independent director meets the following conditions during the two years prior to being appointed and during the term of office:  |   |
|                           | 1. Not an employee of the Company or its affiliates.   |   |
| Shih-<br>Chun Ho          | 2. Not a director, supervisor of the Company and its affiliates (the same does not apply, however, in cases where the person is an independent director of the company, its parent company, or any subsidiary, as appointed in accordance with law or with the laws of the country of the parent company or subsidiary).   | 2   |
|                           | 3. Not a natural-person shareholder who holds shares, together with those held by the person's spouse, minor children, or held by the person under others' names, in an aggregate amount of 1% or more of the total number of issued shares of the company or ranks as one of its top ten shareholders.  |   |
| Cheng-                    | 4. Not a managerial officer listed in the preceding Subparagraph (1) or a spouse, relative within second degree of kinship or direct blood relative within third degree of kinship of personnel listed in the preceding Subparagraphs (2) and (3).   | 1   |
| Che Tsai                  | 5. Not a director, supervisor or employee of a corporate shareholder that directly holds 5% or more of the total number of issued shares of the company, or of a corporate shareholder that ranks among the top five in shareholdings, or of a proxy appointed according to Paragraph 1 or Paragraph 2 of Article 27 of the Company Act (provided that if the position of an independent director is held concurrently for the company and its parent company, a | -   |
| Kun-                      | subsidiary or a subsidiary of the same parent company according to the law or laws of the local country, such restriction shall not be applied).  6. Not a director, supervisor or employee of another company not controlled by the same parties holding a majority of the number seats of directors of the company or  |   |
| Cheng<br>Chao<br>(Note 1) | a majority of the number seats of directors of the company of<br>a majority of shares with voting rights (provided that if the<br>position of an independent director is held concurrently for<br>the company and its parent company, a subsidiary or a<br>subsidiary of the same parent company according to this<br>law or laws of the local country, such restriction shall not<br>be applied).   | 1   |
|                           | 7. Not a director (managing director), supervisor (managing supervisor) or employee of other company or institution being the same person holding the position of  |   |

Chairman, President or equivalent position in the company or a spouse thereof (provided that if the position of an independent director is held concurrently for the company and its parent company, a subsidiary or a subsidiary of the same parent company according to this law or laws of the local country, such restriction shall not be applied).

- 8. Not a director (managing director), supervisor (managing supervisor), managerial officer or shareholder holding 5% or more of the shares, of a specified company or institution that has a financial or business relationship with the company (provided that if the specific company or institution holds 20% or more and no more than 50% of the total number of issued shares of the company, and the position of an independent director is held concurrently for the company and its parent company, a subsidiary or a subsidiary of the same parent company according to this law or laws of the local country, such restriction shall not be applied).
- 9. Not a professional providing business, legal, financial, accounting, or consulting services to the company or an affiliate, nor an owner, partner, director (managing director), supervisor (managing director), or manager, or the spouse of any of the foregoing, of a sole proprietorship, partnership, company, or organization providing such services to the company or its affiliates or cumulative remuneration amount obtained in the last two years not exceeding NT\$ 500,000, provided, this restriction does not apply to a member of the remuneration committee, public tender offer review committee or special committee for merger/consolidation and acquisition, who exercises powers pursuant to the Securities and Exchange Act or the Business Mergers and Acquisitions Act and related laws or regulations.
- 10. The members is not of the relationship of spouse or relative within second degree of kinship with other directors.
- 11. Not subject to any conditions defined in Article 30 of the Company Act.
- 12. Not subject to being elected due to government agency, juristic person or their representative acting as shareholders described in Article 27 of the Company Act.

Note 1: Independent Director Kun-Cheng Chao resigned on 2023.03.15.

#### 5. Diversity and Independence of Board of Directors

(1) Diversity of board of directors

Article 20 of the "Corporate Governance Best Practice Principles" of the Company has stated:

The composition of the board of directors shall be determined by taking diversity into consideration. It is advisable that directors concurrently serving as the Company's officers not exceed one-third of the total number of the board members,

and that an appropriate policy on diversity based on the Company's business operations, operating dynamics, and development needs be formulated and include, without being limited to, the following two general standards:

- 1. Basic criteria and values: gender, age, nationality and culture, etc.
- 2. Professional knowledge and skills: professional background (e.g., law, accounting, industry, finance, marketing, technology), professional skills, and industry experience.

All members of the board shall have the knowledge, skills, and experience necessary to perform their duties. To achieve the ideal goal of corporate governance, the entirety of the board of directors shall possess the following abilities:

- 1. Operational judgment.
- 2. Accounting and financial analysis capability.
- 3. Operation management capability.
- 4. Crisis management capability.
- 5. Industry knowledge.
- 6. International market view.
- 7. Leadership.
- 8. Decision capability.

The current board member diversity policy and implementation status of the Company are as follows:

|                      | Diversity core item        |                            |        |                | Age            | >              |                | Equipp                          | 0                    | Ac   | Operat                          | Crisis                  |                    | Int                       |            |                     |

Note 1: Independent Director Kun-Cheng Chao resigned on 2023.03.15.

### 1. Independence of Board of Directors:

The Company has seven directors, including three independent directors, accounting for 42.85% of the total number of directors. All independent directors of the Company comply with the provisions of the "Regulations Governing Appointment of Independent Directors and Compliance Matters for Public Companies". In addition, among the four directors, two directors are in the relationship of relative within second degree of kinship, accounting for 28.57% of the total number of directors. All directors and independent directors are not subject to any conditions prescribe in Paragraphs 3 and 4 of Article 26-3 of the Securities and Exchange Act.

According to the Articles of Incorporation of the Company, the directors adopt the candidate nomination system for the election. During the nomination and election of board members of the Company, the written statement of each director has been obtained. The board of directors of the Company is equipped with the independence. Please refer to pages 14~15 of this Annual Report for information related to the professional qualification and experience of directors and the independence of independent directors.

- IV. Goals (such as establishment of Audit Committee, improvement of information transparency etc.) for establishment of and execution status evaluation on the enhancement of functions of the board of directors for the current year and the most recent year:
  - (I) The Audit Committee and Remuneration Committee established by the Company assist the board of directors to fulfill their supervisory duties respectively.
  - (II) The Company cooperates with the new version of Corporate Governance Blueprint promoted by the competent authority in order to effectively exploit the functions of the board of directors. During the 9th meeting of the 9th term of board of directors held on 2021.03.24, the board approved the establishment of the "Corporate Governance Ethical Management Team" through resolution, and subsequently, during the 4th meeting of the 10th term of the board of directors held on 2022.11.09, the change of the appointment of Manager Mu-Cheng Tuan to act as the Corporate Governance

Officer was further ratified.

#### (II) Audit Committee Implementation Status

The Company established the Audit Committee on August 9, 2016 to assist the board of directors to review financial statements, to examine the effectiveness of the internal control system, to strength the internal supervision and control mechanism of the Company, and to perform review on the following matters according to the law:

- 1. Adoption or amendment of the internal control system pursuant to Article 14-1 of the Securities and Exchange Act.
- 2. Evaluation on the effectiveness of the internal control system.
- 3. Adoption or amendment, pursuant to Article 36-1 of the Securities and Exchange Act, of handling procedures for financial or operational actions of material significance, such as acquisition or disposal of assets, derivatives trading, extension of monetary loans to others, or endorsements or guarantees for others.
- 4. Matters bearing on the personal interest of a director.
- 5. Material assets or derivatives transactions.
- 6. Material monetary loans, endorsements, or provision of guarantees.
- 7. The offering, issuance, or private placement of any equity-type securities.
- 8. The hiring, discharge, or compensation of an attesting CPA.
- 9. The appointment or discharge of a financial, accounting, or internal audit officer.
- 10. Annual financial statements signed or sealed by the Chairman, managerial officer and accounting officer and Q2 financial statements requiring audit by CPAs.
- 11. Other material matters as may be required by the Company or by the competent authority.

#### Review financial statements

The Board of Directors has prepared the 2022 business report, financial statements, and the proposal for making up for losses, among which the financial statements were audited by Ernst & Young Taiwan, by whom an audit report was issued. The aforementioned business report, financial statements and proposal for making up for losses have been reviewed by the Audit Committee and are considered to be conforming with requirements.

Evaluation of effectiveness of internal control system
 The Audit Committee evaluates the effectiveness of the policy and procedure of the

Company's internal control system and also reviews the periodic reports of the Audit Department and CPAs as well as the management. The Audit Committee considers that the Company's internal control system is effective, and the Company has adopted necessary control mechanism to supervise and correct any violation conducts.

#### • Retention of CPAs

To ensure the independence of the accounting firm retained, the Audit Committee establishes the independence evaluation form according to the content of Article 47 of the Certified Public Accountant Act and Code of Ethics for. Professional. Accountants No. 10 "Integrity, Objectivity and Independence". With regard to the evaluation on the independence, professionality and competency of CPA, the Audit Committee evaluates whether he/she is a related party to the Company, whether he/she is in business or financial interest relationship with the Company and other items. During the 4th meeting of the 3rd term of Audit Committee held on November 9, 2022 and the 4th meeting of the 10th term of the board of directors held on November 9, 2022, CPA Mao-I Hung and CPA Ching-Piao Cheng of Ernst & Young Taiwan were approved to comply with the independence evaluation standard such that they are qualified to act as the CPAs for the finance and tax related affairs of the Company.

I. There were 9 Audit Committee meetings (A) held in 2022 and up to the printing date of the annual report, and the attendance status of the independent directors is as follows:

| Title                | Name                  | Actual number of attendance (B) | Number of attendance by proxy | Actual attendance rate (%) (B/A) | Remarks               |
|----------------------|-----------------------|---------------------------------|-------------------------------|----------------------------------|-----------------------|
| Independent director | Shih-<br>Chun<br>Ho   | 9                               | 0                             | 100.00                           | Convener              |
| Independent director | Cheng-<br>Che<br>Tsai | 9                               | 0                             | 100.00                           |                       |
| Independent director | Kun-<br>Cheng<br>Chao | 7                               | 0                             | 100.00                           | Resigned on 2023.03.1 |

#### Other matters required to be recorded:

Co., Ltd., and Independent Director of Savior Lifetec Corporation. He is equipped with extensive knowledge and skills necessary for job duties, and is able to provide professional opinions on the business operation of the Company. Not subject to any conditions defined in the subparagraphs of Article 30 of the Company Act. |   | 5 |

Note 1: Various criteria for independence status

- (1) Not an employee of the Company or its affiliates.
- (2) Not a director, supervisor of the Company and its affiliates (the same does not apply, however, in cases where the person is an independent director of the company, its parent company, or any subsidiary, as appointed in accordance with law or with the laws of the country of the parent company or subsidiary).
- (3) Not a natural-person shareholder who holds shares, together with those held by the person's spouse, minor children, or held by the person under others' names, in an aggregate amount of 1% or more of the total number of issued shares of the

- company or ranks as one of its top ten shareholders.
- (4) Not a managerial officer listed in the preceding Subparagraph (1) or a spouse, relative within second degree of kinship or direct blood relative within third degree of kinship of personnel listed in the preceding Subparagraphs (2) and (3).
- (5) Not a director, supervisor or employee of a corporate shareholder that directly holds 5% or more of the total number of issued shares of the company, or of a corporate shareholder that ranks among the top five in shareholdings, or of a proxy appointed according to Paragraph 1 or Paragraph 2 of Article 27 of the Company Act (provided that if the position of an independent director is held concurrently for the company and its parent company, a subsidiary or a subsidiary of the same parent company according to this law or laws of the local country, such restriction shall not be applied).
- (6) Not a director, supervisor or employee of another company not controlled by the same parties holding a majority of the number seats of directors of the company or a majority of shares with voting rights (provided that if the position of an independent director is held concurrently for the company and its parent company, a subsidiary or a subsidiary of the same parent company according to this law or laws of the local country, such restriction shall not be applied).
- (7) Not a director (managing director), supervisor (managing supervisor) or employee of other company or institution being the same person holding the position of Chairman, President or equivalent position in the company or a spouse thereof (provided that if the position of an independent director is held concurrently for the company and its parent company, a subsidiary or a subsidiary of the same parent company according to this law or laws of the local country, such restriction shall not be applied).
- (8) Not a director (managing director), supervisor (managing supervisor), managerial officer or shareholder holding 5% or more of the shares, of a specified company or institution that has a financial or business relationship with the company (provided that if the specific company or institution holds 20% or more and no more than 50% of the total number of issued shares of the company, and the position of an independent director is held concurrently for the company and its parent company, a subsidiary or a subsidiary of the same parent company according to this law or laws of the local country, such restriction shall not be applied).
- (9) Not a professional providing business, legal, financial, accounting, or consulting services to the company or an affiliate, nor an owner, partner, director (managing director), supervisor (managing director), or manager, or the spouse of any of the foregoing, of a sole proprietorship, partnership, company, or organization providing such services to the company or its affiliates or cumulative remuneration amount obtained in the last two years not exceeding NT\$ 500,000, provided, this restriction does not apply to a member of the remuneration committee, public tender offer review committee or special committee for merger/consolidation and acquisition, who exercises powers pursuant to the Securities and Exchange Act or the Business Mergers and Acquisitions Act and related laws or regulations.
- (10) The member is not a person subject to any conditions defined in Article 30 of the Company Act.

Note 2: Committee member Kun-Cheng Chao resigned on 2023.03.15.

- 2. Information on Operation Status of Remuneration Committee
  - (1) The Company's Remuneration Committee consists of 3 members.
  - (2) Term of office of the current Committee members: From June 14, 2022 to June 13, 2025. The Remuneration Committee held 3 meetings (A) in 2022, and details of members' eligibility and attendance are as follows:

|           |          | Actual     | Number     | Actual     |             |  |

#### (IX) Internal Control System Implementation Status

1. Statement of Internal Control System

# Super Dragon Technology Co., Ltd. Statement of Internal Control System

Date: March 23, 2023

The Company hereby states the results of the self-evaluation of the internal control system for 2022 based on the findings of the self-assessment:

- 1. The Company acknowledges and understands that establishment, implementation and maintenance of the internal control system are the responsibility of the Board and managerial officers, and that such a system has already been established throughout the Company. The purpose of this system is to provide reasonable assurance in terms of business performance, efficiency (including profitability, performance, asset security), reliable, timely and transparent financial reporting, and regulatory compliance.
- 2. The internal control system has its inherent limitations, and regardless of how perfect the design is, the effectiveness of the internal control system can only provide reasonable assurance to the achievement of the aforementioned three objectives. In addition, due to the change of the environment and circumstances, the effectiveness of the internal control system may be changed. However, the internal control system of the Company is equipped with a self-monitoring mechanisms, and the Company will take corrective actions once any deficiency is identified.
- 3. The Company judges whether the design and implementation of the internal control system is effective based on the criteria for judging the effectiveness of the internal control system set out in the "Regulations Governing Establishment of Internal Control Systems by Public Companies" (hereinafter referred to as the "Regulations"). The internal control system judgment items under the "Regulations" are divided into five constituent elements as per the management and control process: 1. control environment, 2. risk assessment, 3. control activities, 4. information and communication, and 5. monitoring activities. Each constituent element further includes several items. For more information on the aforementioned items, please refer to the "Regulations".
- 4. The Company has adopted the aforesaid judgment criteria for the internal control system to determine whether the design and implementation of the internal control system are effective.
- 5. Based on the results of the assessment in the preceding paragraph, the Company is of the opinion that, as of December 31, 2022, the internal control system (including the supervision and management of its subsidiaries), including the understanding the effectiveness of operations and the extent to which efficiency targets are achieved, reliable, timely, and transparent reporting, and compliance with applicable rules and applicable laws and regulations, is effective and can reasonably assure the achievement of the foregoing

objectives.

- 6. This statement will form the main content of the Company's annual report and prospectus and will be made public. If the disclosed content above is false or there is material information concealed deliberately or otherwise, the Company will be legally liable pursuant to Articles 20, 32, 171, and 174 of the Securities and Exchange Act.
- 7. This statement has been approved by the Company's board of directors on March 23, 2023. Among the six directors present, none of them expressed objections. All the others agreed with the content of this statement. Therefore, this statement is hereby issued.

Super Dragon Technology Co., Ltd.

Chairman: Chieh-Hsin Wu Signature/Seal

President: Chieh-Hsin Wu Signature/Seal

- 2. Where CPA is entrusted to review the internal control system, the CPA examination report shall be disclosed: Not applicable.
- (X) Penalties imposed against the Company and its internal personnel for regulatory violation, or penalties imposed by the Company against its employees for violation of internal control policy in the most recent year up till the publication date of this annual report; if the penalty result may have material impact on the shareholders' equity or stock price, it is necessary to describe the penalty content, areas of weakness and improvement status: None.

Note 1: On March 23, 2023, the board of directors approved the proposal for not distributing dividends, which has not yet been resolved by the shareholders' meeting.

Note 2: Price-to-earnings ratio (PER) = Average stock closing price of current year / Earnings Per Share (EPS)

Note 3: Price-to-dividend ratio (PDR) = Average stock closing price of current year / Cash dividend per share

Note 4: Cash dividend yield = Cash dividend per share / Average stock closing price of the current year.

#### (VI) Dividend Policy and Implementation Status

#### 1. Dividend policy specified in the Articles of Incorporation

If the Company's annual final accounts show a net profit after tax for the current period, the Company shall first make up for the accumulated losses and set aside 10% of the accumulated losses as legal reserve in accordance with the law, unless the accumulated legal reserve has reached the Company's paid-in capital. The special reserve shall be appropriated or reversed in accordance with the provisions of the Act or the competent authority. The board of directors shall prepare a proposal for the surplus distribution of the remaining surplus, together with any undistributed surplus at the beginning of the period, and submit it to the shareholders' meeting for resolution on the distribution of dividends to shareholders.

The Company's dividend policy is to distribute dividends to shareholders in cash or in shares, with cash dividends being no less than 10% of the total dividends, in accordance with the Company's current and future development plans, taking into account the investment environment, capital requirements and domestic and international competition, as well as the interests of shareholders.

2. Distribution of dividends proposed for resolution in the present shareholders' meeting The Company's proposal for 2022 deficit compensation was approved by the board of directors on March 23, 2023. Since there was still deficit to be compensated in 2022 shareholders' dividends are not to be distributed. The deficit compensation statement is provided in the following:

# Super Dragon Technology Co., Ltd. 2022 Deficient Compensation Statement

Unit: NT\$

| Item  | Amount        |  |
|---|---------------|--|
| Deficit yet to be compensated at the beginning of period                  | (481,390,637) |  |
| Net profit after tax in the year  | (98,817,110)  |  |
| Other comprehensive income (Remeasurement number of defined benefit plan) | 843,958       |  |
| Deficit yet to be compensated at the end of period                        | (579,363,789) |  |

Note: According to Article 239 of The Company Act: A company should not use the capital reserve to make good its capital loss,

unless the surplus reserve is insufficient to make good such loss.

Chairman: Chieh-Hsin Wu President: Chieh-Hsin Wu Accounting Officer: Mu-Cheng Tuan

- 3. Explanation on expected major changes in the dividend policy: Not applicable.
- (VII) Impact of the distribution of bonus shares proposed in the present shareholders' meeting on the business performance of the Company and earning per share: Not applicable.

(VIII) Remunerations of employees, directors and supervisors

1. The percentage or scope of remuneration for employees, directors and supervisors as stipulated in the Company's Articles of Incorporation

If the Company makes a profit for a year (the profit refers to the pre-tax income before the remuneration to employees and directors is deducted), the Company shall set aside 3.6% to 8.6% as employee remuneration and not more than 3.6% as remuneration to directors. However, where the Company has accumulated losses (including adjustments to the amount of undistributed earnings), the amount of the indemnity shall be reserved in advance.

The aforesaid employee remuneration may be in the form of stock or cash and may be made payable to employees of subordinate companies who satisfy such conditions as the Board may prescribe. The aforesaid director remuneration shall be in cash only.

The preceding two paragraphs shall be executed in accordance with the resolution of Board of Directors' meeting, and shall be reported to the shareholders' meeting.

- 2. The estimated basis for calculation of employees', directors' and supervisors' remuneration, the share calculation basis for the distribution of employees' remuneration in the form shares and the accounting handing for any discrepancy between the actual distribution amount and the estimated value: Not applicable.
- 3. Remuneration distribution status approved by the board of directors
  - (1) Employees' remuneration and remuneration of directors and supervisors distributed in cash or shares. Since there is still deficit to be compensated in 2022, the board of directors reached the resolution on March 23, 2023 to not distribute remunerations of directors and employees.
  - (2) Remuneration of employees distributed in shares and the ratio over the entity or individual financial report net profit in the current period and the total amount of remuneration of employees: There was no distribution of remuneration of employees in the form of shares in 2022.
- 4. Actual distribution status of remunerations employees, directors and supervisors in the last year: Due to the loss in 2021, there was no distribution of remunerations of employees, directors and supervisors.
- (IX) Repurchase of the Company's shares: There was no repurchase of the Company's shares.
- II. Issuance of corporate bonds

The Company did not issue corporate bonds.

III. Issuance of preferred shares

The Company did not issue preferred shares.

IV. Issuance of global depository receipts

The Company did not issue global depository receipts.

V. Issuance of employee stock options

The Company did not issue employee stock options.

VI. Issuance of new restricted employee shares status

The Company did not issue new restricted employee shares.

VII. Issuance of new shares in connection with mergers or acquisitions or with acquisitions of shares of other companies

The Company was not execute any issuance of new shares in connection with mergers or acquisitions or with acquisitions of shares of other companies.

VIII. Financing plans and implementation status

The Company had no financing plan and implementation status.

## V. Operation Overview

#### I. Business content

- (I) Business scope
  - 1. Main content of business operation
    - (1) Precious metal recycling: Electronic waste recovery, disposal and treatment
    - (2) Semiconductor workpiece cleaning service: (Customized) equipment parts cleaning service
    - (3) Materials for electroplating industry: Potassium cyanide (gold salt) automatic production and sales
    - (4) Green Art: Circular economy recycle and eco-friendly products and recycled material researches
    - (5) Solid waste information products: Provide circular economic disposal and treatment ultimate solutions to international brand customers
    - (6) Waste liquid treatment: Industrial process waste liquid treatment.
    - (7) Green energy business: Solar power generation and energy storage field.

#### 2. Operating revenue percentage

| Dunin and it am                    | 2022      |         |  |
|------------------------------------|-----------|---------|--|
| Business item                      | Amount    | Ratio % |  |
| Sales of precious metals           | 1,117,617 | 96.19   |  |
| Others                             | 24,920    | 2.14    |  |
| Revenue from provision of services | 7,774     | 0.67    |  |
| Revenue from solar power generated | 11,597    | 1.00    |  |

| Total | 1,161,908 | 100.00 |
|-------|-----------|--------|
|-------|-----------|--------|

#### 3. Present product (service) items

- (1) Sales and OEM refinement of precious metals of gold [purity reaching 99.99%], silver [purity reaching 99.99%] and platinum [purity reaching 99.90%].
- (2) Mixed waste hardware of copper powder, aluminum powder, iron and tin.
- (3) Solid and liquid hazardous industrial waste disposal and treatment services.
- (4) Complete destruction and treatment services for high-end packaging and highly confidential products.
- (5) Gold for industrial purposes (gold salt).
- (6) Semiconductor industry jigs, tools and parts cleaning.
- (7) Circular ad recycling of eco-friendly products and recycled material applications.
- (8) Provide circular economic disposal and treatment ultimate solutions to international brand customers.
- (9) Solar power generation and energy storage.

#### 4. New products (services) planned for development

- (1) Mechanical Vapor Recompression (MVR) treatment technology platform.
- (2) Platinum series of precious materials Hydrometallurgy process development.
- (3) Waste battery material treatment and recovery technologies.
- (4) Circular economic recycled material diverse researches and ultimate solution services.
- (5) Green Internet Data Center (GIDC) services.

#### (II) Industry Overview

#### 1. Industry Current Status and Development

In the past, technology is the driving force for the development of the environmental protection industry, and business operators actively invest in the development of various technologies in order to reduce the impact of hazardous industrial wastes on the environment, and the essence of value creation relies on the resource recycling and treatment.

As the concept of "circular economy" is widely accepted by the society and enterprises, the notion of "sustainable development" is expected to drive a new wave of innovation of technology and business model and to head toward the development of "pursue of welfare for all mankind, implement ESG philosophy beneficial to others and oneself". The traditional environmental protection recycle business will transform into a green enterprise "demanded by the society".

#### 2. Correlation among upstream, midstream and downstream in the industry

- (1) Upstream (waste treatment requester): Electronic industrial waste (including solid and liquid), scraps and nonconforming products, waste information products (such as computers and mobile phones, etc.), wastes derived from semiconductor processes.
- (2) Midstream (treatment implementing institutions): Waste information product disassembly and treatment, PCB and electronic waste treatment, mixed hardware treatment, industrial process waste liquid treatment, and others.
- (3) Downstream (consumers/users): Precious metal fabricated products, glass fiber powder fabricated products and recycled raw materials.

#### 3. Various development trends of products and competition status

#### (1) Industrial waste disposal and treatment

#### A. Development trend

When wastes are treated as undesirable outputs worldwide, Super Dragon Technology has been able to turn wastes into valuable items. In the past, people performs mining at mines, and nowadays, Super Dragon Technology performs mining in urban area, and the Company expects to circulate such minerals and metals in the society.

#### B. Competition status

Various countries have established regulatory controls on the export of hazardous industrial wastes, and it becomes more difficult to transport such wastes to a third country for treatment. In other words, it is necessary to seek internal qualified treatment plants to handle such wastes and to provide solutions. Accordingly, it will further promote the Company to have greater competitiveness in the market.

The Company's waste treatment types and treatment volume are at a leading position in the industry. In addition to assisting domestic electronic manufacturers to properly handle their wastes to satisfy the regulatory requirements, the Company further implements quality and innovative technologies to assist manufacturers to reduce their risk of precious metal purchase and process cost.

#### (2) Precious metal refinement and sales of gold and silver

#### A. Development trend

This business item derives from the business of preceding paragraph, and the Company performs the design and development of the production equipment. The daily refinement volume has reached the economic scale.

#### B. Competition status

The purity of refined gold can reach 99.99% and the purity for refined silver

can also reach 99.99%; therefore, the market acceptance is relatively high, such that the products are mainly targeted at the international precious metal trading market with companies with specific purposes of use as the sales targets in order to provide such materials for their further processing and manufacturing into products and for market applications.

- C. With regard to the promotion of recycled green gold, the Group expects to increase and expand the use of green gold in the industry.
- (3) Resource recycled and reused products Sales of artificial building materials and arts

Under the condition of shortage of various natural materials, the business logic of analyzing recycled material for tracing back to the recycling chain with change of the linear economy has been developed. Accordingly, recycled materials and circular economy model will be the greatest variables for the ESG performance of each industry in the future.

(4) Waste liquid disposal and treatment

The Mechanical Vapor Recompression (MVR) technology platform constructed by the Company is able to provide the most effective solution to treat inorganic wastewater that is considered to be the most difficult for treatment in the industrial process. For all inorganic waste liquids containing the compositions of nitric acid, chlorine, fluorine, ammonia nitrogen, the platform is able to handle such waste liquids with proper treatment.

#### (III) Technology and Research and Development Overview

 R&D budget invested in most recent year and up to the printing date of the Annual Report

The main R&D works of the Company for the current year will be focus on the development of industrial process waste liquid treatment, silver series of precious metal hydrometallurgy technology and waste battery material recycling technology.

Unit: NT\$ thousand

| Item/Year            | 2022      | January to March 2023 |
|----------------------|-----------|-----------------------|
| R&D expenses         | 2,424     | 1,255                 |
| Operating revenue    | 1,161,908 | 262,585               |
| As a percentage over | 0.21      | 0.40                  |
| revenue %            |           | 0.48                  |

#### 2. Technology or product successfully developed

(1) The MVR technology platform constructed by the Company is able to effectively treat mixed acids and complex inorganic waste liquids containing the

- compositions of ammonia nitrogen and fluorine, etc.
- (2) The silver series precious metal hydrometallurgy recycling feasibility has been verified, and the recovering efficiency continues to be increased.

## 3. Future R&D projects and expected investment in R&D budget

Unit: NT\$ thousand

| R&D project name                   | Current progress | Necessary R&D budget for further investment | Expected mass production completion time | Main factors affecting future success of R&D  |
|------------------------------------|------------------|---|--|---|
| Intelligent MVR technical database | 30%              | 8,000                                       | 2023                                     | Process parameter and formula adjustment for effectiveness of experimental projects |
|                                    |                  |   |  |   |

#### (IV) Long and short term business development plan

#### 1. Short-term plan

- (1) Marketing and sales strategy
  - A. Gold salt and precious metal business: Control cash and precious metal inventory level rigorously, actively transform to professional OEM for gold salt, and secure target customer groups.
  - B. Industrial process waste liquid business: Increase the weight of businesses of high technology and profits over the revenue.
  - C. Metal-containing solid waste business: Develop the solid waste treatment businesses for metals of copper, nickel, cobalt, manganese and lithium, etc.
- (2) Production policy
- (1) Cooperate with the phoenix project activation, and increase the waste information product treatment capacity in multiple times greater.
- (2) Increase the MVR treatment capacity and the treatable waste liquid items.
- (3) Adjust the precious metal refinement operation procedure, and increase recovery rate of gold-containing waste liquids.
- (4) Cooperate with gold salt professional OEM transformation plan, and increase production capacity and utilization rate.
  - (3) Product development direction
  - (1) Continue to develop inorganic waste liquid WVR treatment formula, improve equipment tolerance, and increase effective treatment capacity.
  - (2) Recycled materials applications mainly for artificial building materials, materials for geotechnical engineering works, arts and gifts.
  - (3) Establish battery and solar photovoltaic waste treatment capacity.
  - (4) Business management strategy
    - A. Adjust product profile to increase gross profit.
    - B. Refine the inventory of platinum resin into platinum spot goods in order to enhance the financial structure.
    - C. Focus on the development of R&D, business and environmental safety at the same time in order to achieve high quality growth engine.

#### 2. Long-term plan

- (1) Marketing and sales strategy
  - A. Establish alliance with battery and solar photovoltaic professional manufacturers, and develop green energy application business.
  - B. Establish alliance with partners with capacity of treating solid wastes of battery and solar photovoltaic industries, in order to construct a complete ecosystem.
- (2) Production policy

- A. Invest in sludge drying equipment, and through the volume and size reduction method, more than 50% of disposal and transportation cost can be achieved.
- B. Establish cooperative system in order to increase waste information product recycling capacity.
- C. Comprehensively plan the Guanyin Plant, Huanke Plant and Suzhou Super Dragon Plant to develop their characteristic technical content, in order to establish the foundation for the business operation of each business department.

#### (3) Product development direction

- A. Continue to improve precious metal refinement and recycling technologies, and enhance the heavy metal treatment and recovery technologies.
- B. Use land and building assets properly, and develop green energy application business opportunities.

#### (4) Business management strategy

- A. Focus on the increase of gross profit, and flexibly plan the revenue profile.
- B. Target at the water treatment, green power, testing technology, and use capital advantages to perform strategic investments.
- C. Establish the dual-engine of business and technology, and promote the long-term stable market value growth.

#### II. Market and Production/Sales Overview

#### (I) Market Analysis

## 1. Main product (service) sales (supply) region

Unit: NT\$ thousand

| Year          | 2021      |        | 2022      |        |
|---------------|-----------|--------|-----------|--------|
| Sales region  | Amount    | %      | Amount    | %      |
| Domestic      | 669,615   | 45.11  | 559,319   | 48.14  |
| Asia          | 814,633   | 54.89  | 602,589   | 51.86  |
| Net operating |           |        |           |        |
| revenue       | 1,484,248 | 100.00 | 1,161,908 | 100.00 |

Presently, the Company has invested in the China region to establish factories; therefore, the scope of business focuses on the regions of Taiwan and China as the main service regions.

#### 2. Market share

The Company focuses on the research and development related to "resource recycling and treatment, reduction of environmental burden, and establishment of resource sustainable use", and the scope of service covers relevant information technology industries of IC semiconductors, PCB, computer peripherals and optoelectronic. In addition, the Company is a domestic "Class A waste treatment institution" approved by the government. The Company provides diverse services, and the main operation includes the recycling and treatment of precious metals, semiconductor industry jigs and parts cleaning, manufacturing of gold salt, and industrial process waste liquid treatment, etc.

The electronic industrial waste volume generated worldwide has exceeded 60 million tons, and it is expected to reach 74 million tons in 2030. Since the market potential is great and the demand as well as the treatment types also continue to change along with the improvement of process and capacity of customers, the information on the market share may not appropriately represent the competitive position of the Company in the industry.

#### 3. Market future supply and demand status and growth

Presently, the market supply and demand condition is still under the demand over supply status, and relevant industries indicate high demand for treatment of industrial wastes. In addition, as the environmental protection regulations become more complete and the time required for permit license application becomes longer (treatment plant may require an average period of more than three years from the stage of establishment to plant construction completion to the stage of obtaining of operation permit license). In addition, prior to the business operation, it is necessary to sign contracts with

customers in order to perform operation. Accordingly, the actual time for the official start of operation may need another year of preparation. Furthermore, as great number of Taiwanese business operators are returning to Taiwan in recent years, the demands also increases as they continue to engage in land purchase and factory expansion. However, due to the regulatory limitation, it takes certain period of time to legally treat the waste output from the enterprise institutions. In view of such factors, it is expected that the market will still be under the demand over supply status for the next 3~5 years.

- 4. Favorable, unfavorable factors for active competitive development outlook and responsive strategies
  - (1) Favorable factors
    - A. The general public's awareness on the environmental protection is advantageous to the business development of the Company.
    - B. The Company is equipped with comprehensive treatment technologies, and implements efficient production operation and management procedure, in order to increase the recycling ratio and revenue.
    - C. The Company implements corporate culture of customer-oriented and ethical services.
  - (2) Unfavorable factors and countermeasures
    - A. Inadequate environmental protection regulations and public power For small and illegal resource recycling companies, due to the insufficient audit power and implementation, the penalties imposed are relatively weak, such that operators of inconsistent quality in the market is disadvantageous to reflect the value of the industry at fair price.

#### Countermeasures:

- (A) Continue to improve the Company's treatment technologies to achieve the safe and hazard-free condition.
- (B) Promote numeric and visual information exchange platform with full records, allowing customers to explain the treatment model and outcome of process wastes and end products to their clients.
- B. Treatment workers cannot be employed easily, and cost is too high
  Labor shortage is a common situation faced by the industry, and the
  introduction of migrant workers can only solve the issue temporarily.
  Nevertheless, the investment in automated equipment is difficult and capital
  demand is high, such that it is hard to achieve positive investment profit cycle.
  Countermeasures:

The Company adopts the operation process modular method. In addition, to the increase of automation of front-end treatment operation, the Company also enhances employees' skills in disassembly process and establishes cooperating contractors' OEM capacity, in order to increase the treatment efficiency.

C. Time required for acquisition or change of operation permit license is long such that the business expansion can be affected

When there is a need to increase the treatment process or capacity, it is necessary to perform application from the beginning again, which can be time and labor consuming, and the Company may lose business opportunities due to such matter.

#### Countermeasures:

Plan the medium and long term technology development roadmap as the basis for the mass production planning, and also communicate with the competent authority in advance and apply for assistance.

### (II) Key purpose and manufacturing process of main products

#### 1. Purpose of main products

| Product name                        | Key purpose  |
|-------------------------------------|--|
| Gold                                | Gold accessories, or refined into applied materials for semiconductor industry and optoelectronic related industries.  |
| Silver                              | Silver accessories, or industries requiring the use of silver as the raw material.   |
| Single metal                        | Iron, copper, aluminum and tin, etc. are delivered to steel mills, copper melting plants and aluminum ingot plants for recycle and reuse.  |
| Artificial<br>building<br>materials | Replace various building materials of natural, non-corrosive resistant, non-high temperature resistant materials that are in shortage, and materials for geotechnical engineering works, or even replace various types of concrete products, such as wall bricks and besser blocks, etc. |
| Art works                           | Delicate art works and gifts for viewing and collection purposes.  |
| Gold salt                           | Industrial processes of PCB and electroplating, etc.   |

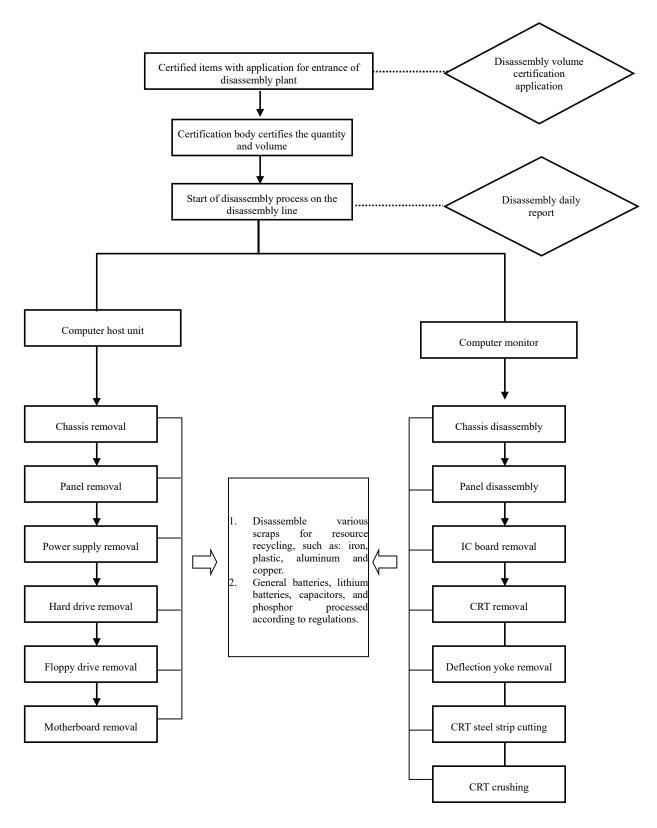

#### 2. Production process of main products

- (1) Waste information product treatment: For recycling of waste computers, printers, notebook computers and monitors, etc., the monthly treatment capacity is approximately 30,000 to 40,000 units per month. (Flow Chart 1)
- (2) Mixed waste hardware treatment: The main source is from PC boards, then through the processes of destruction, crushing, grinding, electrostatic machine screening, in order to output rose copper of high purity. In addition, scraps, including, copper, tin and iron, generated by manufacturers during their manufacturing processes are also part of the main Besser scope of recycling. (Flow Chart 1)
- (3) Precious metals refinement of gold and silver: Main resources refer to the IC, BGA, gold fingers, electroplating aging liquid, in order to refine into gold, silver, palladium and industrial potassium dicyanoaurate. (Flow Charts 2 and 3)
- (4) Artificial building materials: Main source is from PC boards, and after refinement for copper powder, the remaining glass powder and glass of computer monitors can be polymerized to output various artificial building materials and art works. (Flow Chart 4)
- (5) Production of gold salt: It refers to the "potassium dicyanoaurate" for industrial electroplating, and it is also known as "industrial gold salt". (Flow Chart 5)

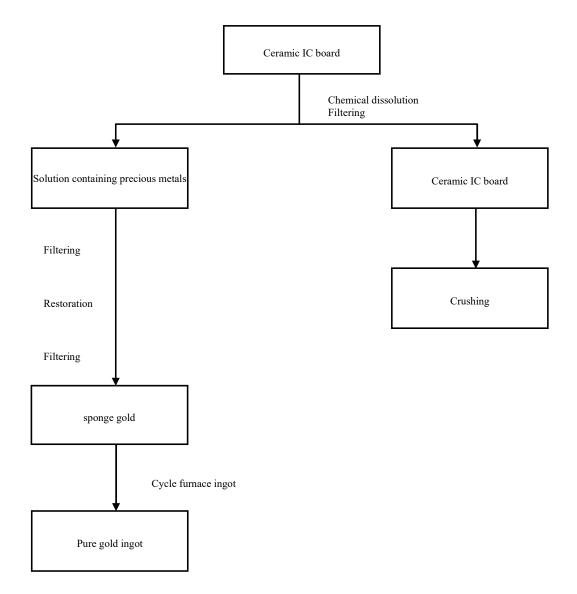

#### (III) Primary raw material supply status

| Primary raw material              | Supplier and agency  | Supply status |
|-----------------------------------|--|---------------|
| Precious metal raw material       | Bank of Taiwan, international precious metal certified suppliers   | Good          |
| Scraps containing precious metals | Mainly for the customers in the semiconductor industry, PCB industry, panel industry and electronics industry.   | Good          |
| Mixed hardware raw materials      | International well-known printers, office multi-function<br>machines, computer branded manufacturers, chain<br>superstore channel operators (mainly for recycling of<br>mobile phones and tablets) | Good          |

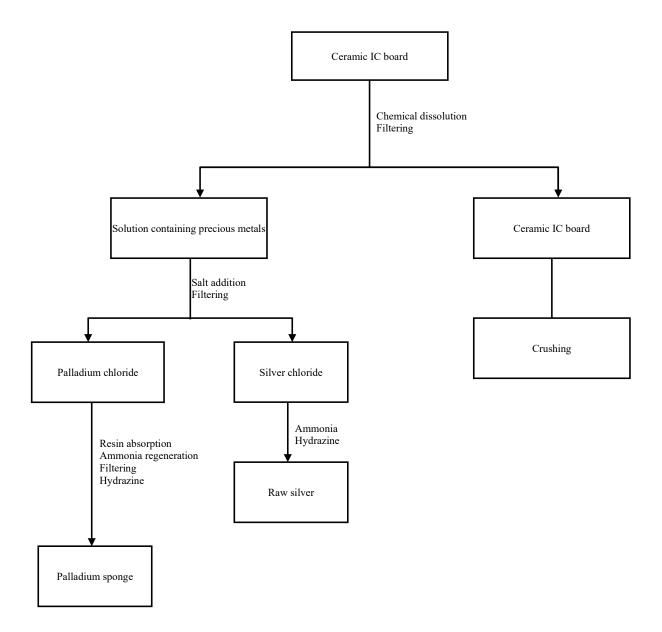

Flow Chart 1 Waste Information Product Treatment Process

Flow Chart 2 Precious Metal Refinement Process -Gold

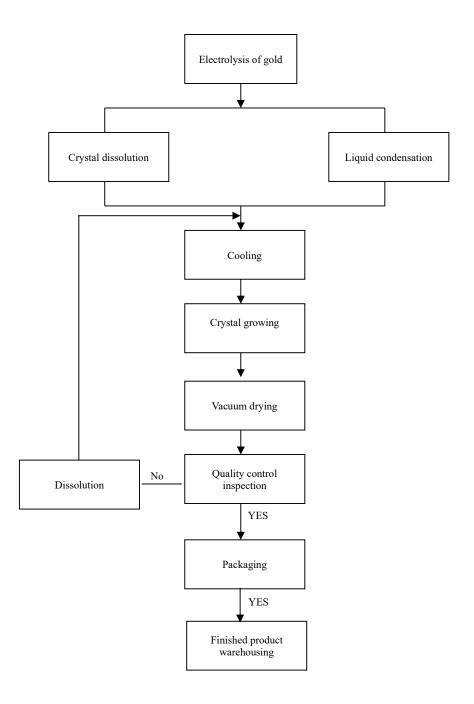

Flow Chart 3 Precious Metal Refinement Process -Silver, Palladium

Flow Chart 4 Artificial marble and other building material production process

Flow Chart 5 Gold Salt Production Process

- (IV) Name of customers accounted for more than 10% of total purchase (sales) amount of the company in the most recent two years or in any year and the purchase (sales) amount and ratio thereof, and please explain the reason of changes thereof
  - 1. Information on main suppliers of the Company in the most recent two years

Unit: NT\$ thousand

|      |                           | 2         | 2021                               |                                    |                           | 2         | 2022                               |                                    | Up to the last quarter of 2023 |         |  |                                    |

|      | Net<br>purchase<br>amount | 1,428,785 | 100.00                             |                                    | Net<br>purchase<br>amount | 1,050,132 | 100                                |                                    | Net<br>purchase<br>amount      | 249,566 | 100.00   |                                    |

Explanation: Due to gold salt process and R&D demands, materials continued to be purchased from Supplier A. In addition, Supplier F was further included in 2022 for the recycling of gold-containing waste liquid.

### 2. Information of main customers of sales of the Company in the most recent two years

|      |      | 2      | 2021                            |                       | 2022 |        |                  |                       | Up to the last quarter of 2023 |        |                            |                       |

Reasons for changes in financial ratios for the most recent two years. (If the change of increase/decrease is less than 20%, analysis may be exempted)

- Note 1: Due to the inventory adjustment in 2022, the purchase volume decreased, and the ratio decreased.
- Note 2: Due to the continuous loss in 2022, the profitability decreased.
- Note 3: Due to the loss in 2022, the short-term borrowings increased, and the solvency decreased from last period.
- Note 4: Mainly due to the operating loss of the main business in 2022.
- Note 5: The consolidated financial information of March 31, 2023 has been audited by CPAs.

The calculation formulas for the financial analysis items are as follows:

#### 1. Financial structure

- (1) Debt to total assets ratio = Total debt / Total assets.
- (2) Ratio of long-term capital to property, plant & equipment = (Total equity+ Non-current liabilities) / Net worth of property, plant and equipment.

### 2. Solvency

- (1) Current ratio = Current assets / Current liabilities.
- (2) Quick ratio = (Current assets Inventory Pre-payment) / Current liabilities.
- (3) Interest earned ratio = Profit before income tax and interest expense / Interest expense.

#### 3. Operating performance

- (1) Accounts receivable (include receivable amounts and receivable bills from operation) turnover = Net sales / Average accounts receivable in each period (include receivable amounts and receivable bills from operation) balance.
- (2) Average cash collection days = 365 / Accounts receivable turnover.
- (3) Inventory turnover = Sales cost / average inventory amount.
- (4) Accounts payable (include payable amounts and payable bills from operation) turnover = Sales cost / Average accounts payable in each period (include payable amounts and payable bills from operation) balance.
- (5) Average days in sales=365 / Inventory turnover.
- (6) Property, plant and equipment turnover = Net sales /Average net worth of property, plant and equipment.
- (7) Total assets turnover=Net sales / Average total assets.

#### 4. Profitability

- (1) Return on asset= [Earnings after tax+Interest expense× (1-Interest rate)]/Average total assets.
- (2) Return on equity = After-tax profit and loss / Average total equity.
- (3) Net profit margin = After-tax profit and loss/Net sales.
- (4) Earnings per share = (Earnings of parent company owner- Preference dividends) / weighted average number of shares outstanding.

#### 5. Cash flows

- (1) Cash flow adequacy ratio = Net cash flow from operating activities / Current liabilities
- (2) Net cash flow adequacy ratio = Net cash flows from operating activities in the last five years / (Capital expenditure + Inventory increase + Cash dividends) in the last five years.
- (3) Cash flow reinvestment ratio = (Cash provided by operating activities Cash dividends)/ (Gross property, plant and equipment + Long-term investments + Other non-current assets + Working capital).

## 6. Leverage:

- (1) Operating leverage = (Net sales Variable cost) / Income from operations.
- (2) Financial leverage = Income from operations / (income from operations Interest expense).

| Leverage              | Financial leverage                                      | 0.88    | 0.54   | 0.88    | 0.86   | 0.81   |

Reasons for changes in financial ratios for the most recent two years. (If the change of increase/decrease is less than 20%, analysis may be exempted)

Note 1: It was mainly due to the continuous loss in 2022 and the increase of loan interest rate, such that the change was greater.

Note 2: It was mainly due to the decrease of net sales amount in 2022 by 21% from 2021, such that the ratio changed.

Note 3: It was mainly due to the decrease of net sales cost in 2022 by 21% from 2021, such that the ratio changed. Note 4: It was mainly due to the decrease of cash flow from operating activities in 2022 decreased by 84%, such that the cash flow ratio/adequacy ratio and reinvestment ratio decreased.

The calculation formulas for the financial analysis items are as follows:

#### 1. Financial structure

- (1) Debt to total assets ratio = Total debt / Total assets.
- (2) Ratio of long-term capital to property, plant & equipment ratio = (net value of shareholders equity + long-term liabilities) / net value of fixed asset

#### 2. Solvency

- (1) Current ratio = Current assets / Current liabilities.
- (2) Quick ratio = (Current assets Inventory Pre-payment) / Current liabilities.
- (3) Interest earned ratio = Profit before income tax and interest expense / Interest expense.

#### 3. Operating performance

- (1) Accounts receivable (include receivable amounts and receivable bills from operation) turnover = Net sales / Average accounts receivable (include receivable amounts and receivable bills from operation) balance.
- (2) Average cash collection days = 365 / Accounts receivable turnover.
- (3) Inventory turnover = Sales cost / average inventory amount.
- (4) Accounts payable (payable amounts and payable bills from operation) turnover = Sales cost / Average accounts payable balance
- (5) Average days in sales = 365 / Inventory turnover.
- (6) Fixed asset turnover=net sales / average net value of fixed assets.
- (7) Total assets turnover=Net sales / Average total assets.

#### 4. Profitability

- (1) Return on asset = [Earnings after tax + Interest expense × (1 Interest rate)] / Average total assets.
- (2) Return on equity = after-tax profit and loss / average net equity.
- (3) Net profit margin = After-tax profit and loss/Net sales.
- (4) Earnings per share = (net profit after tax special stock dividends) / weighted average number of issued shares.

#### 5. Cash flows

- (1) Cash flow adequacy ratio = Net cash flow from operating activities / Current liabilities
- (2) Cash flow adequacy ratio = Net cash flow from operating activities for the most recent five years / (Capital expenditures + Inventory increment + Cash dividends) for the most recent five years.
- (3) Cash flow reinvestment ratio = (Cash provided by operating activities cash dividends) / (gross fixed assets + long-term investments + other assets + working capital).

#### 6. Leverage

(1) Operating leverage = (Net sales - Variable cost) / Income from operations

| (2) | Financial expense). | Income | from | operations | / | (income | from | operations · | - Interest |
|-----|---------------------|--------|------|------------|---|---------|------|--------------|------------|
|     |                     |        |      |            |   |         |      |              |            |
|     |                     |        |      |            |   |         |      |              |            |
|     |                     |        |      |            |   |         |      |              |            |
|     |                     |        |      |            |   |         |      |              |            |
|     |                     |        |      |            |   |         |      |              |            |
|     |                     |        |      |            |   |         |      |              |            |
|     |                     |        |      |            |   |         |      |              |            |
|     |                     |        |      |            |   |         |      |              |            |

<sup>\*</sup> Increase/decrease ratio change analysis explanation: Increase/decrease changes reaching 20% or above are analyzed.

- Note 1: Due to the policy of destocking with reduction of purchase adopted by customers in the electronic industry in 2022, the sales of precious metal and industrial gold salt of the Company decreased, such that the operating cost reduced and the contribution to the gross profit also decreased.
- Note 2: In 2021, due to (1) precious metal price fluctuation, the financial asset transaction resulted in a loss of NT\$5,705 thousand, and (2) foreign exchange loss was NT\$4,501 thousand. In addition, in 2022, (1) there was no finical asset transaction loss, (2) foreign exchange gain was NT\$6,984 thousand and (3) financial cost indicated an increase of expenditure of NT\$6,124 thousand from 2021.
- Note 3: It was mainly due to that in 2022, (1) defined benefit program remeasurement of other comprehensive income decreased by NT\$1,876 thousand from 2021, and (2) exchange difference in the financial statement translation of the foreign operation increased by NT\$3,034 thousand.

| (II) | Expected sales quantity and basis thereof, and the possible impact on the future financial business of the Company and responsive plan: None. |

#### III. Cash flows

#### (I) Liquidity analysis for the most recent two years

| Year                         | 2022  | 2021   | Increase (decrease) ratio |
|------------------------------|-------|--------|---------------------------|
| Cash flow ratio (%)          | 4.36  | 10.76  | -59.48%                   |
| Cash flow adequacy ratio (%) | 82.09 | 188.49 | -56.45%                   |
| Cash reinvestment ratio (%)  | 1.61  | 3.4    | -52.65%                   |

Analysis and explanation for change of ratio increase/decrease:

In 2022, the cash flow decreased, and the net cash inflow from operating activities in 2022 was NT\$39,106 thousand, and the current liabilities at the end of the period was NT\$897,400 thousand, such that the cash flow ratio decreased by 4.36%. The man reason for the difference between the cash flow from operating activities for the two periods was mainly due to the inventory and net cash inflow of prepayments in 2022 decreased by NT\$58,741 thousand from 2021. Furthermore, the current liabilities at the end of the period in 2022 increased by NT\$109,840 thousand, and the main reason was due to the increase of short-term borrowings.

#### (II) Cash liquidity analysis for the next year

Unit: NT\$ thousand

| Cash balance | Expected        | Expected    | Expected     | Remedial measures for expec |                 |
|--------------|-----------------|-------------|--------------|-----------------------------|-----------------|
| at the       | annual net cash | annual cash | cash surplus | cash f                      | low deficit     |
| beginning of | flow from       | outflows 3  | (deficit)    | Investment                  | Financial       |
| the period①  | operating       |             | amount       | plan                        | management plan |
|              | activities@     |             | 1)+2-3       | pian                        | management plan |
| 185,797      | 278,528         | 289,380     | 174,945      | -                           | -               |

Analysis of cash flow change status:

- (1) Operating activities: It is planned to refine the platinum resin into platinum finished products for sale in order to increase the cash inflow and to reduce the precious metal inventory position.
- (2) Investing activities: It is planned to increase the external equity investment and to construct production and solar power generation equipment, resulting in cash outflow.
  - (3) Financing activities: Repayment of long and short term bank loans.
- IV. Impact of Significant Capital Expenditures in the Most Recent Year on the Financial and Operating Conditions of the Company

There were no major capital expenditures for the Company in the most recent year.

V. Investment policy for the most recent year, main causes of profits or losses, improvement plans and investment plans for the next year

The Group focuses on the circular economy and is committed to the development of new environmental protection, new energy, new cooperation and new business model. In 2022, the Group and Pau Energy Storage Corp. engaged in joint venture to establish the Pau Hz Energy Corp. Its new construction of energy storage field has not yet been completed for operation, and it is expected to be completed during 2023 Q2 for business operation and profit generation. In addition, under the diverse operational development strategy, the Group will focus on the investment opportunities in green energy industry and semiconductor Industry. The actual investment plan in the future will depend on the market condition and business scale needs.

- VI. Analysis and Assessment on Risk Matters for the Most Recent Year and Up to the Printing date of the Annual Report
  - (I) Impact of interest rate, exchange rate fluctuation and inflation condition on the profit/loss of the company and future countermeasures
    - 1. Impact of interest rate change

The Company's capital planning adopts the stable and conservative principle, and the Company also periodically assesses the market interest rate, financial information change status, in order to adopt appropriate fund utilization action timely, in order to reduce the impact of increase of interest rate on the Company. The Company's short-term borrowings are for working capital adjustments, and the long-term capital refers to bank's long-term borrowings planning. In 2022, the net interest expense was NT\$20,117 thousand, accounted for 20.36% of the net loss before tax.

2. Impact of exchange rate change

Some of the Company's purchase and sales are collected and paid in foreign currency. With the foreign currency asset and liability offset effect, the impact of exchange rate change can be reduced. In 2022, the exchange gain was NT\$6,984 thousand, accounted for -7.07% of the net loss before tax.

In the future, the Company will obtain exchange rate related information at all time, and enhance the foreign exchange consultation and planning with banks to understand the exchange rate trend, thereby reducing the impact of exchange rate fluctuation on the profit of the Company.

3. Impact of inflation

As the Company's products are one of the subject matters against the inflation, when inflation occurs, the product price is also driven to increase. Accordingly, in a long term, inflation may have positive effect on the profit/loss of the Company.

(II) Policies on engaging in high risk, high leverage investments, loaning funds to others, endorsement and guarantee as well as derivative transactions, main causes of profit and loss

as well as future countermeasures

The Company focuses on the development of its main business and does not engage in any other high risk and high leverage investments. The purpose of derivative trading (futures) is for hedging, and the operation is performed within the scope of the precious metal inventory amount in order to avoid the risk of precious metal market price fluctuation. In 2022, there was no derivative trading profit/loss amount.

(III) Future R&D plan and expected investment in R&D budget

Please refer to "2. Successfully developed technologies or products" and "3. Future R&D projects and expected investment in R&D budget" on page 60 of this Annual Report for details.

(IV) Impacts of domestic/foreign important policies and changes of laws on the financial business of the company and countermeasures

In recent years, the finance and business of the Company has not been affected by domestic and foreign important policies and regulatory changes. In the future, the Company will continue to maintain close contact and consultation with legal counsel and CPA retained by the Company, in order to monitor any impact of foreign and domestic important policies and regulatory changes on the finance and business of the Company and to propose responsive strategy planning.

(V) Impacts of changes in technology and industry on the financial business of the Company and countermeasures

For the industry of the Company, in the foreseeable future, the finance and business of the Company are not expected to be affected by technology changes and major changes of the industry.

(VI) Impacts of change of cooperate image on the cooperate crisis management and countermeasures

The corporate image of the Company is excellent, and there has been no major change causing corporate management crisis.

- (VII) Expected benefit, possible risk and countermeasure for merger and acquisition Presently, the Company has no merger and acquisition plan.
- (VIII) Expected benefit, possible risk and countermeasure for expansion of facilities

The Company has completed the construction of Huanke Plant in April 2017. In addition to the increase of the production capacity, it also prepares for various environmental protection policies and products of circular economy related industries at the same time, in order to enhance the competitiveness of the Company and to reduce the Company's reliance on one single product, which is advantageous to the Company in the

diversification of the risk of international product price fluctuation. In addition, the construction fund adopts the long-term financing operation in order to reduce the capital cost and its effect on the earnings per share.

(IX) Risks faced during material incoming or sales concentration and responsive measures

For the purchase and sales status of the Company, please refer to page 73 of this Annual Report. Due to the characteristic of the industry and operation status, the Company maintains excellent business cooperation relationship with existing customers and also actively seeks other customers. In addition, the Company also seeks suppliers capable of providing 4N purity and large volume of gold.

(X) Impacts, risks and countermeasures of directors, supervisors or major shareholders with shareholding percentage exceeding 10%, large equity transfer or change on the Company

The Company is not subject to any large transfer of equities executed by directors, supervisors or major shareholders with shareholding percentage exceeding 10%.

(XI) Impacts, risks and countermeasures of change in management rights:

The Company is not subject to any change of management rights.

- (XII) For litigation or non-litigation cases indicating the Company and directors, supervisors, President, substantial responsible person, major shareholder with shareholding exceeding 10% of the Company and affiliates that are involved in major lawsuits with affirmative judgment or is pending in the court proceeding, non-litigation or administrative dispute cases with results capable of causing material impacts on the interests of shareholders or stock price, the dispute fact, claim amount, litigation starting date, primary litigation parties and handling status up to the printing date of the annual report shall be disclosed:
  - 1. Litigation or non-contentious events
    - (1) Any affirmative ruling or any currently pending major litigation, non-contentious case or administrative dispute event, and the result thereof may have major impacts on the shareholders' rights or stock price; the relevant dispute facts, subject matter amount, litigation starting date, main parties involving in the litigation and the handling status in the most recent two years and up to the printing date of the annual report of the Company: None.
    - (2) Directors, supervisors, president, substantial responsible person, major shareholders with shareholding percentage exceeding 10% of the Company and affiliates receiving any affirmative ruling or being involved any currently pending litigation, non-contentious case or administrative dispute event, and the result thereof may have major impacts on the shareholders' rights or stock price; the relevant dispute facts, subject matter amount, litigation starting date, main parties involving in the litigation and the handling status in the most recent two years and

- up to the printing date of annual report: None.
- (3) Directors, supervisors, managerial officers and major shareholders with shareholding percentage exceeding 10% of the Company being subject to the conditions described in Article 157 of the Securities and Exchange Act in the most recent two years and up to the printing date of the annual report and the current handling status of the Company: None.
- 2. Summary of any financial difficulty of Directors, supervisors, managerial officers and major shareholders with shareholding percentage exceeding 10% of the Company in the most recent two years and up to the printing date of the annual report. In case of any financial difficulty or loss of credit, its impact on the financial status of the Company shall be explained: None.

#### (XIII) Other significant risks and countermeasures

1. Information security risk

The Company's information security management policy, relevant education and training and response operation process are as follows:

- (1) Perform systematic integration management on server software and hardware such that timely supervision and control as well as issue reporting can be made, in order to allow personnel to handle such issues immediately, and backup system of high availability is provided.
- (2) System service and data access integrated account and authority control is implemented, and personnel data access is operated through hierarchy control mechanism.
- (3) All personal office computer equipment has been installed with anti-virus and USB access controls, in order to reduce data virus infection and spreading and the risk of malicious access of data.
- (4) The Company's network adopts the VPN architecture to isolate the internal and external network, and the firewall management mechanism is implemented, in order to reduce malicious intrusion actions of any third party.
- (5) The Company implements information security promotion and educational training for information equipment security management, in order to increase the internal personnel of the Company on the understanding of information security and information security risk prevention.
- (6) Information server rooms are implemented with personnel access and schedule control, which is also linked with the security mechanism, such that irrelevant personnel are prohibited from entering such areas.
- (7) The internal information personnel of the Company participate in the information security trainings and courses irregularly, in order to improve the information security related knowledge and technology applications.
- 2. Other risks: None.

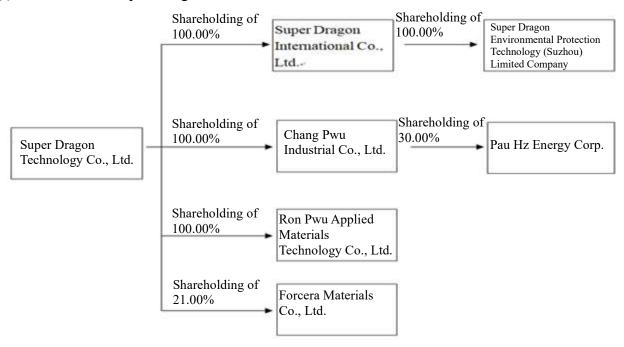

VII. Other important matters

No other important matters.

March 23, 2023

#### Independent Auditors' Report

Super Dragon Technology Co., Ltd. is hereby submitted for your review.

#### **Audit opinion**

The Consolidated Balance Sheets of Super Dragon Technology Co., Ltd. and its subsidiaries as of December 31, 2022 and December 31, 2021, and the Consolidated Comprehensive Profit and Loss Statement, Consolidated Statement of Changes in Equity and Consolidated Statement of Cash Flows for the periods from January 1 to December 31, 2022 and January 1 to December 31, 2021, And the Notes to the Consolidated Financial Statements (including the summary of significant accounting policies) have been verified by the Accountant.

In the opinion of the Accountant, the above Consolidated Financial Statements have been prepared in all material respects in accordance with Financial Reporting Standards for Securities Issuers and International Financial Reporting Standards, International Accounting Standards, interpretations and explanatory notices approved and issued in force by the Financial Regulatory Commission. It is sufficient to express the consolidated financial position of Super Dragon Technology Co., Ltd. and its subsidiaries as of December 31, 2022 and December 31, 2021, and the consolidated financial performance and consolidated cash flows of Super Dragon Technology Co., Ltd. from January 1 to December 31, 2022 and January 1 to December 31, 2021.

#### **Basis of Audit Opinion**

The Accountant perform the audit work in accordance with Rules Governing Auditing and Certification of Financial Statements by Certified Public Accountants and Audit Standard. The responsibilities of the Accountant under these standards will be further explained in the section of the accountant's responsibilities for checking the financial statements. In accordance with the professional ethics code of accountants, the staff of the firm to which the Accountant belongs has maintained independence from Super Dragon Technology Co., Ltd. and its subsidiaries, and fulfilled other responsibilities under the code. The Accountant believes that sufficient and appropriate audit evidence has been obtained to form a basis for the audit opinion.

#### **Key audit items**

Key audit items refer to the items that are the most important in the audit of the 2022 Consolidated Financial Statements of Super Dragon Technology Co., Ltd. and its subsidiaries in accordance with the professional judgment of the accountant. Such matters have been taken into account in the audit of the consolidated financial statements as a whole and in the formation of the examination opinion, and the Accountant does not express an opinion on such matters alone.

#### Recognition of revenue

The operating income of Super Dragon Technology Co., Ltd. and its subsidiaries in 2022 is NT \$1,161,908,000, which is material to the Consolidated Financial Statements. Due to the complexity and particularity of the transaction of the environmental protection industry operated by the Group and its sales locations including Taiwan, Hong Kong and other multinational markets, As a result, the time and amount of sales revenue recognition are significantly risky, so the accountant decides to list revenue recognition as its key audit item. The audit procedures of the Accountant include (but are not limited to) understanding various sales models, evaluating the reasonability of accounting policies for revenue recognition related to performance obligations under each model, including reviewing the transaction conditions of the parties, testing the effectiveness of internal controls related to the time point of revenue recognition of performance obligations in the sales cycle, and performing detailed tests on selected samples of sales details, including checking the original orders or sales contracts of major customers and other sales documents, reviewing the transaction conditions and confirming whether the revenue recognition time of each performance obligation is consistent with the performance obligations and satisfaction time set forth in the contract or order, and performing the verification procedures such as sales revenue cut-off test and significant sales return and discount after the review period for a period of time before and after the balance sheet date. The accountant also considers the appropriateness of the disclosure of operating income in Notes 4 and 6 to the Consolidated Financial Statements.

#### Valuation of inventories

The net inventory of Super Dragon Technology Co., Ltd. and its subsidiaries as of December 31, 2022 was NT\$447,366,000, accounting for 16% of the total assets, which is material to the Consolidated Financial Statements. As most of the inventories are gold, platinum and silver, in addition to the complex management of asset preservation and the need for close control, these precious metals are vulnerable to frequent and large price changes in the international market, and their inventory storage patterns are also diversified. These factors affect the complexity of the calculation of net realization and involved management personnel's judgement. Therefore, the Accountant has determined that valuation of inventory is a key audit item. The audit procedures of

the accountant include (but are not limited to) the execution of the evaluation of the inventory plan of the management level, the selection of major inventory items to test the effective implementation of its internal control and the confirmation of inventory quantity and status. Select samples to test and evaluate the net realized value estimated by management personnel for valuation of inventory (including the determination of inventory quantity in process), etc. The accountant also considers the appropriateness of the disclosure of inventory in Notes 5 and 6 to the Consolidated Financial Statements.

### Responsibilities of management personnel and governance unit for Consolidated Financial Statements

It is the responsibility of management personnel to prepare Consolidated Financial Statements as may be expressed in accordance with the financial reporting standards of securities issuers and international Financial Reporting Standards, International Accounting Standards, interpretations and explanatory notices approved and issued by the Financial Supervisory Commission, and to maintain the necessary internal control related to the preparation of Consolidated Financial Statements. To ensure that the Consolidated Financial Statements are free from material misrepresentation due to fraud or error.

In preparing the consolidated financial statements, management's responsibility also includes evaluating the ability of Super Dragon Technology Co., Ltd. and its subsidiaries to continue as a going concern, disclosure of related matters, and adoption of a going concern accounting basis, unless management intends to liquidate Super Dragon Technology Co., Ltd. and its subsidiaries or cease business, or no practicable alternative other than liquidation or suspension of business.

The governance unit of Super Dragon Technology Co., Ltd. and its subsidiaries should be responsible for supervising the process of financial reporting.

#### Accountant's responsibilities of auditing the Consolidated Financial Statements

The purpose of Accountant's audit of the Consolidated Financial Statement is to obtain reasonable assurance as to whether the Consolidated Financial Statement as a whole certain material misrepresentations due to fraud or error, and to issue a verification report. Reasonable assurance is a high degree of assurance, but there is no guarantee that an audit conducted in accordance with the audit standards will detect a material misrepresentation in the consolidated financial statements. Misrepresentation may lead to fraud or error. Misrepresentations of individual amounts or aggregate amounts are considered material if they can reasonably be expected to affect economic decisions

made by users of the Consolidated Financial Statements.

The Accountant uses professional judgement and professional skepticism when auditing in accordance with Auditing Standards. The Accountant also performs the following duties:

- 1. Identify and assess the risk of material misrepresentation due to fraud or error in the Consolidated Financial Statements; Design and implement appropriate responses to the risks assessed; And obtain sufficient and appropriate audit evidence to form a basis for the audit opinion. Because fraud may involve collusion, forgery, willful omission, misrepresentation, or overstepping internal controls, the risk of failing to detect material misrepresentation due to fraud is higher than that due to error.
- 2. Obtain the necessary understanding of the internal controls relevant to the audit in order to design audit procedures appropriate for the circumstances, provided that the purpose is not to express an opinion on the effectiveness of the internal controls of Super Dragon Technology Co., Ltd. and its subsidiaries.
- 3. Evaluate the appropriateness of the accounting policies, and the reasonability of accounting estimate and related disclosure which the management personnel adopted.
- 4. According to the obtained audit evidence, conclude the appropriateness of management personnel's adoption of the accounting basis for a going concern, and conclude the events or conditions whether there is a material uncertainty about the ability of Super Dragon Technology Co., Ltd. and its subsidiaries to continue as a going concern. In the opinion of the Accountant, if there is material uncertainty of the event and condition, I should alert users of the Consolidated Financial Statements to the relevant disclosure of Consolidated Financial Statements in the audit report or amend the audit opinion if such disclosure is inappropriate. The conclusions of the Accountant is based on the audit evidence available as of audit report date. However, future events or conditions may cause Super Dragon Technology Co., Ltd. and its subsidiaries to no longer be able to continue as a going concern.
- 5. Evaluate whether the related transaction and events in the overall expression, structure and content of Consolidated Financial Statements (including related Notes), and Consolidated Financial Statements are expressed appropriately.
- 6. Obtain the adequate and appropriate audit evidence of the consolidated financial information to issue the opinions about the Consolidated Financial Statements. The accountant is responsible for the guidance, supervision and execution of group audit cases, and the formation of group audit opinions.

The matters communicated by the accountant with the governing unit include the planned scope and timing of the audit and significant audit findings (including significant lack of internal control identified during the audit).

The accountant also provides the governing unit with a statement that the personnel of the accounting firm subject to the independence code have complied with the Independence Code of Professional Ethics for Accountants, and communicates with the governing body all relationships and other matters (including relevant protective measures) that may be considered to affect the independence of accountants.

Based on the matters communicated with the governance unit, the Accountant decides the key matters for the audit of the 2011 consolidated financial statements of Super Dragon Technology Co., Ltd and its subsidiaries. The Accountant states such matters in the audit report, unless public disclosure of a particular matter is prohibited by statute, or in very rare circumstances, the Accountant decides not to communicate a particular matter in the audit report because it can reasonably be expected that the negative impact of such communication will outweigh the public interest enhanced.

#### **Others**

Super Dragon Technology Co., Ltd. has prepared the Parent Company Only Financial Reports of 2022 and 2021, and the accountant has issued the unqualified opinion audit report for reference.

# Super Dragon Technology Co., Ltd. and Its Subsidiaries Notes to Consolidated Financial Statements (Amounts in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

#### I. Company History

Super Dragon Technology Co., Ltd. (hereinafter referred to as "the Company") was approved to be incorporated and registered on December 25, 1996. The original registered company name was "Super Dragon Engineering Co., Ltd." and then renamed "Super Dragon Technology Co., Ltd." on December 2, 1999. The main business scope includes the collection and treatment of business waste (including general and hazardous) and the trading of copper, lead, zinc, iron, tin, aluminum, gold-plated, silver-plated, and palladium-plated materials, as well as single precious metals (gold, silver, and palladium). The Company's stock has been traded on Taipei Exchange since December 30, 2003 and on Taiwan Stock Exchange since January 21, 2008. Its registered business is located at No.323, Huanke Rd., Datan Vil., Guanyin Dist., Taoyuan City. The main operating sites are located at No. 12, Ronggong South Rd., Caoluo Vil., Guanyin Dist., Taoyuan City and No. 323, Huanke Rd., Datan Vil., Guanyin Dist., Taoyuan City.

#### II. Approval Date and Procedures of the Consolidated Financial Statements

The 2022 and 2021 consolidated financial statements of the Company and its subsidiaries (hereinafter referred to as the "Group") were released after being approved by the Board of Directors on March 23, 2023.

#### III. Application of New Standards, Amendments and Interpretations

1. Changes in accounting policies due to the initial application of the IFRSs:

The Group has adopted the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations ("IFRSs") that have been endorsed by the FSC and are applicable to the fiscal years beginning on or after January 1, 2022, and the initial application of the newly issued and amended standards and interpretations caused no material impact on the Group.

2. The new or amended IFRSs published by IASB and endorsed by the FSC not yet adopted by the Group:

|     |  | Effective Date   |
|-----|--|------------------|
|     |  | Announced by the |
| No. | New, Revised or Amended Standards and Interpretations    | IASB             |
| 1   | Amendments to IAS 1 "Disclosure of Accounting Policies"  | January 1, 2023  |
| 2   | Amendments to IAS 8 "Definition of Accounting Estimates" | January 1, 2023  |

|     |  | Effective Date   |
|-----|--|------------------|
|     |  | Announced by the |
| No. | New, Revised or Amended Standards and Interpretations    | IASB             |
| 3   | Amendments to IAS 12 "Deferred Tax Related to Assets and | January 1, 2023  |
|     | Liabilities Arising from a Single Transaction"           |                  |

(1) Amendments to IAS 1 "Disclosure of Accounting Policies"

The disclosure of accounting policies to provide more useful information to investors and other major users of financial statements was improved in the amendments.

(2) Amendments to IAS 8 "Definition of Accounting Estimates"

Accounting estimates are directly defined, and IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" was further amended to help an enterprise distinguish between changes in accounting policies and changes in accounting estimates.

(3) Amendments to IAS 12 "Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction"

The scope of deferred tax recognition exemption under paragraphs 15 and 24 of IAS 12 "Income Tax" was narrowed so that the exemption does not apply to transactions that result in the same amounts of taxable and deductible temporary differences upon initial recognition.

The Group evaluated the above new, revised, and amended standards and interpretations that have been published by the IASB and endorsed by the FSC and are applicable to the fiscal years beginning on or after January 1, 2023 and determined that they did not cause any material impact on the Group.

3. Up to the date the financial statements were approved for release, the new or amended IFRSs published by IASB and endorsed by the FSC and not adopted by the Group:

|     |   | Effective Date      |
|-----|---|---------------------|

|     | Covenants"  |                  |

(1) Amendments to IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" — Sale or Contribution of Assets Between an Investor and its Associate or Joint Venture

The amendments aim to address the inconsistency regarding the loss of control due to the investment in an associate or a joint venture through a subsidiary between IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures". IAS 28 stipulates that when non-monetary assets are invested in exchange for the equity in an associate or a joint venture, the share of the resulting profit or loss shall be eliminated as the treatment method adopted for downstream transactions. IFRS 10 stipulates that the total gain or loss upon loss of control over a subsidiary shall be recognized. The amendments restrict the above requirements of IAS 28: when assets that constitute a business as defined in IFRS 3 are sold or purchased, the total resulting gain or loss shall be recognized.

In the amendments, IFRS 10 was amended so that when an investor sells or invests in a subsidiary (associate or joint venture) that does not constitute a business as defined by IFRS 3, only the profit or loss arising therefrom within the scope not belonging to the investor shall be recognized.

#### (2)IFRS 17 Insurance Contracts

This standard provides a comprehensive model of insurance contracts, including all accounting-related elements (recognition, measurement, presentation, and disclosure principles). The core of the standard is a regular model. Under this model, during the initial recognition, the group of insurance contracts are measured at the aggregate amount of fulfillment cash flows and contractual service margins. The carrying amount at the end of

each reporting period is the sum of the liabilities for the remaining coverage and the liabilities for incurred claims.

In addition to the regular model, it also provides a specific applicable method for contracts with direct participation features (variable fee approach and a simplified method for short-term contracts) (premium allocation approach).

After this standard was published in May 2017, the amendments were published in 2020 and 2021. In these amendments, the effective date in the transitional provisions will be postponed for two years (that is, from January 1, 2021 postponed through January 1, 2023) with additional exemptions provided, while some regulations are simplified to reduce the cost of adopting this standard, and some regulations are amended to make some scenarios easier to interpret. After this standard becomes effective, it will supersede the transitional provisions (i.e. IFRS 4 "Insurance Contracts").

#### (3) Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"

The classification of liabilities as current or non-current in paragraphs 69 to 76 of IAS 1 "Classification of Liabilities as Current or Non-current" was amended.

#### (4) Amendments to IFRS 16 "Lease Liability in a Sale and Leaseback"

The amendments are to improve the consistent application of the standard by adding additional accounting treatment for IFRS 16 "Leases" in the seller and lessee's sales and leaseback.

#### (5) Amendments to IAS 1 "Non-current Liabilities with Covenants"

The amendments are to enhance the information on long-term liability contracts provided enterprises. It clarifies that the contractual agreement to be followed within 12 months after the end of the reporting period does not affect the classification of such liabilities as current or non-current at the end of the reporting period.

The date of applying the above standards or interpretations that have been published by the IASB but have not yet been endorsed by the FSC shall be subject to the decisions made by the FSC. As per the Group's assessment, the above new or revised standards or interpretations did not impose a significant impact on the Group.

#### IV. Summary of Significant Accounting Policies

#### 1. Statement of compliance

The Group's financial statements for the years ended December 31, 2022 and 2021 have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs endorsed and issued into effect by the FSC.

#### 2. Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for the financial instruments at fair value. The consolidated financial statements are presented in thousands of NT dollars (NTD), unless otherwise specified.

#### 3. Overview of consolidation

#### Basis for preparation of consolidated financial statements

When the Company is exposed to variable returns from participation in the entity or has rights to said variable returns, and has the ability to affect such returns through its power over the entity, the Company controls the entity. In particular, the Company controls an investee only when it has the following three elements at the same time:

- (1) Power over an investee (i.e., existing rights that give the current ability to direct the relevant activities);
- (2) Exposed or rights to variable returns from its involvement with an investee; and
- (3) Ability to use that power to affect its number of variable returns.

When the Company directly or indirectly holds less than a majority of an investee's voting rights or similar rights, the Company considers all relevant facts and situations to assess whether it has power over the investee, including:

- (1) Contractual agreements with other holders of voting rights in the investee;
- (2) Rights arising from other contractual agreements;
- (3) Voting rights and potential voting rights.

When the facts and situations indicate that one or more of the three elements are changed, the Company reassesses whether it still has control over the investee.

Each subsidiary is included in the consolidated financial statements from the date of acquisition (i.e., the date when the Group gains control) till the date when the Group lost its control over the subsidiary. The accounting period and policies of each subsidiary's financial statements are consistent with those of the parent company. All intra-group account balances, transactions, unrealized gains and losses arising from intra-group transactions and dividends were all eliminated.

Changes in the shareholding in a subsidiary are treated as an equity transaction if the control over the subsidiary is not lost.

Subsidiaries' total comprehensive income is attributable to the owners of the Company and the non-controlling interests, even if it results in losses for non-controlling interests.

If the Group loses control over a subsidiary, then

- (1) The subsidiary's assets (including goodwill) and liabilities are de-recognized;
- (2) The carrying amounts of all non-controlling interests are de-recognized;
- (3) The fair value of the acquisition consideration is recognized;
- (4) The fair value of any investment retained is recognized;
- (5) Any gain or loss is recognized as current profit or loss;
- (6) The amounts of the items recognized in other comprehensive income before reclassification to the parent company is recognized in current profit or loss.

The entities in the consolidated financial statements are as follows:

| Name of Investor | Name of   | Main business   | Ownership (%) |            |
|------------------|---|---|---------------|------------|

|                    | Limited       |                        |         |         |
|                    | Company       |                        |         |         |

Note: The Company repurchased 0.13% of shares in Chang Pwu Industrial Co., Ltd. at a price of NT\$218 thousand on May 18, 2021.

#### 4. Foreign currency transactions

The Group's consolidated financial statements are presented in NTD, the Company's functional currency. Each entity within the Group determines its own functional currency and measures its financial statements in the functional currency accordingly.

Transactions in currencies other than an entity's functional currency (i.e. foreign currencies) are recognized at the exchange rates prevailing on the transaction dates. On each balance sheet date, monetary items denominated in foreign currencies are translated at the exchange rate prevailing on that date. Non-monetary items in foreign currencies measured at fair value are translated at the exchange rate prevailing on that date when the fair value is measured. Non-monetary items in foreign currencies measured at historical cost are translated at the exchange rates prevailing on the initial transaction dates.

Except as stated below, exchange differences arising from settlement or translation of monetary items are recognized in profit or loss for the period in which they occur.

- (1) Regarding foreign-currency borrowings incurred to acquire an eligible asset, if the resulting exchange difference is regarded as an adjustment to interest costs, it is part of the borrowing cost and is capitalized as the cost of the asset.
- (2) Foreign-currency items to which IFRS 9 "Financial Instruments" applies are handled in accordance with the accounting policies for financial instruments.
- (3) Regarding monetary items that form part of a reportable entity's net investment in foreign operations, exchange differences arising therefrom are initially recognized in other comprehensive income and are reclassified from equity to profit or loss when the net investment is disposed of.

When the gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange gain or loss is recognized in other comprehensive income. When the gain or loss on a non-monetary item is recognized in profit or loss, any exchange gain or loss is recognized in profit or loss.

#### 5. Translation of foreign currency financial statements

When the consolidated financial statements were prepared, the assets and liabilities of the foreign operations were translated into NTD at the closing exchange rate on the balance sheet date. Income and expense items were translated at the average exchange rates for the period. Any exchange differences arising from translation were recognized in other comprehensive income. When the foreign operations were disposed of, the cumulative exchange differences were previously been recognized in other comprehensive income as an independent component under equity was reclassified from equity to profit or loss when the gains or losses on disposal were recognized. Regarding the partial disposal of a subsidiary with foreign operations (over which the control is lost) and the partial disposal of an interest in an associate or a joint arrangement with foreign operations, where the retained interest is a financial asset with foreign operations included, it is also treated as disposal.

Regarding the partial disposal of a subsidiary with foreign operations (over which the control is not lost), the cumulative exchange difference recognized in other comprehensive income is re-attributed to the non-controlling interests of the foreign operations in proportion and is not recognized in profit or loss. The partial disposal of an associate or a jointly controlled entity with foreign operations (over which the significant influence or joint control is not lost), when part of the disposal includes associates of foreign operating institutions or joint arrangements, the cumulative exchange difference is reclassified to profit or loss in proportion.

The Group's goodwill arising from the acquisition of a foreign operation and the adjustment to the fair value of the carrying amounts of its assets and liabilities are regarding as the foreign operation's assets and liabilities and presented in its functional currency.

#### 6. Criteria for classification of current and non-current assets and liabilities

Assets that meet one of the following criteria are classified as current assets, otherwise they are non-current assets:

(1) Assets expected to be realized in the normal operating cycle or intended to be sold or consumed;

- (2) Assets held primarily for the purpose of trading;
- (3) Assets expected to be realized within 12 months after the balance sheet date;
- (4) Cash or cash equivalents, excluding assets restricted from being exchanged or used to settle liabilities for at least 12 months after the balance sheet date.

Liabilities that meet one of the following criteria are classified as current liabilities, otherwise they are non-current liabilities:

- (1) Liabilities expected to be settled in the normal operating cycle;
- (2) Liabilities held primarily for the purpose of trading;
- (3) Liabilities expected to be settled within 12 months after the balance sheet date;
- (4) Liabilities with a repayment deadline that cannot be unconditionally deferred for at least 12 months after the balance sheet date. However, the terms of a liability that could, at the option of the counterparty, result in its settlement by issuing equity instruments do not affect its classification.

#### 7. Cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits, and short-term time deposits and investments that are highly liquid and readily convertible into a fixed amount of cash at any time with little risk of value changes (including time deposits within a duration of three months).

#### 8. Financial Instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities within the scope of IFRS 9 "Financial Instruments" are measured at fair value upon initial recognition; the transaction costs that are directly attributable to the acquisition or issuance of financial assets and financial liabilities (except financial assets and financial liabilities classified as at fair value through profit or loss) are added to or subtracted from the fair values of the financial assets and financial liabilities.

#### (1) Recognition and measurement of financial assets

Regular trading of financial assets is recognized and derecognized in accordance with trade date accounting.

The Group classifies financial assets as those subsequently measured at amortized cost, at fair value through other comprehensive income, or at fair value through profit or loss based on the two bases below:

- A. The business model for financial asset management
- B. Contractual cash flow characteristics of financial assets

#### Financial assets at amortized cost

Financial assets that meet both of the following criteria are measured at amortized cost and are recognized in the balance sheet as notes or accounts receivable, financial assets at amortized cost, or other receivables:

- A. Business model for financial asset management: Holding financial assets to collect contractual cash flows.
- B. Contractual cash flow characteristics of financial assets: The cash flow is entirely the payment for principal and the interest on the outstanding principal.

Such financial assets (excluding those for hedging) are subsequently measured at the amortized cost [the amount measured upon initial recognition, less the principal repaid, plus or less the cumulative amortization of the differences between the initial amount and the due amount (using the effective interest approach), with the allowance for losses adjusted]. The gain or loss is recognized in profit or loss upon de-recognition, through the amortization process, or when an impairment gain or loss is recognized.

Interest accrued using an effective interest method (effective interest rate multiplied by the total carrying amount of a financial asset) or based on the situations below is recognized in profit or loss:

- A. In the case of a credit-impaired financial asset purchased or created, the credit-adjusted effective interest rate is multiplied by the amortized cost of the financial asset;
- B. If it is not the case but subsequently becomes credit-impaired, the effective interest rate is multiplied by the amortized cost of the financial asset.

#### Financial assets at fair value through other comprehensive income

Financial assets that meet both of the following criteria are measured at fair value through other comprehensive income and recognized in the balance sheet as financial assets at fair value through other comprehensive income:

- A. The business model for financial asset management: Collection of contractual cash flows and sales of financial assets.
- B. Contractual cash flow characteristics of financial assets: The cash flow is entirely the payment for principal and the interest on the outstanding principal.

The recognition of relevant gains and losses on such financial assets is specified below:

- A. Before de-recognition or reclassification, except for impairment gains or losses and foreign currency exchange gains or losses that are recognized in profit or loss, such gains or losses are recognized in other comprehensive income.
- B. Upon de-recognition, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.
- C. Interest accrued using an effective interest method (effective interest rate multiplied by the total carrying amount of a financial asset) or based on the situations below is recognized in profit or loss:
  - (a) In the case of a credit-impaired financial asset purchased or created, the creditadjusted effective interest rate is multiplied by the amortized cost of the financial asset;
  - (b) If it is not the case but subsequently becomes credit-impaired, the effective interest rate is multiplied by the amortized cost of the financial asset.

In addition, regarding equity instruments within the scope of IFRS 9 that are neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies, the Group, upon initial recognition, elects (irrevocably) to recognize the subsequent changes in the fair values thereof in other comprehensive income. The amount recognized in other comprehensive income must not be subsequently reclassified to profit or loss (when such equity instruments are disposed

of, it will be included in the cumulative amount of other equity items and directly transferred to retained earnings) and is recognized in the balance sheet as a financial asset at fair value through other comprehensive income. Investment dividends are recognized in profit or loss unless they clearly represent a recovery of part of the cost of the investment.

#### Financial assets at fair value through profit or loss

Except for the above financial assets in alignment with specific criteria that are measured at amortized cost or fair value through other comprehensive income, financial assets are measured at fair value through profit or loss and recognized in the balance sheet as financial assets at fair value through profit or loss.

Such financial assets are measured at fair value, and any gain or loss arising from remeasurement is recognized in profit or loss. The gain or loss recognized in profit or loss includes any dividends or interest received due to the financial asset.

#### (2) Impairment of financial assets

The Group's investments in debt instruments at fair value through other comprehensive income and financial assets at amortized cost are recognized as expected credit losses with an allowance for losses provided. An allowance for losses on an investment in a debt instrument measured at fair value through other comprehensive income is recognized in other comprehensive income without the carrying amount of the investment reduced. The Group measures expected credit losses in a way that reflects the following:

- A. An unbiased, probability-weighted amount determined by evaluating each potential outcome
- B. Time value of money
- C. Reasonable and corroborative information related to past events, present conditions, and future economy forecasts (which can be accessed without an excessive cost or investment on the balance sheet date)

The methods of measuring an allowance for losses are specified below:

A. Measured at 12-month expected credit losses: Including financial assets with the credit risk not increasing significantly since the initial recognition or those with an estimated low credit risk on the balance sheet date. Also, it also includes an allowance for the

lifetime expected credit losses during the prior reporting period, without meeting the indicator that the credit risk has significantly increased since the initial recognition on the balance sheet date of this period.

- B. Measured at lifetime expected credit losses: Including financial assets with the credit risk increasing significantly since the initial recognition or credit-impaired financial assets purchased or created.
- C. For accounts receivable or contract assets arising from transactions within the scope of IFRS 15, the Group measures an allowance for lifetime expected credit losses.

On each balance sheet date, the Group evaluates whether the credit risk of a financial instrument has increased significantly after the initial recognition by comparing the default risk of the financial instrument on the balance sheet date and the initial recognition date. Please refer to Note 12 for relevant credit risk information.

#### (3) Derecognition of financial assets

The Group derecognizes a financial asset held in the case of any of the following circumstances:

- A. The contractual rights to receive the cash flows from the financial asset have expired.
- B. A financial asset is transferred with all the risks and rewards attached to the ownership of the asset substantially transferred to the counterparty.
- C. All the risks and rewards attached to the ownership of the asset are neither substantially transferred nor retained, but the control over the asset is transferred.

When a financial asset as a whole is de-recognized, the difference between its carrying amount and the sum of the consideration received or receivable plus any cumulative gain or loss recognized in other comprehensive income is recognized in profit or loss.

(4) Financial liabilities and equity instruments

Classification of liabilities and equity

Liabilities and equity instruments issued by the Group are classified as financial liabilities or equity as per the substance of the agreement and the definitions of financial liabilities and equity instruments.

# **Equity instrument**

Equity instrument refers to any contract that demonstrates the Group's remaining interest in assets less all of its liabilities. Equity instruments issued by the Group are recognized at the acquisition prices, less the direct issuance cost.

# Financial liability

Financial liabilities that fall within the scope of IFRS 9 are classified as either financial liabilities at fair value through profit or loss or financial liabilities at amortized cost upon initial recognition.

# Financial liabilities at amortized cost

Financial liabilities measured at amortized cost, including payables and borrowings, are subsequently measured using the effective interest rate method after the initial recognition. When financial liabilities are de-recognized and amortized using the effective interest rate method, the relevant gains or losses and amortizations are recognized in profit or loss.

The amortized cost is calculated with the discount or premium and the transaction cost upon acquisition taken into account.

# Derecognition of financial liabilities

When the obligations of financial liabilities are lifted, cancelled, or expire, the financial liabilities are derecognized.

When the Group exchanges debt instruments with materially different terms with a creditor or significantly changes all or part of the terms of the existing financial liabilities (financial difficulties or not), the initial liabilities are derecognized and new liabilities are recognized. When a financial liability is derecognized, the difference between its carrying amount and the total consideration paid or payable (including the non-cash assets transferred or the liabilities assumed) is recognized in profit or loss.

# (5)Offset of financial assets and liabilities

Financial assets and financial liabilities can only be offset and presented in the balance sheet as a net amount when the recognized amount is legally entitled to be offset with an intension to be settled in a net amount or realize the asset and settle the liability at the same time.

#### 9. Derivatives

The derivatives held or issued by the Group are used to hedge the exchange rate risk and the interest rate risk. Among them, those designated to effectively hedge risks are recognized as financial assets or liabilities for hedging purposes in the balance sheet; the remaining not designated to effectively hedge risks, it is presented in the balance sheet as financial assets or financial liabilities at fair value through profit or loss.

A derivative is initially recognized at fair value at the date the derivative contract is signed and subsequently measured at fair value. When the fair value of the derivative is a positive figure, it is a financial asset; a negative figure, it is a financial liability. Any change in the fair value of the derivative is recognized directly in profit or loss, but if hedging is involved and effective, the derivative is recognized in profit or loss or equity depending on the type of hedging.

Where a master contract is about a non-financial asset or financial liability, if the economic characteristics and risks of the derivative embedded in the master contract are not closely related to the master contract, and the master contract is not measured at fair value through profit or loss, the embedded derivative should be regarded as an independent derivative.

#### 10. Fair value measurement

Fair value is the price that can be received from a sale of an asset or paid to transfer a liability in an orderly transaction between market participants. It is assumed that the sale of the asset or transfer of the liability takes place in one of the markets below when the fair value is measured:

- (1) The principal market for the asset or liability, or
- (2) If there is no principal market, the most favorable market for the asset or liability.

The principal or most favorable market should be accessible for the Group to trade.

The measurement of the fair value of an asset or a liability serves as an assumption that market participants would adopt when pricing the asset or liability in the in the best economic interest of the market participants.

The fair value of a non-financial asset is measured based on market participants' ability to make the most of or put the asset to the best use or by selling the asset to another market participant who will make the most of or put the asset to the best use to generate economic benefits.

The Group measures the fair value using a valuation technique that is appropriate in relevant situations with sufficient information available and maximizes the use of relevant observable inputs while minimizing the use of unobservable inputs.

#### 11. Inventories

Inventories are valued at the lower of cost or net realizable value with an item-by-item comparison method.

Costs refer to the costs incurred in bringing inventories to a condition and location ready for sale or production.

Raw materials are valued at the actual purchase cost with a weighted average method.

Finished goods and work in process include direct raw materials, labor, and fixed manufacturing overhead apportioned based on normal production capacity, excluding the borrowing costs.

The net realizable value is calculated based on the estimated selling price, less the costs and selling expenses required till completion in the ordinary course of business.

The provision of services is handled in accordance with IFRS 15 outside the scope of inventories.

#### 12. Investments using the equity method

The Group's investments in associates are accounted for using the equity method, except for

assets that are classified as assets held for sale. Associates refer to those on which the Group has significant influence.

With an equity method adopted, an investment in an associate recognized in the balance sheet is the amount of cost, plus the amount of the net change in the Group's net assets in the associate after the acquisition in proportion to the Group's shareholding. After the carrying amount of the investment in the associate and other relevant long-term interests are reduced to zero using the equity method, additional losses and liabilities are recognized only to the extent that the Group has incurred legal obligations, or constructive obligations, or made payments on behalf of the said associate. Unrealized gains or losses arising from transactions between the Group and its associates are eliminated in proportion to its equity in the associates.

When an associate's equity change does not occur due to an item under profit or loss or other comprehensive income and does not affect the Group's shareholding, the Group recognizes the change in ownership interests in proportion to its shareholding. Therefore, when the associate is subsequently disposed of, the capital surplus recognized is transferred to profit or loss in proportion to the disposal.

In the event of issuance of new shares by an associate, when the Group does not subscribe in proportion to its shareholding, resulting in a change in the proportion of investment and an increase or decrease in the Group's share in the associate's net assets, "capital surplus" and "investments using the equity method" are adjusted accordingly. When the proportion of investment decreases, the relevant items previously recognized in other comprehensive income will be reclassified to profit or loss or other appropriate accounts depending on the percentage of the decrease. When the associate is subsequently disposed of, the above capital surplus recognized is transferred to profit or loss in proportion to the disposal.

Each associate's financial statements are prepared for the same reporting period as the Group's and adjusted to align their accounting policies with the Group's.

At the end of each reporting period, the Group confirms if there is objective evidence indicating any impairment of its investments in associates in accordance with "IAS 28 — Investments in Associates and Joint Ventures". If it is the case, the Group calculates the impairment based on the difference between the recoverable amount and the carrying amount of the associates in accordance with IAS 36 "Impairment of Assets" and recognizes the amount in the profit or loss on the associates. If the value in use of the investment is adopted for the above recoverable amount, the Group determines the relevant values in use based on the estimates below:

- (1) The Group's share of the present value of the estimated future cash flows generated from an associate, including the cash flow generated by the associate due to its operations and the proceeds from the disposal of the investment; or
- (2) The present value of the estimated future cash flows from dividends from the investment that the Group expects to receive and the proceeds from the disposal of the investment.

As the components of goodwill that constitute the carrying amount of an investment in an affiliate are not separately recognized, it is not necessary to apply IAS 36 "Impairment of Assets" regarding the goodwill impairment test.

When the significant influence on an associate is lost, the Group measures and recognizes the retained investment at fair value. When the significant influence is lost, the difference between the carrying amount of the investment in an associate and the fair value of the retained investment, plus the proceeds from the disposal, is recognized in profit or loss. Also, when an investment in an associate becomes an investment in a joint venture, or an investment in a joint venture becomes an investment in an associate, the Group continues to adopt the equity method without re-measuring the retained equity.

## 13. Property, plant and equipment

Property, plant and equipment are accounted for on the basis of acquisition cost and recognized after accumulated depreciation and impairment are deducted. The above costs include the cost of dismantling or removing of property, plant and equipment and restoring the location, and necessary interest expenses arising from unfinished projects. Each component of property, plant and equipment is depreciated separately if it is significant. When a major component of property, plant and equipment needs to be replaced regularly, the Group regards it as an individual asset and recognizes it separately with a specific useful life and a depreciation methods. The carrying amount of the replaced part should be derecognized in accordance with the requirement for derecognition under IAS 16 "Property, Plant and Equipment". If a major examination or repair cost meets the criteria for recognition, it is regarded as a replacement cost and recognized as part of the carrying amount of plant and equipment, while other repair and maintenance expenses are recognized in profit or loss.

Assets below are depreciated on a straight-line basis over the estimated useful lives:

**Buildings** 

Machinery and equipment 1–15 years
Transportation equipment 3–10 years
Office equipment 2–10 years
Leasehold improvements 34 years
Other equipment 3–10 years

After the initial recognition of property, plants and equipment or any important component, if it is disposed of or no economic effect arising from the use or disposal is expected, it will be derecognized and recognized in profit or loss.

The residual value, years of useful life, and depreciation method of property, plants and equipment are assessed at the end of each fiscal year. If the expected value is different from the previous estimate, the change is considered as a change in accounting estimates.

#### 14. Investment property

The Group's self-owned investment property is initially measured at cost, including transaction cost of the property. The carrying amount of investment property includes the cost of repairing or adding to the existing investment property under the condition that the cost can be recognized; however, the repair or maintenance costs that usually occur on a daily basis are not included as part of the cost. After initial recognition, except for those meeting the criteria for being classified as those held for sale (or included in the disposal group classified as held for sale) in accordance with IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations"; As per IAS 16 "Property, Plant and Equipment" regarding such a situation, if such an asset is held by the lessee as a right-of-use asset and is not held for sale as per IFRS 5, it is handled in accordance with IFRS 16.

Assets below are depreciated on a straight-line basis over the estimated useful lives:

Buildings 5–30 years

Investment property is derecognized and recognized in profit or loss when it is disposed of or will never be used again without future economic benefits expected to be generated from the disposal.

The Group decides to transfer an asset in or out of investment property depending on the actual use of the assets.

When a property meets or no longer meets the definition of investment property with

evidence showing that the purpose has changed, the Group will reclassify the property as investment property or transfer it out of investment property.

# 15. Leasing

The Group assesses whether or not an arrangement is (or includes) a lease arrangement on the inception of the agreement. If an agreement transfers control over the use of an identified asset for a period of time in exchange for consideration, the agreement is (or includes) a lease arrangement. In order to assess whether the agreement transfers control over the use of the identified asset for a period of time, the Group assesses whether it meets both of the following conditions during the entire period of use:

- (1) Obtaining the right to almost all economic benefits from the use of the identified asset; and
- (2) The right to direct the use of the identified asset.

For the agreement that belongs to (or includes) a lease arrangement, the Group treats each lease component in the agreement as a separate lease and treats it separately from the non-lease component in the agreement. For the agreement that includes one lease component and one or more additional lease or non-lease components, the Group adopts the relative standalone price of each lease component and the aggregate standalone prices of the non-lease components as the basis to distribute the consideration in the agreement to the lease component. The relative standalone prices of lease and non-lease components are determined on the basis of the prices charged by the lessor (or similar suppliers) for the components (or similar components). If an observable standalone price is not readily available, the Group maximizes the use of observable information to estimate the standalone price.

#### The Group as a lessee

In addition to meeting and selecting short-term leases or leases of low-value underlying assets, when the Group is the lessee of a lease contract, all leases are recognized in right-of-use assets and lease liabilities.

The Group measures the lease liabilities on the inception date based on the present value of the lease payments not yet paid on that date. If the implied interest rate of the lease is easily determined, the lease payments will be discounted to their present value using that interest rate. If such interest rate is not easily determined, the incremental borrowing rate will be used. On the inception date, the lease payments included in the lease liabilities include the following payments related to the right to use the underlying assets during the lease period

and not yet paid on that date:

- (1) Fixed payment (including substantive fixed payment) less any lease incentives that can be collected:
- (2) Lease payment that depends on changes in an index or rate (using the index or rate on the inception date for initial measurement);
- (3) The amount expected to be paid by the lessee under the residual value guarantee;
- (4) If the Group can reasonably determine the exercise price of call option, it will exercise the option; and
- (5) The penalty payable for the termination of a lease, if there is sign that the lessee, in the lease period, will exercise the option of terminating the lease.

After the inception date, the Group measures the lease liabilities at amortized cost, and increases the carrying amount of the lease liabilities using the effective interest method to reflect the interest on the lease liabilities; the lease payments reduce the carrying amount of the lease liabilities.

On the inception date, the Group measures the right-of-use assets at cost. The cost of the right-of-use assets includes:

- (1) The monetary amount of the lease liability initially measured;
- (2) Any lease payments made on or before the inception date less any lease incentives received;
- (3) Any initial direct costs incurred by the lessee; and
- (4) An estimate of costs to be incurred in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

Subsequent measurement of the right-of-use assets is presented after the cost less the accumulated depreciation and accumulated impairment loss, i.e. the cost model is applied to measure the right-of-use assets.

If the ownership of the underlying asset is transferred to the Group when the lease period expires, or if the cost of the right-of-use assets reflects that the Group will exercise the call option, the right-of-use assets will be depreciated from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Group depreciates the right-of-use assets from the inception date to the end of the useful life of the right-of-use assets or to the expiration of the lease period, whichever is earlier.

The Group applies IAS 36 Impairment of Assets to determine whether a right-of-use asset is impaired and to deal with any identified impairment losses.

In addition to meeting and selecting short-term leases or leases of low-value underlying assets, the Group presents right-of-use assets and lease liabilities in the balance sheet, and presents lease-related depreciation expenses and interest expenses separately in the statement of comprehensive income.

For short-term leases and leases of low-value underlying assets, the Group chooses to adopt the straight-line basis or another systematic basis to recognize the lease payments related to said leases in expenses over the lease term.

#### The Group as a lessor

The Group classifies each of its leases as operating leases or financial leases on the contract inception date. If a lease transfers almost all the risks and rewards attached to the ownership of the underlying asset, it is classified as a financial lease; if it does not transfer said matters, it is classified as an operating lease. On the inception date, the Group recognizes the assets held under the finance leases in the balance sheet and presents them as financial lease receivables based on the net lease investment.

For agreements that include lease components and non-lease components, the Group applies IFRS 15 to distribute the consideration in the agreements.

The Group recognizes lease payments from operating leases as rental income on a straightline basis or another systematic basis. For operating leases, lease payments that are not dependent on change in some index or rate are recognized as rental income when they occur.

## 16. Impairment of non-financial assets

The Group at the end of each reporting period assesses whether all assets subject to IAS 36 "Impairment of Assets" are showing signs of impairment. If there is any indication of impairment or an impairment test is required for an asset on a regular basis each year, the Group tests the individual asset or the cash-generating unit to which the asset belongs. If the carrying amount of an asset or the cash-generating unit to which the asset belongs is greater than the recoverable amount in an impairment test, the impairment loss is recognized. The recoverable amount is the higher of the net fair value or value in use.

At the end of each reporting period, the Group assesses assets other than goodwill to see whether there are indications that the previously recognized impairment losses may no longer exist or may be decreased. In the event of such an indication, the Group estimates the recoverable amount of the asset or cash-generating unit. If the recoverable amount is increased due to the change in the estimated service potential of the asset, the impairment amount is reversed.

However, the reversed carrying amount shall not exceed that before recognizing impairment loss and after deducting depreciation or amortization.

The impairment loss and reversal amount of the continuing operations are recognized in profit or loss.

# 17. Revenue recognition

The Group's revenue from customer contracts mainly includes the sales of goods and provision of services. The accounting treatments are specified below:

#### Merchandise sales

The Group manufactures and sells merchandise and recognizes revenue when the promised merchandise are delivered to a client and the customer client the control over it (i.e., the client's ability to guide the use of the merchandise and obtain almost all the remaining benefits of the merchandise). Its main products are precious metals, and the sales are recognized in revenue at the prices stated in the contracts.

The credit period of the Group's merchandise sold is T/T-120 days. Most contracts are recognized as accounts receivable when the control of the merchandise is transferred with an unconditional right to receive consideration. These accounts receivable are usually short-term and do not contain significant financial components. A small number of contracts, for which the merchandise has been transferred to a client but the Group has not had the right to unconditionally receive the consideration, are recognized as contract assets. Meanwhile, contract assets should be measured as an allowance for lifetime expected credit losses in accordance with IFRS 9.

# Provision of services

The Group mainly provides cleaning and processing services. Such services are individually priced or negotiated and are provided on the basis of the contract period. As the Group provides cleaning and processing services during the contract period, a client will obtain the benefits from such services during the contract period, which is a performance obligation to be satisfied at a certain point in time. Thus, the provision of services is recognized as revenue at one go once it is completed.

Most of the Group's agreed payments per contract are collected in a lump sum during the contract period after the cleaning and processing services are provided. When the services has been transferred to a client but the Group has not had the right to unconditionally receive the consideration, it is recognized as a contract asset. However, regarding some contracts, as part of the consideration is collected from the clients at the time of signing contracts, the Group assumes the obligation to provide services in the future; thus, such contracts are recognized as contract liabilities.

The period during which the Group's above contractual liabilities are transferred to revenue usually does not exceed one year and does not result in significant financial components.

#### 18. Borrowing costs

Borrowing costs that can be directly attributable to the acquisition, construction, or production of qualified assets are capitalized as part of the costs of the assets. All other borrowing costs are recognized as expenses in the period in which they are incurred. Borrowing costs include interest and other costs incurred in relation to borrowings.

#### 19. Government grants

The Group recognizes an amount in government grants when it is reasonably sure that it will meet the conditions set by the government for such grants and can receive the inflow of economic benefits from the government grants. When a grant is related to assets, the government grants are recognized in deferred income and recognized in income in installments over the estimated useful lives of the relevant assets. When a government grant is related to an expense, the grant is recognized in income in a reasonable and systematic manner for a period in which relevant costs are expected to be incurred.

When the Group receives a non-monetary government grant, the asset and grant received are recognized at the nominal amount, and the income is recognized in the statement of comprehensive income in equal installments over the estimated useful lives of the underlying assets based on the benefit consumption pattern. The loans with interest rates lower than the market level or similar supports obtained from the government or relevant institutions are regarded as additional government grants.

## 20. Post-employment benefit plans

The pension plan for the Company and domestic subsidiaries' employees applies to all full-time employees. The employee pension fund is fully contributed to the Labor Pension Reserves Committee and deposited in the pension fund account. The aforementioned pension is deposited in the name of the Labor Pension Reserves Committee, which is completely separated from the Group, so it is not included in the consolidated financial statements in the preceding paragraph. The pension plans for employees at overseas subsidiaries and branches are handled in accordance with local laws and regulations.

For the defined contribution pension plan, the monthly pension payable rate of the Company and domestic subsidiaries shall not be less than 6% of the employees' monthly salary, and the amount of the provision shall be recognized as current expenses; overseas subsidiaries and branches make contributions at specified local rates and recognize them as current expenses.

The post-employment benefit plan that is a defined benefit plan is accounted for using the projected unit benefit method based on an actuarial report on the end date of the annual reporting period. The remeasurement of the net defined benefit liabilities (assets) includes any movements in the return on the plan asset and the effects of asset cap, less the amount of net interest included in the net defined benefit liabilities (assets) and actuarial gains and losses. The net defined benefit liability (asset) remeasurement is included in other comprehensive income when incurred and immediately recognized in the retained earnings. Past service cost, which is the change in the present value of the defined benefit obligation,

results from a plan amendment or curtailment and is recognized as an expense at the earlier of the following dates:

- (1) When a plan amendment or curtailment occurs; or
- (2) When the Group recognizes relevant restructuring costs or termination benefits.

The net interest on the net defined benefit liability (asset) is determined with the net defined benefit liability (asset) multiplied by the discount rate, both determined at the beginning of the annual reporting period, and based on any changes in net defined benefit liability (asset) due to contributions and benefit payments during the period.

#### 21. Income taxes

Income tax expenses (income) refer to the sum related to current income tax and deferred tax included in the current profit or loss.

#### Current income tax

The current income tax liabilities (assets) related to this and the prior periods are measured at the legislated or substantially legislated tax rates and tax laws at the end of the reporting period. The current income tax related to the items recognized in other comprehensive income or directly recognized in the equity is recognized in other comprehensive income or equity instead of being recognized in the profit or loss.

A surtax of the profit-seeking enterprise income tax levied on the undistributed earnings is recognized as income tax expense on the date when the distribution of earnings is resolved in the shareholders' meeting.

# Deferred tax

The deferred tax is calculated according to the temporary difference between the taxable amount of assets and liabilities and the carrying amount on the balance sheet at the end of the reporting period.

All taxable temporary differences are recognized as deferred tax liabilities except for the following two items:

(1) The initial recognition of goodwill, or the initial recognition of an asset or liability that does not arise from a business combination and does not affect accounting profits and

taxable income (loss) at the time of the transaction conducted;

(2) The taxable temporary difference arising from the investment in subsidiaries, associates, and joint ventures. Also, the timing of reversal is controllable, and it is not likely to be reversed in the foreseeable future;

Except for the following two items, deductible temporary difference and deferred tax assets arising from the taxable losses and income tax credit are recognized within the range of probable future taxable income:

- (1)It is related to the deductible temporary difference from the initial recognition of an asset or liability that does not arise from a business combination and does not affect accounting profits and taxable income (loss) at the time of the transaction conducted;
- (2)It is related to the deductible temporary differences arising from the investment in subsidiaries, associates, and interests in joint ventures. It is recognized within the range of probable reversal in the foreseeable future and there is sufficient taxable income at the time the temporary difference occurred.

Deferred tax assets and liabilities are measured at the tax rate of the expected asset realization or in the period in which the liability is settled. The tax rate is based on the legislated or substantially legislated tax rates and tax laws at the end of the reporting period. The measurement of deferred tax assets and liabilities reflects the tax consequences arising from the manner in which the asset is expected to be recovered or the book value of the liability is settled at the end of the reporting period. If the deferred tax is related to items that are not included in the profit or loss, it will not be recognized in profit or loss, but recognized in other comprehensive income according to the relevant transactions or directly recognized in equity. Deferred tax assets are reexamined and recognized at the end of each reporting period.

Deferred tax assets and liabilities can be legally offset against each other only in the current period, and the deferred tax is related to the same taxation entity and is related to the income tax levied by the same taxation authority.

# V. <u>Significant Accounting Assumptions and Judgment, And Major Sources ff Estimation</u> Uncertainty

When the consolidated financial statements are prepared by the Group, the management must make judgments, estimates, and assumptions at the end of the reporting period, which will affect the disclosures of income, expenses, assets, and liabilities, and contingent liabilities. However, the uncertainty of these significant assumptions and estimates may result in a significant adjustment to the book value of an asset or liability in the future period.

# 1. Estimation and assumption

The main source of information on the estimation and assumption with uncertainty at the end of the reporting period has significant risks that result in significant adjustments to the carrying amounts of assets and liabilities in the next fiscal year. The explanations are given as follows:

#### (1) Fair values of financial instruments

When the fair values of financial assets and financial liabilities recognized in the balance sheet cannot be obtained from the active market, the fair value will be determined using evaluation techniques, including the income approach (such as, cash flow discount model) or market approach. The changes in the assumptions of the said approaches will affect the fair value of the financial instruments reported. Please refer to Note 12 for details.

# (2) Valuation of inventories

The net realizable value is calculated based on the estimated selling price, less the costs and selling expenses required until the completion in the ordinary course of business. Such estimates are based on the market conditions and historical sales experience of similar products, and changes in the market conditions may significantly influence the results of such estimates.

#### (3) Post-employment benefit plan

The defined benefit cost and the present value of the defined benefit obligations to the postemployment benefit plan depend on the actuarial valuation results. Actuarial valuation involves various assumptions, including discount rate and changes in expected salary increase/decrease. Please refer to Note 6 for the details of the assumptions used to measure the defined benefit costs and defined benefit obligations.

# (4) Income taxes

The uncertainty of income tax exists in the interpretation of complex tax regulations and the amount and timing of future taxable income. Due to a wide range of international business relationships and the long-term and complexity of contracts, the differences between actual results and assumptions made, or changes in such assumptions in the future, may cause the booked income tax income and expenses to be adjusted in the future. The recognition of income tax is a reasonable estimation made according to the possible audit results of the local tax authorities of the countries in which the Group operates. The amount recognized is based on different factors, such as previous tax audit experience and the difference in tax law interpretation between the tax entity and the tax authority. The difference in interpretation may result in a variety of issues due to the local situation of the country where an individual enterprise of the Group operates.

The carryforwards of the taxable loss and income tax credit and deductible temporary differences are recognized as deferred tax assets within the range of probable future taxable income or taxable temporary differences. The amount of the deferred income tax assets to be recognized is estimated according to the possible timing and level of the future taxable income and taxable temporary difference, as well as the future tax planning strategy. Please refer to Note for the Group's unrecognized deferred tax assets as of December 31, 2022.

# VI. <u>Description of significant account titles</u>

#### 1. Cash and cash equivalents

|                              | 2022.12.31 | 2021.12.31 |
|------------------------------|------------|------------|
| Cash on hand and petty cash  | \$119      | \$77       |
| Checking and demand deposits | 177,178    | 127,827    |
| Time deposits                | 8,500      | 8,500      |
| Total                        | \$185,797  | \$136,404  |

#### 2. Financial assets at fair value through profit or loss

The Group engages in the trading of derivative financial instruments, including options and futures contracts, for its precious metal inventories to get prepared for price changes in product sales but does not designate them as a hedging tool.

Details as of December 31, 2022 and 2021 are as follows:

| 2022          | 2.12.31         | 2021.            | 12.31           |
|---------------|-----------------|------------------|-----------------|
| Nominal       |                 | Nominal          |                 |

# (I) Futures

- (1) The amount recognized as current unrealized gain or loss on the financial assets due to the changes in fair values of the futures contracts signed with the futures merchants is NT\$0 for both periods ended December 31, 2022 and 2021 and the recognized current realized gains or losses on the financial assets were NT\$0 and NT\$(5,705) thousand for the two periods, respectively.
- (2) The balances of margins in the futures accounts operated by the Group were NT\$0 and the balances of excess margin were NT\$0 as of both December 31, 2022 and 2021.
- (3) The Group's financial assets at fair value through profit or loss were not provided as collateral.
- 3. Financial assets at fair value through other comprehensive income

|  | 2022.12.31 | 2021.12.31 |
|--|------------|------------|
| Investments in equity instruments measured |            |            |
| at fair value through other comprehensive  |            |            |
| income - Non-current:                      | \$9,333    | \$3,333    |
| Unlisted stocks                            |            |            |

The Group's financial assets at fair value through other comprehensive income were not provided as collateral.

#### 4. Financial assets at amortized cost

|                          | 2022.12.31 | 2021.12.31 |
|--------------------------|------------|------------|
| Restricted cash in banks | \$87,902   | \$86,274   |
|                          |            |            |
| Current                  | \$87,314   | \$86,274   |
| Non-current              | \$588      | \$-        |

Please refer to Note 8 for the details of collateral provided by the Group for financial assets at amortized cost.

#### 5. Notes receivable

|  | 2022.12.31 | 2021.12.31 |
|--|------------|------------|
| Notes receivable arising from operations | \$-        | \$1,262    |
| Less: Allowance for losses               |            |            |
| Total                                    | <b>\$-</b> | \$1,262    |

The Group did not provide notes receivable as collateral.

The Group evaluated impairment losses in accordance with IFRS 9. See Note 6.21 for information on allowances for losses and Note 12 for information on credit risks.

# 6. Accounts receivable, net

The details of accounts receivable, net, are as follows:

|                            | 2022.12.31 | 2021.12.31 |
|----------------------------|------------|------------|
| Accounts receivable        | \$29,907   | \$29,824   |
| Less: Allowance for losses |            |            |
| Total                      | \$29,907   | \$29,824   |

The Group did not provide accounts receivable as collateral.

The Group's credit period for clients is usually T/T to 120 days after the end of a month. The total carrying amounts as of December 31, 2022 and 2021 were NT\$29,907 thousand and NT\$29,824 thousand, respectively. Please refer to Note 6.21 for the information on an

allowance for losses and Note 12 for the information on credit risks for the years ended December 31, 2022 and 2021.

#### 7. Inventories

(1) The details of inventories are as follows:

|                  | 2022.12.31 | 2021.12.31 |
|------------------|------------|------------|
| Raw materials    | \$157,877  | \$139,105  |
| Work in progress | 236,331    | 236,932    |
| Finished goods   | 53,158     | 97,124     |
| Total            | \$447,366  | \$473,161  |

(2) Inventory costs recognized as expenses for 2022 and 2021 by the Group were NT\$1,160,569 thousand and NT\$1,474,047 thousand, respectively, including NT\$(1,016) thousand and NT\$(4,650) thousand for gains on inventory value recovery.

Due to factors, such as fluctuations in international prices of precious metals, the Group's net realizable values of inventories recovered, thus leading to gains on inventory value recovery in 2022 and 2021.

(3) The above inventories were not provided as collateral.

# 8. Investments using the equity method

The details of the Group's investments using the equity method are as follows:

|                           | 2022.    | 2022.12.31 |        | .12.31     |
|---------------------------|----------|------------|--------|------------|
|                           |          | Shareholdi |        | Shareholdi |
| Investee                  | amount   | ng         | amount | ng         |
| Investment in associates: |          |            |        |            |
| Pau Hz Energy Corp.       | \$14,684 | 30.00%     | N/A    | N/A        |

(1) Chang Pwu Industrial Co., Ltd., a subsidiary of the Company, was approved by the board of directors on January 5, 2022 to establish a joint venture, Pau Hz Energy Corp.,

with Pau Energy Storage Corp. with an investment of NT\$15,000 thousand and acquired 30% equity in the joint venture on May 18, 2022.

The Group's investment in Pau Energy Storage Corp. is not material to the Group. The aggregate carrying amount of the Group's investment in Pau Hz Energy Corp. on December 31, 2022 was NT\$14,684 thousand.

(2) The above investment in the associate does not contain contingent liabilities or capital commitments, nor provided as collateral as of December 31, 2022.

# 9. Property, plant and equipment

# (1) Property, plant and equipment for self-use

|                           |           |             | Machinery<br>and | Office      | Transporta<br>tion | Other      | Leasehold | Unfinished construction work and equipment to |             |

| Unearned revenue related to assets |            | \$0.602    |
| - non-current                      | \$9,485    | \$9,692    |
| •                                  |            |            |

(2) To facilitate the development of the environmental protection industry, the Taoyuan City Government has signed the Taoyuan Environmental Science and Technology Park Subsidy contract with the Company and a subsidiary. After the Company and the subsidiary has acquired the land, the entity will provide the Company and the subsidiary with the first installments of the subsidy of NT\$10,354 thousand and NT\$322 thousand, respectively, to facilitate the industry development. The amounts were recognized as long-term unearned revenue, and after the construction of the plant is completed, the amounts will be recognized as government grants in installments over the useful life of the plant.

# 17. Long-term borrowings

The details of the Group's long-term borrowings as of December 31, 2022 and 2021 are as follows:

| Creditor       | Nature of borrowings | Due year   | Interest rate (%)      | Amount of borrowings 2022.12.31 | Repayment<br>method |

Note 1: The loan will be disbursed in installments within one year after the borrowing date with a grace period of two years. During the grace period, the interest will be accrued and collected on a monthly basis. After the end of the grace period, the principal will be amortized per month in 156 installments, and the interest will still be accrued and collected per month.

Note 2: After the contract is signed, the term is three years. The bank will check if the Company's financial ratios meet the standard per quarter as the basis for renewal of the contract. The interest is paid monthly, and the principal will be settled in one lump sum once the loan is due.

Note 3: After the contract is signed, the term is seven years, and the interest is paid monthly, and the principal is amortized in 180 installments.

The Company used partial land, buildings, and other equipment as the first mortgage to secure the loans from the Bank of Taiwan, Taishin International Bank, and Bank SinoPac. See Note 8 for details of the collateral.

## 18. Post-employment benefit plan

#### Defined contribution plan

The Company and domestic subsidiaries' employee retirement plan stipulated in accordance with the Labor Pension Act is a defined contribution plan. According to the Act, the Company and domestic subsidiaries' monthly labor pension contribution rate shall not be less than 6% of employees' monthly salary. The Company and domestic subsidiaries makes a monthly contribution equivalent to 6% of the employees' monthly salary to the personal pension account with the Bureau of Labor Insurance.

Subsidiaries in mainland China make a monthly contribution to the pension insurance fund at a certain percentage of the total employee salary to each employee's account managed by relevant government departments in accordance with local government laws and regulations.

The amount of expenses of the defined contribution pension plan recognized by the Group for 2022 and 2021 was NT\$2,154 thousand and NT\$2,005 thousand, respectively.

#### Defined benefit plan

The defined benefit pension regulations established by the Company and domestic subsidiaries in accordance with the provisions of the Labor Standards Act, are a defined benefit plan. The employee pension is calculated based on the number of units granted according to the length of service and the approved monthly average salary at the time of retirement. Two units are granted for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. The Company makes a contribution equal to 2% of the total salaries per month as a pension fund and deposit it in the account in the name of the Labor Pension Funds Supervisory Committee with the Bank of Taiwan. In addition, the Company assess the balance in the aforementioned labor pension

reserve account at the end of per year. If the account balance is insufficient to pay the pension calculated with the aforementioned method to the employees who are expected to qualify for retirement in the following year, the Company will make a contribution to make up for the difference by the end of March of the following year.

The Ministry of Labor allocates the assets accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The investment using the fund is made by its own and by a brokerage and managed actively and passively according to the medium- and long-term investment strategies. Considering market, credit, liquidity, and other risks, the Ministry of Labor has set fund risk limits and control plans to flexibly achieve the target return without the need to take an excessive risk. For the use of this fund, the minimum income from the annual final accounts should not be lower than the income calculated at the local bank's interest rate for two-year time deposits. If there is any shortage, it should be made up by the national treasury after approval by the competent authority. As the Company has no right to participate in the operation and management of the fund, it is unable to disclose the fair values of the plan assets classified in accordance with paragraph 142 of IAS 19. As of December 31, 2022, the Company and domestic subsidiaries plan to contribute NT\$51 thousand to the defined benefit plan for the following year.

Chang Pwu Industrial Co., Ltd.applied to the Taoyuan City Government on September 6, 2022 to settle the fund under the old pension scheme and get back the labor retirement reserve; and received an approval letter from the Department of Labor, Taoyuan City Government, on December 29, 2022, then a letter and a retirement reserve check from the Trust Department, Bank of Taiwan, on January 9, 2023. The income has been recognized under other income in the consolidated statement of comprehensive income.

The table below summarizes the costs of the defined benefit plan recognized in profit or loss:

|                                 | 2022 | 2021  |
|---------------------------------|------|-------|
| Current service cost            | \$20 | \$115 |
| Interest cost                   | 110  | 102   |
| Estimated return on plan assets | (62) | (51)  |
| Total                           | \$68 | \$166 |

The reconciliation of the present value of the defined benefit obligation and the fair value of plan assets is as follows:

|   | 2022.12.31 | 2021.12.31 |
|---|------------|------------|
| Present value of the defined benefit obligation | \$12,419   | \$12,597   |

| Subtotal                          | (288)                        | (556)         | (844)               |
| Pension estimated to be recovered | -                            | 7,127         | 7,127               |
| Employer's contribution           | -                            | (71)          | (71)                |
| Others                            |                              | 7,762         | 7,762               |
| 2022.12.31                        | \$12,419                     | \$-           | \$12,419            |

The main assumptions below are used to determine the Group's defined benefit plan:

|                          | 2022.12.31 | 2021.12.31 |
|--------------------------|------------|------------|
| Discount rate            | 1.48%      | 0.87%      |
| Expected salary increase | 1.00%      | 1.00%      |

Sensitivity analysis for each major actuarial assumption:

|                                   | 202        | 22         | 20         | 21         |
|-----------------------------------|------------|------------|------------|------------|
|                                   | Increase   | Decrease   | Increase   | Decrease   |
|                                   | in defined | in defined | in defined | in defined |
|                                   | benefit    | benefit    | benefit    | benefit    |
|                                   | obligation | obligation | obligation | obligation |
| Increase in discount rate by 0.5% | \$-        | \$(1,052)  | \$-        | \$(1,130)  |
| Decrease in discount rate by 0.5% | 1,154      | -          | 1,247      | -          |
| Expected salary increase by 0.5%  | 1,154      | -          | 1,245      | -          |
| Expected salary decrease by 0.5%  | -          | (1,062)    | -          | (920)      |

The sensitivity analysis above is based on the impact of a single assumption (e.g., discount rate or expected salary) which changed while the other conditions remain unchanged on the defined benefit obligation. As some actuarial assumptions are related to each other, in practice, the fact that only a single actuarial assumption changed is rare, so there are limitations for this analysis.

The methods and assumptions used in the sensitivity analysis for this period are the same as those for the prior period.

# 19. Equity

## (1) Ordinary shares

As of both December 31, 2022 and 2021, the Company's authorized capital was NT\$1,500,000 thousand, and issued share capital amounted to NT\$1,032,082 thousand in 103,208,229 shares, with a par value of NT\$10.

## (2) Capital surplus

|                            | 2022.12.31 | 2021.12.31 |
|----------------------------|------------|------------|
| Additional paid-in capital | \$948,152  | \$948,152  |
| Treasury shares traded     | 10,253     | 10,253     |
| Total                      | \$958,405  | \$958,405  |

As per law, paid-in capital shall not be used for any purpose except for making up for the Company's losses. When the Company has no loss, a certain percentage of the paid-in capital from the stock premium and the gift can be applied to replenish the capital per year. The aforementioned paid-in capital can be allocated in cash to shareholders in proportion to their shareholdings.

#### (3) Earnings distribution and dividend policy

# A. Earnings distribution

According to the Articles of Incorporation, where the Company has net income after tax for a fiscal year, the income shall be first used for paying taxes, offsetting a cumulative deficit, providing 10% of the remaining profit as a legal reserve unless it has reached the total amount of the Company's paid-in capital. The special reserve shall be appropriated or reversed in accordance with the provisions of the Act or the competent authority. The Board of Directors shall prepare a proposal for the surplus distribution of the remaining surplus, together with any undistributed surplus at the beginning of the period, and submit it to the shareholders' meeting for resolution on the distribution of dividends to shareholders.

# B. Dividend policy

The Company's dividend policy is to distribute dividends to shareholders in cash or in shares, with cash dividends being no less than 10% of the total dividends, in accordance with the Company's current and future development plans, taking into account the investment environment, capital requirements and domestic and international competition, as well as the interests of shareholders.

C. As the Company has cumulative losses for 2022 and 2021, there was no earnings distribution proposal made by the Board of Directors s and resolved by the shareholders' meeting.

See Note 6.23 for details of the basis for estimation and recognized amounts of employee remuneration and director remuneration.

## (4) Legal reserve

As per the Company Act, the Company shall provide a legal reserve unless its total amount has reached the amount of the total paid-in capital. The legal reserve may be used to offset a deficit. When the Company has no loss, the portion of the legal reserve that exceeds 25% of the paid-in capital may be used to distribute shares or cash to shareholders in proportion to their shareholdings.

# (5) Special reserve

When distributing the distributable earnings, the Company retroactively sets aside a special reserve for the difference between the balance of the special reserve and the net deduction of other equity items as per law when the IFRS is adopted for the first time. If there is a subsequent reversal of the net deduction of other equity, the special reserve may be reversed for the portion of the net deduction of other equity reversed to distribute earnings.

In accordance with the Letter Jin-Guan-Zheng-Fa-Zi No. 1090150022 issued by the FSC dated March 31, 2021, a special reserve shall be set aside for the unrealized revaluation gains and cumulative translation adjustment (gains), which were reclassified to retained earnings on the conversion date due to the adoption of exemptions under IFRS 1 "First-time Adoption of International Financial Reporting Standards" when IFRS was first adopted. When the Company uses, disposes of, or reclassifies the relevant assets later, it

may reverse the portion of the special reserve in the same percentage to distribute earnings.

# (6) Non-controlling interests

|  | 2022        | 2021        |
|--|-------------|-------------|

The Group's allowance for losses on receivables (including notes and accounts receivable) are measured at the lifetime expected credit losses. The information on the amounts of the allowance for losses estimated as of December 31, 2022 and 2021 is as follows:

Regarding accounts receivable, counterparties' credit ratings, regions, industries, and other factors are considered for classification, and a provision matrix is adopted to measure the allowances for losses; the relevant information is as follows:

#### 2022.12.31

| Not past | Number of days past due |

# 22. Leasing

#### (1) The Group as a lessee

The Group has leased in a number of different assets, including property (land), buildings, and machinery and equipment. The lease term of each contract ranges from three to 50 years. Some of the contracts stipulate that the lessee, without the lessor's consent, shall not lend, sublease, transfer, or use in other disguised methods all or part of the leased property, or transfer the right to lease to another party.

The impact of leasing on the Group's financial position, financial performance, and cash flows is specified below:

### A. Amounts recognized in the balance sheet

# (a) Right-of-use assets

Carrying amount of right-of-use assets

|                         | 2022.12.31 | 2021.12.31 |
|-------------------------|------------|------------|
| Land                    | \$7,471    | \$7,591    |
| Machinery and equipment | 10,644     | -          |
| Buildings               | 5,408      |            |
| Total                   | \$23,523   | \$7,591    |

# (b) Lease liabilities

|                   | 2022.12.31 | 2021.12.31 |  |
|-------------------|------------|------------|--|
| Lease liabilities | \$15,203   | <u> </u>   |  |
|                   |            |            |  |
| Current           | \$5,743    | \$-        |  |
| Non-current       | 9,460      |            |  |
| Total             | \$15,203   | \$-        |  |

### B. Amounts recognized in the statement of comprehensive income

Depreciation of right-of-use assets

|                         | 2022    | 2021  |  |
|-------------------------|---------|-------|--|
| Land                    | \$233   | \$229 |  |
| Machinery and equipment | 1,406   | -     |  |
| Buildings               | 126     | -     |  |
| Total                   | \$1,765 | \$229 |  |

#### C. Lessee's income and expenses related to leasing activities

|                             | 2022    | 2021    |
|-----------------------------|---------|---------|
| Expenses relating to short- |         |         |
| term leases                 | \$2,318 | \$2,193 |

#### D. Lessee's cash outflows from leasing activities

The amounts of the Group's cash outflows from the leasing activities during 2022 and 2021 were NT\$4,913 thousand and NT\$2,193 thousand.

#### (2) The Group as a lessor

Please refer to Note 6.10 for details of the disclosures of the investment property owned by the Group. The investment property owned by the Group is classified as an operating lease as almost all the risks and rewards attached to the ownership of the underlying asset are not transferred.

|                               | 2022     | 2021     |
|-------------------------------|----------|----------|
| Lease income recognized under |          |          |
| operating leases              |          |          |
| Income related to fixed lease |          |          |
| payments                      | \$10,746 | \$10,637 |

The undiscounted lease payments of the operating lease contracts signed by the Group to be received and the total amount for the remaining years as of December 31, 2022 and 2021 are as follows:

|                                      | 2022.12.31 | 2021.12.31 |
|--------------------------------------|------------|------------|
| Less than one year                   | \$9,360    | \$9,360    |
| More than one year but less than two |            |            |
| years                                | 9,734      | 9,360      |
| More than two years but less than    |            |            |
| three years                          | 9,734      | 9,734      |
| More than three years but less than  |            |            |
| four years                           | 9,734      | 9,734      |
| More than four years but less than   |            |            |
| five years                           | 10,124     | 9,734      |
| More than five years                 | 10,968     | 21,092     |
| Total                                | \$59,654   | \$69,014   |

23. Employee benefits, depreciation, depletion, and amortization expenses by function is as follows:

| By function           |           | 2022      |          | 2         | 2021      |          |
|-----------------------|-----------|-----------|----------|-----------|-----------|----------|
|                       | Operating | Operating |          | Operating | Operating |          |

In accordance with the Articles of Incorporation, the Company shall provide 3.6%–8.6% of a profit, if any, as employee remuneration and no greater than 3.6% as directors' remuneration, while the Company shall reserve an amount in advance to offset a cumulative deficit, if any. The above employee remuneration may be distributed in stock or cash, which shall be approved by half of all directors present at a board meeting attended by more than two-thirds of all directors and then reported to the shareholders' meeting. Please visit the Market Observation Post System (MOPS) for information on employee remuneration and directors' remuneration approved by the Board of Directors.

As of December 31, 2022 and 2021, the Company still has a deficit to be compensated, so no employee remuneration and director remuneration were estimated.

#### 24. Non-operating income and expenses

#### (1)Other income

|                       | 2022     | 2021     |
|-----------------------|----------|----------|
| Rental income         | \$12,134 | \$10,636 |
| Interest income       | 1,886    | 595      |
| Dividend income       | 277      | 265      |
| Government grants     | 207      | 208      |
| Other income - others | 2,369    | 2,694    |
| Total                 | \$16,873 | \$14,398 |

(2)Other gains and losses

|  | 2022     | 2021       |

|                                     | during this | s during    |          | Tax benefit | Amount    |
|                                     | period      | this period | Subtotal | (expense)   | after tax |
| Items not reclassified to profit or |             |             |          |             |           |
| loss:                               |             |             |          |             |           |
| Remeasurement of the defined        |             |             |          |             |           |
| benefit plan                        | \$2,720     | \$-         | \$2,720  | \$-         | \$2,720   |
| Items that may be subsequently      |             |             |          |             |           |
| reclassified to profit or loss:     |             |             |          |             |           |
| Exchange differences arising        |             |             |          |             |           |
| from the translation of the         |             |             |          |             |           |
| financial statements of foreign     |             |             |          |             |           |
| operations                          | (1,262)     |             | (1,262)  | 252         | (1,010)   |
| Total other comprehensive income    |             |             |          |             |           |
| for this period                     | \$1,458     | <u>\$-</u>  | \$1,458  | \$252       | \$1,710   |

The main components of income tax expenses (income) are as follows:

# (1) Income tax recognized in profit or loss

|  | 2022  | 2021    |
|--|-------|---------|
| Current income tax expenses (income):  |       |         |
| Income tax payable for this period   | \$-   | \$-     |
| Deferred tax expenses (income):  |       |         |
| Deferred tax expenses (income) related to the  | -     | -       |
| initial temporary differences and reversal of  |       |         |
| temporary differences  |       |         |
| Income tax expenses (income)   | \$-   | \$-     |
| (2) Income tax recognized in other comprehensive incomprehensive incomprehensi | ne    |         |
|  | 2022  | 2021    |
| Exchange differences arising from the translation of   | \$506 | \$(252) |
| the financial statements of foreign operations   |       |         |

(3) The amount of income tax expense and accounting profit multiplied by the applicable income tax rate is adjusted as follows:

|  | 2022       | 2021       |
|--|------------|------------|
| Net income (loss) before tax of the continuing   | \$(98,817) | \$(98,387) |
| operations   |            |            |
| Amounts of taxes calculated at relevant countries' domestic tax rates applicable to income | \$(23,949) | \$(19,671) |
| Income tax effect of non-deductible expenses on tax returns                                | 63         | 1,009      |
| Income tax effect of the tax-free income   | (198)      | -          |
| Income tax effect of deferred tax assets/liabilities                                       | 24,084     | 18,662     |
| Total income tax expense (income) recognized in  | \$-        | \$-        |
| profit or loss   |            |            |

(4) Balances of deferred tax assets (liabilities) related to the following items:

2022

|   | Opening balance | Recognized in profit or loss | Recognized in other comprehensi ve income | Ending balance |
|---|-----------------|------------------------------|---|----------------|
| Temporary difference  |                 |                              | _   |                |
| Overdue payables reclassified to income                     | \$62            | \$-                          | \$-                                       | \$62           |
| Unrealized exchange (gain) loss                             | (18)            | 46                           | -   | 28             |
| Unrealized gain or loss on financial assets                 | 175             | -                            | -   | 175            |
| Investment income or loss                                   | 20,382          | (46)                         | _   | 20,336         |
| Pension   | 727             | -                            | _   | 727            |
| Unused paid leave liability                                 | 710             | _                            | -   | 710            |
| Exchange differences  | (5,247)         |                              |   | (5,753)        |
| arising from the translation of the financial statements of |                 | -                            | (506)                                     |                |
| foreign operations  Deferred tax income  (expenses)         |                 | <b>\$</b> -                  | \$(506)                                   |                |
| Deferred tax assets/liabilities, net                        | \$16,791        |                              |   | \$16,285       |
| Deferred tax assets   | \$22,056        |                              |   | \$22,038       |
| Deferred tax liabilities                                    | \$(5,265)       |                              |   | \$(5,753)      |
| 2021  |                 |                              |   |                |
|   |                 | Recognized                   | Recognized in other                       |                |
|   | Opening balance | in profit or loss            | comprehensi<br>ve income                  | Ending balance |
| Temporary difference  |                 |                              |   |                |
| Overdue payables reclassified to income                     | \$62            | \$-                          | \$-                                       | \$62           |

### (7) Income tax return filings and approval

As of December 31, 2022, the income tax turns filed by the Company and its subsidiaries are as follows:

|  | Income tax return filings |  |
|--|---------------------------|--|
|  | and approval              |  |
| The Company                            | Approved up to 2020       |  |
| Subsidiary - Chang Pwu Industrial Co., | Approved up to 2020       |  |
| Ltd.                                   |                           |  |
| Subsidiary - Ron Pwu Applied Materials | Approved up to 2020       |  |
| Technology Co., Ltd.                   |                           |  |

### 27. Earnings per share

The basic earnings per share is calculated with the net income attributable to the holders of the ordinary shares of the parent company divided by the weighted average number of ordinary share outstanding in the current period.

The diluted earnings per share is calculated by with the net income attributable to the holders of the ordinary shares of the parent company (after being adjusted for the effect of dilution) divided by the weighted average number of ordinary shares outstanding during the year, plus the weighted average number of ordinary shares to be issued when all dilutive potential ordinary shares were converted into ordinary shares.

|  | 2022       | 2021       |
|--|------------|------------|
| (1) Basic earnings per share                                 |            |            |
| Net income (loss) attributable to the holders of ordinary    |            |            |
| shares of the parent company (NT\$ thousand)                 | \$(98,817) | \$(98,383) |

Note: Including cash and cash equivalents, financial assets at amortized cost, notes receivable, accounts receivable and other receivables, and current income tax assets.

#### 2. Financial risk management objectives and policies

The Group's financial risk management objectives are mainly to manage market, credit, and liquidity risks related to operating activities. The Group identifies, measures, and manages the above risks as per the Group's policies and risk preferences.

The Group has established appropriate policies, procedures, and internal control system in accordance with applicable regulations on the above financial risk management; important financial activities should be reviewed by the Board of Directors and the Audit Committee in accordance with applicable regulations and the internal control system. During the implementation of the financial management activities, the Group should comply with the applicable regulations on financial risk management.

#### 3. Market risk

The Group's market risk refers to the risk arising from the fluctuations in the fair values or cash flows of financial instruments due to changes in market prices. Market risk mainly includes exchange rate risk and interest rate risk (such as equity instruments).

In practice, one movement by a single change in risk variables is rare, and changes in risk variables are always interrelated; however, the sensitivity analysis of the following risks did not consider the interaction between relevant risks and variables.

#### Exchange rate risk

The Group's exchange rate risk is mainly related to operating activities (when a currency used for income or expenses is different from the Group's functional currency) and net investment in foreign operations.

The Group's foreign currency receivables and foreign currency payables are partially in the same currency. Thus, there will be a natural hedging effect for a part of the foreign currency position; also, the net investment in foreign operations is a strategic investment, so the Group has not adopted a hedging approach thereto.

The sensitivity analysis of the Group's exchange rate risk is mainly focused on the main foreign currency monetary items on the end date of the financial reporting period and the impact of relevant foreign currency appreciation/depreciation on the Group's profit and loss and equity. The Group's exchange rate risk is mainly affected by fluctuations in the exchange rates of USD and CNY. The sensitivity analysis information is as follows:

When the NTD appreciated/depreciated by 1% against the USD, the Group's profit or loss for the year ended December 31, 2022 and 2021 would have decreased/increased by NT\$657 thousand and NT\$489 thousand, respectively.

When the NTD appreciated/depreciated by 1% against the CNY, the Group's profit or loss for the year ended December 31, 2022 and 2021 would have decreased/increased by NT\$697 thousand and NT\$572 thousand, respectively.

#### Interest rate risk

Interest rate risk refers to the risk of fluctuations in the fair value of financial instruments or future cash flows due to the changes in market interest rates. The Group's interest rate risk is mainly from investments in debt instruments at floating rates as well as borrowings at fixed and floating rates.

The sensitivity analysis of the Group's interest rate risk was mainly focused on investments and borrowings at floating rates at the end date of the financial reporting period. With an assumption that such investments and borrowings are held for one fiscal year, when the interest rate increased/decreased by 0.1%, the Group's profit or loss for 2022 and 2021 would have decreased/increased by NT\$1,144 thousand and NT\$1,117 thousand, respectively.

#### Equity price risk

The fair values of unlisted equity securities held by the Group will be affected by the uncertainty about their future values. The unlisted equity securities held by the Group are included in the category measured at fair value through other comprehensive income. The Group manages the price risk of equity securities by diversifying investments and setting limits for investments in single and overall equity securities. The information on the investment portfolio of equity securities should be regularly provided to the Group's senior management, and the Board of Directors should review and approve all decisions about investments in equity securities.

The fair values of other equity instruments belong to Level 3. Please refer to Note 12.8 for the sensitivity analysis information.

#### 4. Credit risk management

Credit risk refers to the risk of financial loss arising from the default by counterparties on contract obligations. The Group's credit risk is derived from its operating activities (mainly from accounts and notes receivables) and financial activities (mainly from bank deposits and various financial instruments).

Each unit of the Group follows the credit risk policy, procedures, and control mechanism to manage credit risk. The credit risk assessment of all transaction counterparties is based on factors, such as each counterparty's financial position, ratings by credit rating agencies, historical trading experience from the past, current economic environment, and the Group's internal rating criteria. The Group also uses certain credit enhancement tools (such as advance sales receipts and insurance) at appropriate times to reduce specific counterparties' credit risk.

As of December 31, 2022 and 2021, the Group's accounts receivable from the top ten clients accounted for 84.34% and 81.32% of the balances of the Group's accounts receivable, respectively. The credit concentration risk for the remaining receivables is relatively insignificant.

The Group's finance department manages the credit risk of bank deposits, fixed-income securities, and other financial instruments in accordance with the Group's policies. The Group's counterparties are determined based on internal control procedures, such as banks with good credit ratings, financial institutions with investment-grade ratings, corporate organizations, and government agencies, so there is no significant credit risk.

The Group adopts the IFRS 9 standard to assess expected credit losses. Except for an allowance for losses on receivables that is estimated at lifetime expected credit losses, for investments in debt instruments that are not measured at fair value through profit or loss and purchased due to a low credit risk, the Group assesses if the credit risk arising from such investments has increased significantly since the initial recognition on each balance sheet date, to determine the method of estimating an allowance for losses and an loss ratio. Also, when the Group believes that a financial asset cannot be reasonably expected to be recovered as per the assessment (e.g., the issuer or the debtor has significant financial difficulties or has gone bankrupt), it will be written off.

# 5. Liquidity risk management

The Group maintains financial flexibility through cash and cash equivalents, bank borrowings, and other relevant contracts. The table below summarizes the maturity of the payments contained in the contracts of the Group's financial liabilities. It is compiled based on the earliest possible date for repayment and its undiscounted cash flow. The amounts listed also include the agreed interest. For the interest cash flow paid at floating interest rates, the undiscounted amount of interest is derived from the yield curve at the end of the reporting period.

#### Non-derivative financial liabilities

|                   | Less than 1 | 5 years or |           |           |             |

#### 7. Fair values of financial instruments

(1) Valuation techniques and assumptions adopted to measure the fair values

Fair value is the price that can be received from a sale of an asset or paid to transfer a liability in an orderly transaction between market participants. The methods and assumptions adopted by the Group to measure or disclose the fair values of its financial assets and financial liabilities are as follows:

- A. The carrying amounts of cash and cash equivalents, receivables, payables, and other current liabilities are reasonable approximations of their fair values, mainly due to the short durations of such instruments.
- B. The fair values of equity instruments not traded in an active market (unlisted companies' stocks) are estimated with a market approach. The fair values are estimated at the prices of the transactions of the same or comparable companies' equity instruments in the market and other relevant information (such as discount for lack of marketability, price-earnings ratios of similar companies' stocks, or price-to-book ratios of similar companies' stocks).
- C. Regarding debt instrument investments without quoted prices in an active market, bank borrowings, and other non-current liabilities, the fair values are determined based on the counterparties' quotes or valuation techniques. The valuation techniques are determined on the basis of discounted cash flow analysis; the assumptions about interest rates and discount rates are made with reference to on similar instruments (such

as the Taipei Exchange's yield curves for reference, the average quotes of Reuters commercial paper interest rates, and credit risks).

- D. As for derivative financial instruments without quoted prices in an active market, if they are non-option derivatives, their fair values are determined based on the counterparties' quotes or the yield curves that apply during the duration of the discounted cash flow analysis; if they are option derivatives, the fair values are determined based on counterparties' quotes, appropriate option pricing models (such as Black-Scholes) or other valuation approaches (such as Monte Carlo Simulation).
- (2) Fair values of financial instruments at amortized cost

Except as stated in the table below, the carrying amounts of the Group's partial financial assets and financial liabilities at amortized cost are reasonable approximations of the fair values thereof.

(3) Information on the financial instrument fair value hierarchy

See Note 12.8 for information on the Group's financial instrument fair value hierarchy.

#### 8. Fair value hierarchy

#### (1) Definitions of fair value levels

All assets and liabilities measured or disclosed at fair value are the lowest level inputs, which are important to the overall fair value measurement, classified to the fair value levels to which they belong. The input at each level is as follows:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities on the measurement date.

- Level 2: Inputs, other than quoted market prices within Level 1 that are observable, either directly or indirectly, for assets or liabilities.
- Level 3: The unobservable input value of an asset or liability.

For assets and liabilities that are recognized in the financial statements on a repetitive basis, the classification is reevaluated at the end of each reporting period to determine whether there is a transfer between the fair value levels.

### (2) Information on hierarchy of fair value measurement

The Group does not have assets measured at fair value on a non-recurring basis. The information on the fair value levels of assets and liabilities on a recurring basis is shown below:

#### December 31, 2022:

|                                | Level 1 | Level 2 | Level 3 | Total   |
|--------------------------------|---------|---------|---------|---------|
| Assets at fair value:          |         |         |         |         |
| Financial assets at fair value |         |         |         |         |
| through other comprehensive    |         |         |         |         |
| income                         |         |         |         |         |
| Stocks                         | \$-     | \$-     | \$9,333 | \$9,333 |

#### December 31, 2021:

|                                | Level 1 | Level 2 | Level 3 | Total   |
|--------------------------------|---------|---------|---------|---------|
| Assets at fair value:          |         |         |         |         |
| Financial assets at fair value |         |         |         |         |
| through other comprehensive    |         |         |         |         |
| income                         |         |         |         |         |
| Stocks                         | \$-     | \$-     | \$3,333 | \$3,333 |

#### Transfer between Level 1 and Level 2 fair values

The Group's assets and liabilities measured at fair value on a recurring basis during 2022 and 2021 were not transferred between Level 1 and Level 2.

#### Details of movements at Level 3 fair value on a recurring basis

If the Group's assets and liabilities measured at fair value on a recurring basis that belong to Level 3 fair value during the years ended December 31, 2022 and 2021, the reconciliation

of the opening and ending balances is listed as follows:

|                      | Assets                         |
|----------------------|--------------------------------|
|                      | Measured at fair value through |
|                      | other comprehensive income     |
|                      | Stocks                         |
| January 1, 2022      | \$3,333                        |
| Acquired during 2022 | 6,000                          |
| December 31, 2022    | \$9,333                        |
|                      |                                |
|                      | Assets                         |
|                      | Measured at fair value through |
|                      | other comprehensive income     |
|                      | Stocks                         |
| January 1, 2021      | \$3,333                        |
| December 31, 2021    | \$3,333                        |

# Significant unobservable Level 3 fair value inputs

Regarding the Group's assets at Level 3 fair value on a recurring basis, the significant unobservable inputs at fair value are as follows:

December 31, 2022:

|            |              |              |                | Sensitivity analysis |
|------------|--------------|--------------|----------------|----------------------|

# Valuation process for Level 3 fair value

The Group's finance department is responsible for fair value verification, using data from independent sources to bring the valuation results closer to the market, confirming that the sources of the data are independent, reliable, consistent with other resources and represent executable prices, while analyzing the changes in the value of assets and liabilities that must be remeasured or re-valuated in accordance with the Group's accounting policies at each balance date, to ensure that the valuation results are reasonable.

(3) Information on those not measured at fair value but need to be disclosed

December 31, 2022:

Note 1: A company was established through an investment in a third region to invest in companies in China.

Note 2: The foreign currency amounts are translated into NTD at the exchange rates prevailing on the balance sheet date.

# Notes to Consolidated Financial Statements of Super Dragon Technology Co., Ltd. and Its Subsidiaries (Amounts in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

Note 3: Investment income or losses is recognized in the financial statements audited and certified by CPAs.

Note 4: The above amounts related to Jialong Environmental Protection Technology (Suzhou) Limited Company have been written off when the consolidated financial statements were prepared.

- 2. Amount of purchases and percentage and ending balance of payables: None.
- 3. Amount of sales amount and percentage and ending balance of receivables: None.
- 4. Amount of property transactions and the resulting gains and losses: None.
- 5. Note endorsement and guarantee or ending balance and purpose of guarantees: None.
- 6. Highest balance of loans, ending balance, interest rate range, and total interest for this period: None.
- 7. Other transactions with a significant impact on the current profit or loss or financial position, such as the provision or receipt of services: None.

### (IV) Information on Major Shareholders:

|                           | Shares | Number of shares |              |
|---------------------------|--------|------------------|--------------|
| Name of major shareholder |        | held             | Shareholding |
| Yao-Hsun Wu               |        | 29,856,515       | 28.92%       |
| Wistron Corporation       |        | 5,676,005        | 5.49%        |
| Chun-Yao Lin              |        | 5,525,000        | 5.35%        |

#### XIV. Segment Information

1. The Group's revenue mainly comes from the manufacturing and trading of precious metals. The Group's chief operating decision maker reviews the Company's operating performance to make decisions on its resources and evaluates its overall performance, so it is a single operating segment, and it is prepared on the same basis as the summary of important accounting policies mentioned in Note 4.

### 2. Information by region

#### Revenue from external clients:

|        | 2022        | 2021        |
|--------|-------------|-------------|
| Taiwan | \$559,319   | \$669,615   |
| China  | 602,589     | 814,633     |
| Total  | \$1,161,908 | \$1,484,248 |

Revenue is classified by the country where each client operates business.

#### Non-current assets:

|                  | 2022.12.31  | 2021.12.31  |
|------------------|-------------|-------------|
| rtization Taiwan | \$1,989,022 | \$1,997,531 |
| China            | 66,174      | 63,648      |
| Total            | \$2,055,196 | \$2,061,179 |

# Information on important clients:

The external clients who accounted for 10% or more of Company' and its subsidiaries' sales revenue are as follows:

| Name of client | 2022      | 2021      |
|----------------|-----------|-----------|
| Client A       | \$565,104 | \$739,898 |
| Client B       | 155,087   | 172,297   |
| Client C       | 111,001   | (Note)    |
|                | \$831,192 | \$912,195 |

Note: The net sales to client A did not exceed 10% of the Group's net operating revenue in 2022, so it will not be disclosed.

- Note 1: No. column is filled out in a way as follows:
  - 1. The issuer should be coded "0".
  - 2. The investees are coded sequentially beginning from "1" one by one.
- Note 2: Accounts receivable from affiliates, accounts receivable from related parties, transactions with shareholders, prepayments, and temporary debits, shall be entered if they belong to loans to others.
- Note 3: The nature of loans to others is filled out in a way as follows:
  - 1. Where there are business dealings, please enter 1.
  - 2. Where there is a need for a short-term loan, please enter 2.
- Note 4: The maximum balance of loans to others throughout the year.
- Note 5: The maximum loan to each entity and the total maximum loans as stipulated in the operating procedures for loans others shall be entered; the method of calculating loans to individual entities and the total maximum loans shall be indicated in the Remarks column.

# Notes to Consolidated Financial Statements of Super Dragon Technology Co., Ltd. and Its Subsidiaries (Amounts in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

Note 6: If the publicly listed company puts each loan to others to the Board of Directors for resolution as per Article 14, paragraph 1 of the Regulations Governing Loaning of Funds and Making of Endorsements/Guarantees by Public Companies, even if the loan is not yet disbursed, the company shall include the amount as resolved in the balance to be announced, to disclose the risks it bears; however, if the loan is repaid later, the balance after repayment shall be disclosed to reflect the adjustment to the risks assumed. If the publicly listed company delegates its chairman to disburse a loan in installments within a certain amount or use them in a revolving manner over a period of one year by the resolution of the board of directors in accordance with Article 14, paragraph 2 of the Regulations Governing Loaning of Funds and Making of Endorsements/Guarantees by Public Companies, the amount of the loan approved by the board of directors shall still be included the balance to be announced and reported. Although repayments will be made later, as funds may be disbursed again, the amount of the loan approved by the board of directors shall still be adopted as the balance to be announced and reported.

Note 1: No. column is filled out in a way as follows:

- 1. The issuer should be coded "0".
- 2. The investees are coded sequentially beginning from "1" one by one.

Note 2: There are seven types of relations between the endorser/guarantor and the endorsed/guaranteed party as follows; just indicate the code:

- 1. Companies with business dealings.
- 2. A company in which the Company directly or indirectly holds more than 50% of the voting shares.
- 3. A company directly or indirectly holds more than 50% of the voting shares in the Company.
- 4. A company in which the Company directly or indirectly holds 90% or more of the voting shares.
- 5. Companies that need to purchase insurance for each other in the same industry or as co-builders in accordance with contractual provisions based on the needs for contracting construction projects.
- 6. A company that is endorsed and guaranteed by all shareholders of the Company in proportion to their shareholdings due to a joint investment

relationship.

- 7. The companies that are engaged in joint and several guarantees for the performance of a pre-sale property contract in accordance with the Consumer Protection Act.
- Note 3: As per the Operating Procedures for Endorsements and Guarantees for Others of the subsidiary, Chang Pwu Industrial Co., Ltd., the limit of endorsement/guarantee for the parent company (Super Dragon Technology Co., Ltd.) is 300% of the company's net worth as stated in its latest financial statements. The amount of endorsements/guarantees for a single enterprise other than the parent company shall not exceed 20% of the Company's net worth as stated in the latest financial statements.

#### Independent Auditors' Report

Super Dragon Technology Co., Ltd. is hereby submitted for your review.

#### **Audit opinion**

The Parent Company Only Balance Sheets of Super Dragon Technology Co., Ltd. as of December 31, 2022 and December 31, 2021, and the Parent Company Only Comprehensive Profit and Loss Statement, Parent Company Only Statement of Changes in Equity and Parent Company Only Statement of Cash Flows for the periods from January 1 to December 31, 2022 and January 1 to December 31, 2021, And the Notes to the Parent Company Only Financial Statements (including the summary of significant accounting policies) have been verified by the Accountant.

In the opinion of the Accountant, the above Parent Company Only Financial Statements have been prepared in all material respects in accordance with Financial Reporting Standards for Securities Issuers. It is sufficient to express the Parent Company Only financial position of Super Dragon Technology Co., Ltd. and its subsidiaries as of December 31, 2022 and December 31, 2021, and the financial performance and cash flows of Super Dragon Technology Co., Ltd. from January 1 to December 31, 2022 and January 1 to December 31, 2021.

#### **Basis of Audit Opinion**

The Accountant perform the audit work in accordance with Rules Governing Auditing and Certification of Financial Statements by Certified Public Accountants and Audit Standard. The responsibilities of the Accountant under these standards will be further explained in the section of the accountant's responsibilities for checking the financial statements. In accordance with the professional ethics code of accountants, the staff of the firm to which the Accountant belongs has maintained independence from Super Dragon Technology Co., Ltd., and fulfilled other responsibilities under the code. The Accountant believes that sufficient and appropriate audit evidence has been obtained to form a basis for the audit opinion.

#### **Key audit items**

Key audit items refer to the items that are the most important in the audit of the 2022 Parent Company Only Financial Statements of Super Dragon Technology Co., Ltd. in accordance with the professional judgment of the accountant. Such matters have been taken into account in the audit of

the Parent Company Only Financial Statements as a whole and in the formation of the examination opinion, and the Accountant does not express an opinion on such matters alone.

#### Recognition of revenue

The operating income of Super Dragon Technology Co., Ltd. in 2022 is NT \$1,118,454,000, which is material to the Parent Company Only Financial Statements. Due to the complexity and particularity of the transaction of the environmental protection industry operated by the Company and its sales locations including Taiwan, Hong Kong and other multinational markets, As a result, the time and amount of sales revenue recognition are significantly risky, so the accountant decides to list revenue recognition as its key audit item. The audit procedures of the Accountant include (but are not limited to) understanding various sales models, evaluating the reasonability of accounting policies for revenue recognition related to performance obligations under each model, including reviewing the transaction conditions of the parties, testing the effectiveness of internal controls related to the time point of revenue recognition of performance obligations in the sales cycle, and performing detailed tests on selected samples of sales details, including checking the original orders or sales contracts of major customers and other sales documents, reviewing the transaction conditions and confirming whether the revenue recognition time of each performance obligation is consistent with the performance obligations and satisfaction time set forth in the contract or order, and performing the verification procedures such as sales revenue cut-off test and significant sales return and discount after the review period for a period of time before and after the balance sheet date. The accountant also considers the appropriateness of the disclosure of operating income in Notes 4 and 6 to the Parent Company Only Financial Statements.

#### Valuation of inventories

The net inventory of Super Dragon Technology Co., Ltd. as of December 31, 2022 was NT\$435,979,000, accounting for 15% of the total assets, which is material to the Parent Company Only Financial Statements. As most of the inventories are gold, platinum and silver, in addition to the complex management of asset preservation and the need for close control, these precious metals are vulnerable to frequent and large price changes in the international market, and their inventory storage patterns are also diversified. These factors affect the complexity of the calculation of net realization and involved management personnel's judgement. Therefore, the Accountant has determined that valuation of inventory is a key audit item. The audit procedures of the accountant include (but are not limited to) the execution of the evaluation of the inventory plan of the management level, the selection of major inventory items to test the effective implementation of its internal control and the

confirmation of inventory quantity and status. Select samples to test and evaluate the net realized value estimated by management personnel for valuation of inventory (including the determination of inventory quantity in process), etc. The accountant also considers the appropriateness of the disclosure of inventory in Notes 5 and 6 to the Parent Company Only Financial Statements.

### Responsibilities of management personnel and governance unit for Parent Company Only Financial Statements

It is the responsibility of management to prepare Parent Company Only Financial Statements that are permitted to be expressed in accordance with the Financial Reporting Standards of Securities Issuers and to maintain such internal control as is necessary in connection with the preparation of Parent Company Only Financial Statements to ensure that the Parent Company Only Financial Statements are free from material misrepresentation due to fraud or error.

In preparing the Parent Company Only Financial Statements, management's responsibility also includes evaluating the ability of Super Dragon Technology Co., Ltd. to continue as a going concern, disclosure of related matters, and adoption of a going concern accounting basis, unless management intends to liquidate Super Dragon Technology Co., Ltd. or cease business, or no practicable alternative other than liquidation or suspension of business.

The governance unit of Super Dragon Technology Co., Ltd. should be responsible for supervising the process of financial reporting.

#### Accountant's responsibilities of auditing the Parent Company Only Financial Statements

The purpose of Accountant's audit of the Parent Company Only Financial Statement is to obtain reasonable assurance as to whether the Parent Company Only Financial Statements as a whole certain material misrepresentations due to fraud or error, and to issue a verification report. Reasonable assurance is a high degree of assurance, but there is no guarantee that an audit conducted in accordance with the audit standards will detect a material misrepresentation in the Parent Company Only Financial Statements. Misrepresentation may lead to fraud or error. Misrepresentations of individual amounts or aggregate amounts are considered material if they can reasonably be expected to affect economic decisions made by users of the Parent Company Only Financial Statements.

The Accountant uses professional judgement and professional skepticism when auditing in accordance with Auditing Standards. The Accountant also performs the following duties:

1. Identify and assess the risk of material misrepresentation due to fraud or error in the Parent

Company Only Financial Statements; Design and implement appropriate responses to the risks assessed; And obtain sufficient and appropriate audit evidence to form a basis for the audit opinion. Because fraud may involve collusion, forgery, willful omission, misrepresentation, or overstepping internal controls, the risk of failing to detect material misrepresentation due to fraud is higher than that due to error.

- 2. Obtain the necessary understanding of the internal controls relevant to the audit in order to design audit procedures appropriate for the circumstances, provided that the purpose is not to express an opinion on the effectiveness of the internal controls of Super Dragon Technology Co., Ltd.
- 3. Evaluate the appropriateness of the accounting policies, and the reasonability of accounting estimate and related disclosure which the management personnel adopted.
- 4. According to the obtained audit evidence, conclude the appropriateness of management personnel's adoption of the accounting basis for a going concern, and conclude the events or conditions whether there is a material uncertainty about the ability of Super Dragon Technology Co., Ltd. to continue as a going concern. In the opinion of the Accountant, if there is material uncertainty of the event and condition, I should alert users of the Parent Company Only Financial Statements to the relevant disclosure of Parent Company Only Financial Statements in the audit report or amend the audit opinion if such disclosure is inappropriate. The conclusions of the Accountant is based on the audit evidence available as of audit report date. However, future events or conditions may cause Super Dragon Technology Co., Ltd. to no longer be able to continue as a going concern.
- 5. Evaluate whether the related transaction and events in the overall expression, structure and content of Parent Company Only Financial Statements (including related Notes), and Parent Company Only Financial Statements are expressed appropriately.
- 6. Obtain the adequate and appropriate audit evidence of the parent company only financial information to issue the opinions about the Parent Company Only Financial Statements. The accountant is responsible for the guidance, supervision and execution of group audit cases, and the formation of group audit opinions.

The matters communicated by the accountant with the governing unit include the planned scope and timing of the audit and significant audit findings (including significant lack of internal control identified during the audit).

The accountant also provides the governing unit with a statement that the personnel of the accounting firm subject to the independence code have complied with the Independence Code of Professional Ethics for Accountants, and communicates with the governing body all relationships and other matters (including relevant protective measures) that may be considered to affect the independence of accountants.

Based on the matters communicated with the governance unit, the Accountant decides the key matters for the audit of the 2022 Parent Company Only Financial Statements of Super Dragon Technology Co., Ltd. The Accountant states such matters in the audit report, unless public disclosure of a particular matter is prohibited by statute, or in very rare circumstances, the Accountant decides not to communicate a particular matter in the audit report because it can reasonably be expected that the negative impact of such communication will outweigh the public interest enhanced.

# Super Dragon Technology Co., Ltd. Notes to Parent Company Only Financial Statements (Amounts in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

#### I. Company History

Super Dragon Technology Co., Ltd. (hereinafter referred to as "the Company") was approved to be incorporated and registered on September 25, 1996. The original registered company name was "Super Dragon Engineering Co., Ltd." and then renamed "Super Dragon Technology Co., Ltd." on December 2, 1999. The main business scope includes the collection and treatment of business waste (including general and hazardous) and the trading of copper, lead, zinc, iron, tin, aluminum, gold-plated, silver-plated, and palladium-plated materials, as well as single precious metals (gold, silver, and palladium). The Company's stock has been traded on Taipei Exchange since December 30, 2003 and on Taiwan Stock Exchange since January 21, 2008. Its registered business is located at No.323, Huanke Rd., Datan Vil., Guanyin Dist., Taoyuan City. The main operating sites are located at No. 12, Ronggong South Rd., Caoluo Vil., Guanyin Dist., Taoyuan City and No. 323, Huanke Rd., Datan Vil., Guanyin Dist., Taoyuan City.

#### II. Approval Date and Procedures of the Consolidated Financial Statements

The 2022 and 2021 consolidated financial statements of the Company were released after being approved by the Board of Directors on March 23, 2023.

#### III. Application of New Standards, Amendments and Interpretations

1. Changes in accounting policies due to the initial application of the IFRSs:

The Company has adopted the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations ("IFRSs") that have been endorsed by the FSC and are applicable to the fiscal years beginning on or after January 1, 2022, and the initial application of the newly issued and amended standards and interpretations caused no material impact on the Company.

2. The new or amended IFRSs published by IASB and endorsed by the FSC not yet adopted by the Company:

|     |   | Effective Date   |
|-----|---|------------------|
| No  | Navy Davisad on Amandad Standards and Intermedations    | Announced by the |
| No. | New, Revised or Amended Standards and Interpretations   | IASB             |
| 1   | Amendments to IAS 1 "Disclosure of Accounting Policies" | January 1, 2023  |

| 2 | Amendments to IAS 8 "Definition of Accounting Estimates" | January 1, 2023 |
|---|--|-----------------|
| 3 | Amendments to IAS 12 "Deferred Tax Related to Assets and | January 1, 2023 |
|   | Liabilities Arising from a Single Transaction"           |                 |

(1) Amendments to IAS 1 "Disclosure of Accounting Policies"

The disclosure of accounting policies to provide more useful information to investors and other major users of financial statements was improved in the amendments.

(2) Amendments to IAS 8 "Definition of Accounting Estimates"

Accounting estimates are directly defined, and IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" was further amended to help an enterprise distinguish between changes in accounting policies and changes in accounting estimates.

(3) Amendments to IAS 12 "Deferred Tax Related to Assets and Liabilities Arising from a Single Transaction"

The scope of deferred tax recognition exemption under paragraphs 15 and 24 of IAS 12 "Income Tax" was narrowed so that the exemption does not apply to transactions that result in the same amounts of taxable and deductible temporary differences upon initial recognition.

The Company evaluated the new, revised, and amended standards and interpretations that have been published by the IASB and endorsed by the FSC and are applicable to the fiscal years beginning on or after January 1, 2023 and determined that they did not cause any material impact on the Company.

3. Up to the date the financial statements were approved for release, the new or amended IFRSs published by IASB and endorsed by the FSC and not adopted by the Company:

|  |     |   | Effective Date      |

|   | Leaseback"  |                 |
| 5 | Amendments to IAS 1 "Non-current Liabilities with             | January 1, 2024 |
|   | Covenants"  |                 |

(1) Amendments to IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures" — Sale or Contribution of Assets Between an Investor and its Associate or Joint Venture

The amendments aim to address the inconsistency regarding the loss of control due to the investment in an associate or a joint venture through a subsidiary between IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures". IAS 28 stipulates that when non-monetary assets are invested in exchange for the equity in an associate or a joint venture, the share of the resulting profit or loss shall be eliminated as the treatment method adopted for downstream transactions. IFRS 10 stipulates that the total gain or loss upon loss of control over a subsidiary shall be recognized. The amendments restrict the above requirements of IAS 28: when assets that constitute a business as defined in IFRS 3 are sold or purchased, the total resulting gain or loss shall be recognized.

In the amendments, IFRS 10 was amended so that when an investor sells or invests in a subsidiary (associate or joint venture) that does not constitute a business as defined by IFRS 3, only the profit or loss arising therefrom within the scope not belonging to the investor shall be recognized.

#### (2)IFRS 17 Insurance Contracts

This standard provides a comprehensive model of insurance contracts, including all accounting-related elements (recognition, measurement, presentation, and disclosure

principles). The core of the standard is a regular model. Under this model, during the initial recognition, the group of insurance contracts are measured at the aggregate amount of fulfillment cash flows and contractual service margins. The carrying amount at the end of each reporting period is the sum of the liabilities for the remaining coverage and the liabilities for incurred claims.

In addition to the regular model, it also provides a specific applicable method for contracts with direct participation features (variable fee approach and a simplified method for short-term contracts) (premium allocation approach).

After this standard was published in May 2017, the amendments were published in 2020 and 2021. In these amendments, the effective date in the transitional provisions will be postponed for two years (that is, from January 1, 2021 postponed through January 1, 2023) with additional exemptions provided, while some regulations are simplified to reduce the cost of adopting this standard, and some regulations are amended to make some scenarios easier to interpret. After this standard becomes effective, it will supersede the transitional provisions (i.e. IFRS 4 "Insurance Contracts").

#### (3) Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"

The classification of liabilities as current or non-current in paragraphs 69 to 76 of IAS 1 "Classification of Liabilities as Current or Non-current" was amended.

#### (4) Amendments to IFRS 16 "Lease Liability in a Sale and Leaseback"

The amendments are to improve the consistent application of the standard by adding additional accounting treatment for IFRS 16 "Leases" in the seller and lessee's sales and leaseback.

#### (5) Amendments to IAS 1 "Non-current Liabilities with Covenants"

The amendments are to enhance the information on long-term liability contracts provided enterprises. It clarifies that the contractual agreement to be followed within 12 months after the end of the reporting period does not affect the classification of such liabilities as current or non-current at the end of the reporting period.

The date of applying the above standards or interpretations that have been published by the

IASB but have not yet been endorsed by the FSC shall be subject to the decisions made by the FSC. As per the Company's assessment, the above new or revised standards or interpretations did not impose a significant impact on the Company.

#### IV. Summary of Significant Accounting Policies

#### 1. Statement of compliance

The Company's parent company only financial statements for 2022 and 2021 were prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

#### 2. Basis of preparation

The Company prepared the parent company only financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers. As per Article 21 of the Regulations Governing the Preparation of Financial Reports by Securities Issuers, the current profit or loss and other comprehensive income in the parent company-only financial statements are the same as the share of the current profit or loss and other comprehensive income attributable to the owners of the parent company in the financial statements prepared on a consolidated basis; and the owner's equity in the parent company-only financial statements is the same as the equity attributable to the owners of the parent company in the financial statements prepared on a consolidated basis. Therefore, the investment in subsidiaries is presented as "investments using the equity method" in the parent company only financial statements, with necessary valuation adjustments made.

The parent company only financial statements have been prepared on the historical cost basis except for the financial instruments at fair value. The parent company only financial statements are presented in NT\$ thousand, unless otherwise specified.

#### 3. Foreign currency transactions

The Company's parent company only financial statements are presented in NTD as the functional currency.

Transactions in foreign currencies are recognized at the exchange rates prevailing on the transaction dates. On each balance sheet date, monetary items denominated in foreign currencies are translated at the exchange rate prevailing on that date. Non-monetary items in foreign currencies measured at fair value are translated at the exchange rate prevailing on that

date when the fair value is measured. Non-monetary items in foreign currencies measured at historical cost are translated at the exchange rates prevailing on the initial transaction dates.

Except as stated below, exchange differences arising from settlement or translation of monetary items are recognized in profit or loss for the period in which they occur.

- (1) Regarding foreign-currency borrowings incurred to acquire an eligible asset, if the resulting exchange difference is regarded as an adjustment to interest costs, it is part of the borrowing cost and is capitalized as the cost of the asset.
- (2) Foreign-currency items to which IFRS 9 "Financial Instruments" applies are handled in accordance with the accounting policies for financial instruments.
- (3)Regarding monetary items that form part of a reportable entity's net investment in foreign operations, exchange differences arising therefrom are initially recognized in other comprehensive income and are reclassified from equity to profit or loss when the net investment is disposed of.

When the gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange gain or loss is recognized in other comprehensive income. When the gain or loss on a non-monetary item is recognized in profit or loss, any exchange gain or loss is recognized in profit or loss.

#### 4. Translation of foreign currency financial statements

Each foreign operation of the Company determines its own functional currency and measures its financial statements in the functional currency accordingly. When the parent company only financial statements were prepared, the assets and liabilities of the foreign operations were translated into NTD at the closing exchange rate on the balance sheet date. Income and expense items were translated at the average exchange rates for the period. Any exchange differences arising from translation were recognized in other comprehensive income. When the foreign operations were disposed of, the cumulative exchange differences were previously been recognized in other comprehensive income as an independent component under equity was reclassified from equity to profit or loss when the gains or losses on disposal were recognized. When control, significant influence, or joint control over foreign operations is lost with some equity retained, it is still treated as disposal.

Regarding the partial disposal of a subsidiary with foreign operations (over which the control

is not lost), the cumulative exchange difference recognized in other comprehensive income is adjusted in proportion through "investment using the equity method" and is not recognized in profit or loss. The partial disposal of an associate or a jointly controlled entity with foreign operations (over which the significant influence or joint control is not lost), when part of the disposal includes associates or jointly controlled entities of foreign operating institutions, the cumulative exchange difference is reclassified to profit or loss in proportion.

The goodwill arising from the acquisition of a foreign operation and the adjustment to the fair value of the carrying amounts of its assets and liabilities are regarding as the foreign operation's assets and liabilities and presented in its functional currency.

#### 5. Criteria for classification of current and non-current assets and liabilities

Assets that meet one of the following criteria are classified as current assets, otherwise they are non-current assets:

- (1) Assets expected to be realized in the normal operating cycle or intended to be sold or consumed;
- (2) Assets held primarily for the purpose of trading;
- (3) Assets expected to be realized within 12 months after the balance sheet date;
- (4) Cash or cash equivalents, excluding assets restricted from being exchanged or used to settle liabilities for at least 12 months after the balance sheet date.

Liabilities that meet one of the following criteria are classified as current liabilities, otherwise they are non-current liabilities:

- (1) Liabilities expected to be settled in the normal operating cycle;
- (2) Liabilities held primarily for the purpose of trading;
- (3) Liabilities expected to be settled within 12 months after the balance sheet date;
- (4) Liabilities with a repayment deadline that cannot be unconditionally deferred for at least 12 months after the balance sheet date. However, the terms of a liability that could, at the option of the counterparty, result in its settlement by issuing equity instruments do not affect its classification.

#### 6. Cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits, and short-term time deposits and investments that are highly liquid and readily convertible into a fixed amount of cash at any time with little risk of value changes (including time deposits within a duration of three months).

#### 7. Financial Instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities within the scope of IFRS 9 "Financial Instruments" are measured at fair value upon initial recognition; the transaction costs that are directly attributable to the acquisition or issuance of financial assets and financial liabilities (except financial assets and financial liabilities classified as at fair value through profit or loss) are added to or subtracted from the fair values of the financial assets and financial liabilities.

#### (1)Recognition and measurement of financial assets

Regular trading of financial assets is recognized and derecognized in accordance with trade date accounting.

The Company classifies financial assets as those subsequently measured at amortized cost, at fair value through other comprehensive income, or at fair value through profit or loss based on the two bases below:

- A. The business model for financial asset management
- B. Contractual cash flow characteristics of financial assets

#### Financial assets at amortized cost

Financial assets that meet both of the following criteria are measured at amortized cost and are recognized in the balance sheet as notes or accounts receivable, financial assets at amortized cost, or other receivables:

- A. Business model for financial asset management: Holding financial assets to collect contractual cash flows.
- B. Contractual cash flow characteristics of financial assets: The cash flow is entirely the payment for principal and the interest on the outstanding principal.

Such financial assets (excluding those for hedging) are subsequently measured at the amortized cost [the amount measured upon initial recognition, less the principal repaid, plus or less the cumulative amortization of the differences between the initial amount and the due amount (using the effective interest approach), with the allowance for losses adjusted]. The gain or loss is recognized in profit or loss upon de-recognition, through the amortization process, or when an impairment gain or loss is recognized.

Interest accrued using an effective interest method (effective interest rate multiplied by the total carrying amount of a financial asset) or based on the situations below is recognized in profit or loss:

- A. In the case of a credit-impaired financial asset purchased or created, the credit-adjusted effective interest rate is multiplied by the amortized cost of the financial asset;
- B. If it is not the case but subsequently becomes credit-impaired, the effective interest rate is multiplied by the amortized cost of the financial asset.

#### Financial assets at fair value through other comprehensive income

Financial assets that meet both of the following criteria are measured at fair value through other comprehensive income and recognized in the balance sheet as financial assets at fair value through other comprehensive income:

- A. The business model for financial asset management: Collection of contractual cash flows and sales of financial assets.
- B. Contractual cash flow characteristics of financial assets: The cash flow is entirely the payment for principal and the interest on the outstanding principal.

The recognition of relevant gains and losses on such financial assets is specified below:

A. Before de-recognition or reclassification, except for impairment gains or losses and

foreign currency exchange gains or losses that are recognized in profit or loss, such gains or losses are recognized in other comprehensive income.

- B. Upon de-recognition, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment.
- C. Interest accrued using an effective interest method (effective interest rate multiplied by the total carrying amount of a financial asset) or based on the situations below is recognized in profit or loss:
  - (a) In the case of a credit-impaired financial asset purchased or created, the creditadjusted effective interest rate is multiplied by the amortized cost of the financial asset:
  - (b) If it is not the case but subsequently becomes credit-impaired, the effective interest rate is multiplied by the amortized cost of the financial asset.

In addition, regarding equity instruments within the scope of IFRS 9 that are neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies, the Group, upon initial recognition, elects (irrevocably) to recognize the subsequent changes in the fair values thereof in other comprehensive income. The amount recognized in other comprehensive income must not be subsequently reclassified to profit or loss (when such equity instruments are disposed of, it will be included in the cumulative amount of other equity items and directly transferred to retained earnings) and is recognized in the balance sheet as a financial asset at fair value through other comprehensive income. Investment dividends are recognized in profit or loss unless they clearly represent a recovery of part of the cost of the investment.

#### Financial assets at fair value through profit or loss

Except for the above financial assets in alignment with specific criteria that are measured at amortized cost or fair value through other comprehensive income, financial assets are measured at fair value through profit or loss and recognized in the balance sheet as financial assets at fair value through profit or loss.

Such financial assets are measured at fair value, and any gain or loss arising from remeasurement is recognized in profit or loss. The gain or loss recognized in profit or loss includes any dividends or interest received due to the financial asset.

#### (2)Impairment of financial assets

The Company's investments in debt instruments at fair value through other comprehensive income and financial assets at amortized cost are recognized as expected credit losses with an allowance for losses provided. An allowance for losses on an investment in a debt instrument measured at fair value through other comprehensive income is recognized in other comprehensive income without the carrying amount of the investment reduced. The Company measures expected credit losses in a way that reflects the following:

- A. An unbiased, probability-weighted amount determined by evaluating each potential outcome
- B. Time value of money
- C. Reasonable and corroborative information related to past events, present conditions, and future economy forecasts (which can be accessed without an excessive cost or investment on the balance sheet date)

The methods of measuring an allowance for losses are specified below:

- A. Measured at 12-month expected credit losses: Including financial assets with the credit risk not increasing significantly since the initial recognition or those with an estimated low credit risk on the balance sheet date. Also, it also includes an allowance for the lifetime expected credit losses during the prior reporting period, without meeting the indicator that the credit risk has significantly increased since the initial recognition on the balance sheet date of this period.
- B. Measured at lifetime expected credit losses: Including financial assets with the credit risk increasing significantly since the initial recognition or credit-impaired financial assets purchased or created.
- C. For accounts receivable or contract assets arising from transactions within the scope of IFRS 15, the Company measures an allowance for lifetime expected credit losses.

On each balance sheet date, the Company evaluates whether the credit risk of a financial instrument has increased significantly after the initial recognition by comparing the default risk of the financial instrument on the balance sheet date and the initial recognition date. Please refer to Note 12 for relevant credit risk information.

#### (3)Derecognition of financial assets

The Company derecognizes a financial asset held in the case of any of the following circumstances:

- A. The contractual rights to receive the cash flows from the financial asset have expired.
- B. A financial asset is transferred with all the risks and rewards attached to the ownership of the asset substantially transferred to the counterparty.
- C. All the risks and rewards attached to the ownership of the asset are neither substantially transferred nor retained, but the control over the asset is transferred.

When a financial asset as a whole is de-recognized, the difference between its carrying amount and the sum of the consideration received or receivable plus any cumulative gain or loss recognized in other comprehensive income is recognized in profit or loss.

#### (4)Financial liabilities and equity instruments

#### Classification of liabilities and equity

Liabilities and equity instruments issued by the Company are classified as financial liabilities or equity as per the substance of the agreement and the definitions of financial liabilities and equity instruments.

#### **Equity instrument**

Equity instrument refers to any contract that demonstrates the Company's remaining interest in assets less all of its liabilities. Equity instruments issued by the Company are recognized at the acquisition prices, less the direct issuance cost.

#### Financial liability

Financial liabilities that fall within the scope of IFRS 9 are classified as either financial liabilities at fair value through profit or loss or financial liabilities at amortized cost upon initial recognition.

#### Financial liabilities at amortized cost

Financial liabilities measured at amortized cost, including payables and borrowings, are subsequently measured using the effective interest rate method after the initial recognition. When financial liabilities are de-recognized and amortized using the effective interest rate method, the relevant gains or losses and amortizations are recognized in profit or loss.

The amortized cost is calculated with the discount or premium and the transaction cost upon acquisition taken into account.

#### Derecognition of financial liabilities

When the obligations of financial liabilities are lifted, cancelled, or expire, the financial liabilities are derecognized.

When the Company exchanges debt instruments with materially different terms with a creditor or significantly changes all or part of the terms of the existing financial liabilities (financial difficulties or not), the initial liabilities are derecognized and new liabilities are recognized. When a financial liability is derecognized, the difference between its carrying amount and the total consideration paid or payable (including the non-cash assets transferred or the liabilities assumed) is recognized in profit or loss.

#### (5)Offset of financial assets and liabilities

Financial assets and financial liabilities can only be offset and presented in the balance sheet as a net amount when the recognized amount is legally entitled to be offset with an intension to be settled in a net amount or realize the asset and settle the liability at the same time.

#### 8. Derivatives

The derivatives held or issued by the Company are used to hedge the exchange rate risk and the interest rate risk. Among them, those designated to effectively hedge risks are recognized as financial assets or liabilities for hedging purposes in the balance sheet; the remaining not designated to effectively hedge risks, it is presented in the balance sheet as financial assets or financial liabilities at fair value through profit or loss.

A derivative is initially recognized at fair value at the date the derivative contract is signed and subsequently measured at fair value. When the fair value of the derivative is a positive figure,

it is a financial asset; a negative figure, it is a financial liability. Any change in the fair value of the derivative is recognized directly in profit or loss, but if hedging is involved and effective, the derivative is recognized in profit or loss or equity depending on the type of hedging.

Where a master contract is about a non-financial asset or financial liability, if the economic characteristics and risks of the derivative embedded in the master contract are not closely related to the master contract, and the master contract is not measured at fair value through profit or loss, the embedded derivative should be regarded as an independent derivative.

#### 9. Fair value measurement

Fair value is the price that can be received from a sale of an asset or paid to transfer a liability in an orderly transaction between market participants. It is assumed that the sale of the asset or transfer of the liability takes place in one of the markets below when the fair value is measured:

- (1) The principal market for the asset or liability, or
- (2) If there is no principal market, the most favorable market for the asset or liability.

The principal or most favorable market should be accessible for the Company to trade.

The measurement of the fair value of an asset or a liability serves as an assumption that market participants would adopt when pricing the asset or liability in the in the best economic interest of the market participants.

The fair value of a non-financial asset is measured based on market participants' ability to make the most of or put the asset to the best use or by selling the asset to another market participant who will make the most of or put the asset to the best use to generate economic benefits.

The Company measures the fair value using a valuation technique that is appropriate in relevant situations with sufficient information available and maximizes the use of relevant observable inputs while minimizing the use of unobservable inputs.

#### 10. Inventories

Inventories are valued at the lower of cost or net realizable value with an item-by-item comparison method.

Costs refer to the costs incurred in bringing inventories to a condition and location ready for sale or production.

Raw materials are valued at the actual purchase cost with a weighted average method.

Finished goods and work in process include direct raw materials, labor, and fixed manufacturing overhead apportioned based on normal production capacity, excluding the borrowing costs.

The net realizable value is calculated based on the estimated selling price, less the costs and selling expenses required till completion in the ordinary course of business.

The provision of services is handled in accordance with IFRS 15 outside the scope of inventories.

#### 11. Investments using the equity method

As per Article 21 of the Regulations Governing the Preparation of Financial Reports by Securities Issuers, the Company's investments in its subsidiaries are presented as "investments using the equity method" with necessary valuation adjustments made, to bring the current profit or loss and other comprehensive income in the parent company-only financial statements to be the same as the share of the current profit or loss and other comprehensive income attributable to the owners of the parent company in the financial statements prepared on a consolidated basis; and the owner's equity in the parent company-only is the same as the equity attributable to the owners of the parent company in the financial statements prepared on a consolidated basis. Such adjustments are mainly made to the treatment of investments in subsidiaries in the consolidated financial statements in accordance with IFRS 10 "Consolidated Financial Statements" and the differences in the application of IFRS by reportable entities at different levels, while being debited to or credited from "investments using the equity method", "share of profit or loss of subsidiaries, associates, or joint ventures using the equity method", or "share of other comprehensive income of subsidiaries, associates, or joint ventures using the equity method".

The Company's investments in associates are accounted for using the equity method, except for assets that are classified as assets held for sale. Associates refer to those on which the Company has significant influence.

With an equity method adopted, an investment in an associate recognized in the balance sheet is the amount of cost, plus the amount of the net change in the Company's net assets in the associate after the acquisition in proportion to the Company's shareholding. After the carrying amount of the investment in the associate and other relevant long-term interests are reduced to zero using the equity method, additional losses and liabilities are recognized only to the extent that the Group has incurred legal obligations, or constructive obligations, or made payments on behalf of the said associate. Unrealized gains or losses arising from transactions between the Company and its associates are eliminated in proportion to its equity in the associates.

When a change in the equity in an associate does not occur due to an item under profit or loss or other comprehensive income and does not affect the Company's shareholding, the Company recognizes the change in ownership interests in proportion to its shareholding. Therefore, when the associate is subsequently disposed of, the capital surplus recognized is transferred to profit or loss in proportion to the disposal.

In the event of issuance of new shares by an associate, when the Company does not subscribe in proportion to its shareholding, resulting in a change in the proportion of investment and an increase or decrease in the Company's share in the associate's net assets, "capital surplus" and "investments using the equity method" are adjusted accordingly. When the proportion of investment decreases, the relevant items previously recognized in other comprehensive income will be reclassified to profit or loss or other appropriate accounts depending on the percentage of the decrease. When the associate is subsequently disposed of, the above capital surplus recognized is transferred to profit or loss in proportion to the disposal.

Each associate's financial statements are prepared for the same reporting period as the Company's and adjusted to align their accounting policies with the Company's.

At the end of each reporting period, the Company confirms if there is objective evidence indicating any impairment of its investments in associates in accordance with "IAS 39 — Investments in Associates and Joint Ventures". If it is the case, the Company calculates the impairment based on the difference between the recoverable amount and the carrying amount of the associate in accordance with IAS 36 "Impairment of Assets" and recognizes the amount in the profit or loss on the associate. If the value in use of the investment is adopted for the above recoverable amount, the Company determines the relevant values in use based on the estimates below:

- (1) The Company's share of the present value of the estimated future cash flows generated from an associate, including the cash flow generated by the associate due to its operations and the proceeds from the disposal of the investment; or
- (2) The present value of the estimated future cash flows from dividends from the investment that the Company expects to receive and the proceeds from the disposal of the investment.

As the components of goodwill that constitute the carrying amount of an investment in an affiliate are not separately recognized, it is not necessary to apply IAS 36 "Impairment of Assets" regarding the goodwill impairment test.

When the significant influence on an associate or joint control over a joint venture is lost, the Company measures and recognizes the retained investment at fair value. When the significant influence or joint control is lost, the difference between the carrying amount of the investment in an associate or a joint venture and the fair value of the retained investment, plus the proceeds from the disposal, is recognized in profit or loss. Also, when an investment in an associate becomes an investment in a joint venture, or an investment in a joint venture becomes an investment in an associate, the Company continues to adopt the equity method without remeasuring the retained equity.

#### 12. Property, plant and equipment

Property, plant and equipment are accounted for on the basis of acquisition cost and recognized after accumulated depreciation and impairment are deducted. The above costs include the cost of dismantling or removing of property, plant and equipment and restoring the location, and necessary interest expenses arising from unfinished projects. Each component of property, plant and equipment is depreciated separately if it is significant. When a major component of property, plant and equipment needs to be replaced regularly, the Company regards it as an individual asset and recognizes it separately with a specific useful life and a depreciation methods. The carrying amount of the replaced part should be derecognized in accordance with the requirement for derecognition under IAS 16 "Property, Plant and Equipment". If a major examination or repair cost meets the criteria for recognition, it is regarded as a replacement cost and recognized as part of the carrying amount of plant and equipment, while other repair and maintenance expenses are recognized in profit or loss.

Assets below are depreciated on a straight-line basis over the estimated useful lives:

Buildings 1–50 years Machinery and 1–20 years

equipment

Transportation 3–10 years

equipment

Office equipment 2–10 years Leasehold 34 years

improvements

Other equipment 3–10 years

After the initial recognition of property, plants and equipment or any important component, if it is disposed of or no economic effect arising from the use or disposal is expected, it will be derecognized and recognized in profit or loss.

The residual value, years of useful life, and depreciation method of property, plants and equipment are assessed at the end of each fiscal year. If the expected value is different from the previous estimate, the change is considered as a change in accounting estimates.

#### 13. Investment property

The Company's self-owned investment property is initially measured at cost, including transaction cost of the property. The carrying amount of investment property includes the cost of repairing or adding to the existing investment property under the condition that the cost can be recognized; however, the repair or maintenance costs that usually occur on a daily basis are not included as part of the cost. After initial recognition, except for those meeting the criteria for being classified as those held for sale (or included in the disposal group classified as held for sale) in accordance with IFRS 5 "Non-current Assets Held for Sale and Discontinued Operations"; As per IAS 16 "Property, Plant and Equipment" regarding such a situation, if such an asset is held by the lessee as a right-of-use asset and is not held for sale as per IFRS 5, it is handled in accordance with IFRS 16.

Assets below are depreciated on a straight-line basis over the estimated useful lives:

Buildings 5–30 years

Investment property is derecognized and recognized in profit or loss when it is disposed of or will never be used again without future economic benefits expected to be generated from the disposal.

The Company decides to transfer an asset in or out of investment property depending on the actual use of the assets.

When a property meets or no longer meets the definition of investment property with evidence showing that the purpose has changed, the Company will reclassify the property as investment property or transfer it out of investment property.

#### 14. Leasing

The Company assesses whether or not an arrangement is (or includes) a lease arrangement on the inception of the agreement. If an agreement transfers control over the use of an identified asset for a period of time in exchange for consideration, the agreement is (or includes) a lease arrangement. In order to assess whether the agreement transfers control over the use of the identified asset for a period of time, the Company assesses whether it meets both of the following conditions during the entire period of use:

- (1) Obtaining the right to almost all economic benefits from the use of the identified asset; and
- (2) The right to direct the use of the identified asset.

For the agreement that belongs to (or includes) a lease arrangement, the Company treats each lease component in the agreement as a separate lease and treats it separately from the non-lease component in the agreement. For the agreement that includes one lease component and one or more additional lease or non-lease components, the Company adopts the relative standalone price of each lease component and the aggregate standalone prices of the non-lease components as the basis to distribute the consideration in the agreement to the lease component. The relative standalone prices of lease and non-lease components are determined on the basis of the prices charged by the lessor (or similar suppliers) for the components (or similar components). If an observable standalone price is not readily available, the Company maximizes the use of observable information to estimate the standalone price.

### The Company as a lessee

In addition to meeting and selecting short-term leases or leases of low-value underlying assets, when the Company is the lessee of a lease contract, all leases are recognized in right-of-use assets and lease liabilities.

The Company measures the lease liabilities on the inception date based on the present value of the lease payments not yet paid on that date. If the implied interest rate of the lease is easily determined, the lease payments will be discounted to their present value using that interest rate. If such interest rate is not easily determined, the incremental borrowing rate will be used. On the inception date, the lease payments included in the lease liabilities include the following payments related to the right to use the underlying assets during the lease period and not yet paid on that date:

- (1) Fixed payment (including substantive fixed payment) less any lease incentives that can be collected;
- (2) Lease payment that depends on changes in an index or rate (using the index or rate on the inception date for initial measurement);
- (3) The amount expected to be paid by the lessee under the residual value guarantee;
- (4) If the Company can reasonably determine the exercise price of call option, it will exercise the option; and
- (5) The penalty payable for the termination of a lease, if there is sign that the lessee, in the lease period, will exercise the option of terminating the lease.

After the inception date, the Company measures the lease liabilities at amortized cost, and increases the carrying amount of the lease liabilities using the effective interest method to reflect the interest on the lease liabilities; the lease payments reduce the carrying amount of the lease liabilities.

On the inception date, the Company measures the right-of-use assets at cost. The cost of the right-of-use assets includes:

- (1) The monetary amount of the lease liability initially measured;
- (2) Any lease payments made on or before the inception date less any lease incentives received;
- (3) Any initial direct costs incurred by the lessee; and
- (4) An estimate of costs to be incurred in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

Subsequent measurement of the right-of-use assets is presented after the cost less the accumulated depreciation and accumulated impairment loss, i.e. the cost model is applied to measure the right-of-use assets.

If the ownership of the underlying asset is transferred to the Company when the lease period expires, or if the cost of the right-of-use assets reflects that the Company will exercise the call option, the right-of-use assets will be depreciated from the commencement date to the end of the useful life of the underlying asset. Otherwise, the Company depreciates the right-of-use assets from the inception date to the end of the useful life of the right-of-use assets or to the expiration of the lease period, whichever is earlier.

The Company applies IAS 36 Impairment of Assets to determine whether a right-of-use asset is impaired and to deal with any identified impairment losses.

In addition to meeting and selecting short-term leases or leases of low-value underlying assets, the Company presents right-of-use assets and lease liabilities in the balance sheet, and presents lease-related depreciation expenses and interest expenses separately in the statement of comprehensive income.

For short-term leases and leases of low-value underlying assets, the Company chooses to adopt the straight-line basis or another systematic basis to recognize the lease payments related to said leases in expenses over the lease term.

### The Company as a lessor

The Company classifies each of its leases as operating leases or financial leases on the contract inception date. If a lease transfers almost all the risks and rewards attached to the ownership of the underlying asset, it is classified as a financial lease; if it does not transfer said matters, it is classified as an operating lease. On the inception date, the Company recognizes the assets held under the finance leases in the balance sheet and presents them as financial lease receivables based on the net lease investment.

For agreements that include lease components and non-lease components, the Company applies IFRS 15 to distribute the consideration in the agreements.

The Company recognizes lease payments from operating leases as rental income on a straightline basis or another systematic basis. For operating leases, lease payments that are not dependent on change in some index or rate are recognized as rental income when they occur.

## 15. Impairment of non-financial assets

The Company at the end of each reporting period assesses whether all assets subject to IAS 36 "Impairment of Assets" are showing signs of impairment. If there is any indication of impairment or an impairment test is required for an asset on a regular basis each year, the Group tests the individual asset or the cash-generating unit to which the asset belongs. If the carrying amount of an asset or the cash-generating unit to which the asset belongs is greater than the recoverable amount in an impairment test, the impairment loss is recognized. The recoverable amount is the higher of the net fair value or value in use.

At the end of each reporting period, the Company assesses assets other than goodwill to see whether there are indications that the previously recognized impairment losses may no longer exist or may be decreased. In the event of such an indication, the Group estimates the recoverable amount of the asset or cash-generating unit. If the recoverable amount is increased due to the change in the estimated service potential of the asset, the impairment amount is reversed. However, the reversed carrying amount shall not exceed that before recognizing impairment loss and after deducting depreciation or amortization.

The impairment loss and reversal amount of the continuing operations are recognized in profit or loss.

### 16. Revenue recognition

The Company's revenue from customer contracts mainly includes the sales of goods and provision of services. The accounting treatments are specified below:

### Merchandise sales

The Company manufactures and sells merchandise and recognizes revenue when the promised merchandise are delivered to a client and the customer client the control over it (i.e., the client's ability to guide the use of the merchandise and obtain almost all the remaining benefits of the merchandise). Its main products are precious metals, and the sales are recognized in revenue at the prices stated in the contracts.

The credit period of the Company's merchandise sold is T/T-120 days. Most contracts are recognized as accounts receivable when the control of the merchandise is transferred with an unconditional right to receive consideration. These accounts receivable are usually short-term and do not contain significant financial components. A small number of contracts, for which the merchandise has been transferred to a client but the Group has not had the right to unconditionally receive the consideration, are recognized as contract assets. Meanwhile, contract assets should be measured as an allowance for lifetime expected credit losses in accordance with IFRS 9.

### Provision of services

The Company mainly provides cleaning and processing services. Such services are individually priced or negotiated and are provided on the basis of the contract period. As the Company provides cleaning and processing services during the contract period, a client will

obtain the benefits from such services during the contract period, which is a performance obligation to be satisfied at a certain point in time. Thus, the provision of services is recognized as revenue at one go once it is completed.

Most of the Company's agreed payments per contract are collected in a lump sum during the contract period after the cleaning and processing services are provided. When the services has been transferred to a client but the Group has not had the right to unconditionally receive the consideration, it is recognized as a contract asset. However, regarding some contracts, as part of the consideration is collected from the clients at the time of signing contracts, the Company assumes the obligation to provide services in the future; thus, such contracts are recognized as contract liabilities.

The period during which the Company's above contractual liabilities are transferred to revenue usually does not exceed one year and does not result in significant financial components.

### 17. Borrowing costs

Borrowing costs that can be directly attributable to the acquisition, construction, or production of qualified assets are capitalized as part of the costs of the assets. All other borrowing costs are recognized as expenses in the period in which they are incurred. Borrowing costs include interest and other costs incurred in relation to borrowings.

### 18. Government grants

The Company recognizes an amount in government grants when it is reasonably sure that it will meet the conditions set by the government for such grants and can receive the inflow of economic benefits from the government grants. When a grant is related to assets, the government grants are recognized in deferred income and recognized in income in installments over the estimated useful lives of the relevant assets. When a government grant is related to an expense, the grant is recognized in income in a reasonable and systematic manner for a period in which relevant costs are expected to be incurred.

When the Company receives a non-monetary government grant, the asset and grant received are recognized at the nominal amount, and the income is recognized in the statement of comprehensive income in equal installments over the estimated useful lives of the underlying assets based on the benefit consumption pattern. The loans with interest rates lower than the market level or similar supports obtained from the government or relevant institutions are regarded as additional government grants.

## 19. Post-employment benefit plan

The pension plan for the Company's employees applies to all full-time employees. The employee pension fund is fully contributed to the Labor Pension Reserves Committee and deposited in the pension fund account. The aforementioned pension is deposited in the name of the Labor Pension Reserves Committee, which is completely separated from the Company, so it is not included in the parent company only financial statements in the preceding paragraph.

For the defined contribution pension plan, the monthly pension payable rate of the Company shall not be less than 6% of the employees' monthly salary, and the amount of the provision shall be recognized in current expenses.

The post-employment benefit plan that is a defined benefit plan is accounted for using the projected unit benefit method based on an actuarial report on the end date of the annual reporting period. The remeasurement of the net defined benefit liabilities (assets) includes any movements in the return on the plan asset and the effects of asset cap, less the amount of net interest included in the net defined benefit liabilities (assets) and actuarial gains and losses.

The net defined benefit liability (asset) remeasurement is included in other comprehensive income when incurred and immediately recognized in the retained earnings. Past service cost, which is the change in the present value of the defined benefit obligation, results from a plan amendment or curtailment and is recognized as an expense at the earlier of the following dates:

- (1) When a plan amendment or curtailment occurs; or
- (2) When the Company recognizes relevant restructuring costs or termination benefits.

The net interest on the net defined benefit liability (asset) is determined with the net defined benefit liability (asset) multiplied by the discount rate, both determined at the beginning of the annual reporting period, and based on any changes in net defined benefit liability (asset) due to contributions and benefit payments during the period.

#### 20. Income taxes

Income tax expenses (income) refer to the sum related to current income tax and deferred tax included in the current profit or loss.

#### Current income tax

The current income tax liabilities (assets) related to this and the prior periods are measured at the legislated or substantially legislated tax rates and tax laws at the end of the reporting period. The current income tax related to the items recognized in other comprehensive income or directly recognized in the equity is recognized in other comprehensive income or equity instead of being recognized in the profit or loss.

A surtax of the profit-seeking enterprise income tax levied on the undistributed earnings is recognized as income tax expense on the date when the distribution of earnings is resolved in the shareholders' meeting.

### Deferred tax

The deferred tax is calculated according to the temporary difference between the taxable amount of assets and liabilities and the carrying amount on the balance sheet at the end of the reporting period.

All taxable temporary differences are recognized as deferred tax liabilities except for the following two items:

- (1) The initial recognition of goodwill, or the initial recognition of an asset or liability that does not arise from a business combination and does not affect accounting profits and taxable income (loss) at the time of the transaction conducted;
- (2) The taxable temporary difference arising from the investment in subsidiaries, associates, and joint ventures. Also, the timing of reversal is controllable, and it is not likely to be reversed in the foreseeable future;

Except for the following two items, deductible temporary difference and deferred tax assets arising from the taxable losses and income tax credit are recognized within the range of probable future taxable income:

(1) It is related to the deductible temporary difference from the initial recognition of an asset or liability that does not arise from a business combination and does not affect accounting profits and taxable income (loss) at the time of the transaction conducted;

(2) It is related to the deductible temporary differences arising from the investment in subsidiaries, associates, and interests in joint ventures. It is recognized within the range of probable reversal in the foreseeable future and there is sufficient taxable income at the time the temporary difference occurred.

Deferred tax assets and liabilities are measured at the tax rate of the expected asset realization or in the period in which the liability is settled. The tax rate is based on the legislated or substantially legislated tax rates and tax laws at the end of the reporting period. The measurement of deferred tax assets and liabilities reflects the tax consequences arising from the manner in which the asset is expected to be recovered or the book value of the liability is settled at the end of the reporting period. If the deferred tax is related to items that are not included in the profit or loss, it will not be recognized in profit or loss, but recognized in other comprehensive income according to the relevant transactions or directly recognized in equity. Deferred tax assets are reexamined and recognized at the end of each reporting period.

Deferred tax assets and liabilities can be legally offset against each other only in the current period, and the deferred tax is related to the same taxation entity and is related to the income tax levied by the same taxation authority.

### V. Significant Accounting Assumptions and Judgment, And Major Sources ff Estimation Uncertainty

When the parent company only financial statements are prepared by the Company, the management must make judgments, estimates, and assumptions at the end of the reporting period, which will affect the disclosures of income, expenses, assets, and liabilities, and contingent liabilities. However, the uncertainty of these significant assumptions and estimates may result in a significant adjustment to the book value of an asset or liability in the future period.

## 1. Estimation and assumption

The main source of information on the estimation and assumption with uncertainty at the end of the reporting period has significant risks that result in significant adjustments to the carrying amounts of assets and liabilities in the next fiscal year. The explanations are given as follows:

### (1) Fair values of financial instruments

When the fair values of financial assets and financial liabilities recognized in the balance sheet cannot be obtained from the active market, the fair value will be determined using evaluation techniques, including the income approach (such as, cash flow discount model) or market approach. The changes in the assumptions of the said approaches will affect the fair value of the financial instruments reported. See Note 12 for details.

### (2) Valuation of inventories

The net realizable value is calculated based on the estimated selling price, less the costs and selling expenses required until the completion in the ordinary course of business. Such estimates are based on the market conditions and historical sales experience of similar products, and changes in the market conditions may significantly influence the results of such estimates.

### (3) Post-employment benefit plan

The defined benefit cost and the present value of the defined benefit obligations to the postemployment benefit plan depend on the actuarial valuation results. Actuarial valuation involves various assumptions, including discount rate and changes in expected salary increase/decrease. Please refer to Note 6 for the details of the assumptions used to measure the defined benefit costs and defined benefit obligations.

#### (4) Income taxes

The uncertainty of income tax exists in the interpretation of complex tax regulations and the amount and timing of future taxable income. Due to a wide range of international business relationships and the long-term and complexity of contracts, the differences between actual results and assumptions made, or changes in such assumptions in the future, may cause the booked income tax income and expenses to be adjusted in the future. The recognition of income tax is a reasonable estimation made according to the possible audit results of the local tax authorities of the countries in which the Company operates. The amount recognized is based on different factors, such as previous tax audit experience and the difference in tax law interpretation between the tax entity and the tax authority. The difference in interpretation may result in a variety of issues due to the local situation of the country where an individual enterprise of the Company operates.

The carryforwards of the taxable loss and income tax credit and deductible temporary differences are recognized as deferred tax assets within the range of probable future taxable income or taxable temporary differences. The amount of the deferred income tax assets to be recognized is estimated according to the possible timing and level of the future taxable

income and taxable temporary difference, as well as the future tax planning strategy. Please refer to Note for the Company's unrecognized deferred tax assets as of December 31, 2022.

## VI. Description of significant account titles

### 1. Cash and cash equivalents

|                              | 2022.12.31 | 2021.12.31 |
|------------------------------|------------|------------|
| Cash and petty cash          | \$50       | \$50       |
| Checking and demand deposits | 98,574     | 71,809     |
| Total                        | \$98,624   | \$71,859   |

## 2. Financial assets at fair value through profit or loss

The Company engages in the trading of derivative financial instruments, including options and futures contracts, for its precious metal inventories to get prepared for price changes in product sales but does not designate them as a hedging tool.

Details as of December 31, 2022 and 2021 are as follows:

|                             | 2022.12          | 2.31     | 2021.12.31   |          |  |
|-----------------------------|------------------|----------|--------------|----------|--|
|                             | Nominal          |          | Nominal      |          |  |
|                             | principal        | Carrying | principal    | Carrying |  |
|                             | (in thousands of | amount   | (in          | amount   |  |

|                             |                  |          | NTD)         |          |  |
| Designated as at fair value |                  |          |              |          |  |
| through profit or loss on   |                  |          |              |          |  |
| initial recognition:        |                  |          |              |          |  |
| Derivatives                 |                  |          |              |          |  |
| Precious metals             | \$-              | \$-      | \$-          | \$-      |  |
| futures                     |                  |          |              |          |  |

#### (I) Futures

(1) The amount recognized as current unrealized gain or loss on the financial assets due to the changes in fair values of the futures contracts signed with the futures merchants

is NT\$0 for both periods ended December 31, 2022 and 2021 and the recognized current realized gains or losses on the financial assets were NT\$0 and NT\$(5,705) thousand for the two periods, respectively.

- (2) The Company's financial assets at fair value through profit or loss were not provided as collateral.
- 3. Financial assets at fair value through other comprehensive income

|  | 2022.12.31 | 2021.12.31 |
|--|------------|------------|
| Investments in equity instruments measured at fair |            |            |
| value through other comprehensive income-          |            |            |
| non-current:                                       | \$9,333    | \$3,333    |
| Unlisted stocks                                    |            |            |

The Company's financial assets at fair value through other comprehensive income were not provided as collateral.

#### 4. Financial assets at amortized cost

|                          | 2022.12.31 | 2021.12.31 |
|--------------------------|------------|------------|
| Restricted cash in banks | \$86,602   | \$85,575   |
|                          |            |            |
| Current                  | \$86,602   | \$85,575   |

Please refer to Note 8 for the details of collateral provided by the Company for financial assets at amortized cost.

### 5. Notes receivable

|  | 2022.12.31 | 2021.12.31 |
|--|------------|------------|
| Notes receivable arising from operations | \$-        | \$1,262    |
| Less: Allowance for losses               |            |            |
| Total                                    | \$-        | \$1,262    |

The Company did not provide notes receivable as collateral.

The Company evaluated impairment losses in accordance with IFRS 9. See Note 6.21 for information on allowances for losses and Note 12 for information on credit risks.

## 6. Accounts receivable, net

(1) The details of accounts receivable, net, are as follows:

|                            | 2022.12.31 | 2021.12.31 |
|----------------------------|------------|------------|
| Accounts receivable        | \$29,907   | \$29,824   |
| Less: Allowance for losses |            |            |
| Total                      | \$29,907   | \$29,824   |

The Company did not provide accounts receivable as collateral.

(2) The Company's credit period for clients is usually T/T to 120 days after the end of a month. The total carrying amounts as of December 31, 2022 and 2021 were NT\$29,907 thousand and NT\$29,824 thousand, respectively. Please refer to Note 6.21 for the information on an allowance for losses and Note 12 for the information on credit risks for the years ended December 31, 2022 and 2021.

#### 7. Inventories

(1) The details of inventories are as follows:

|                  | 2022.12.31 | 2021.12.31 |
|------------------|------------|------------|
| Raw materials    | \$157,681  | \$138,787  |
| Work in progress | 234,966    | 236,532    |
| Finished goods   | 43,332     | 56,615     |
| Total            | \$435,979  | \$431,934  |

(2) Inventory costs recognized as expenses for 2022 and 2021 by the Company were NT\$1,119,171 thousand and NT\$1,421,732 thousand, respectively, including NT\$0 and

NT\$4,215 thousand for inventory valuation losses.

(3) The above inventories were not provided as collateral.

# 8. Investments using the equity method

- (2) The major components of the Company's buildings are main buildings and ancillary equipment and are depreciated over their useful lives of 5 to 50 years and 1 to 33 years, respectively.
- (3) Please refer to Note 8 for the property, plant and equipment provided as collateral.

## 10. Investment property

Investment property includes that owned by the Company. The Company signed a commercial property lease contract on its own investment property over a lease term of ten years. The lease contract includes a clause on the rent adjustment with the market situation per year.

| Expenses payable                | \$16,999   | \$19,489   |
| Balance payable - machinery and | 26,522     | 27,195     |
| equipment                       |            |            |
| Total                           | \$43,521   | \$46,684   |

## 14. Other current liabilities

|                                 | 2022.12.31 | 2021.12.31 |  |
|---------------------------------|------------|------------|--|
| Other current liabilities       | \$661      | \$630      |  |
| Long-term borrowings due within | 74,955     | 73,615     |  |
| one year                        |            |            |  |
| Total                           | \$75,616   | \$74,245   |  |

## 15. Other non-current liabilities

|                                 | 2022.12.31 | 2021.12.31 |
|---------------------------------|------------|------------|
| Net defined benefit liabilities | \$12,419   | \$5,498    |
| Long-term unearned revenue      | 9,163      | 9,370      |
| Guarantee deposits received     | 2,250      | 2,250      |
| Total                           | \$23,832   | \$17,118   |

### 16. Unearned revenue

## Government grants

|                                      | 2022       | 2021       |
|--------------------------------------|------------|------------|
| Opening balance                      | \$9,370    | \$9,578    |
| Government grants received           |            |            |
| during this period                   | -          | -          |
| Recognized in profit or loss         | (207)      | (208)      |
| Ending balance                       | \$9,163    | \$9,370    |
|                                      |            |            |
|                                      | 2022.12.31 | 2021.12.31 |
| Unearned revenue related to assets - |            |            |
| non-current                          | \$9,163    | \$9,370    |

To facilitate the development of the environmental protection industry, the Taoyuan City Government has signed the Taoyuan Environmental Science and Technology Park Subsidy contract with the Company. After the Company has acquired the land, the entity will provide the Company with the first installments of the subsidy of NT\$10,354 thousand, to facilitate the industry development. The amounts were recognized as long-term unearned revenue, and after the construction of the plant is completed, the amounts will be recognized as government grants in installments over the useful life of the plant.

## 17. Long-term borrowings

The details of the long-term borrowings as of December 31, 2022 and 2021 are as follows:

|                |           |            |                       | Amount of  |           |
|----------------|-----------|------------|-----------------------|------------|-----------|
|                |           |            |                       | borrowings |           |

- Note 1: The loan will be disbursed in installments within one year after the borrowing date with a grace period of two years. During the grace period, the interest will be accrued and collected on a monthly basis. After the end of the grace period, the principal will be amortized per month in 156 installments, and the interest will still be accrued and collected per month.
- Note 2: After the contract is signed, the term is three years. The bank will check if the Company's financial ratios meet the standard per quarter as the basis for renewal of the contract. The interest is paid monthly, and the principal will be settled in one lump sum once the loan is due.
- Note 3: After the contract is signed, the term is seven years, and the interest is paid monthly, and the principal is amortized in 180 installments.

The Company used partial land and buildings as the first mortgage to secure the loans from the Bank of Taiwan, Taishin International Bank, and Bank SinoPac. See Note 8 for details of the collateral.

## 18. Post-employment benefit plan

## Defined contribution plan

The Company's employee retirement plan stipulated in accordance with the Labor Pension Act is a defined contribution plan. According to the Act, the Company's monthly labor pension contribution rate shall not be less than 6% of employees' monthly salary. The Company makes a monthly contribution equivalent to 6% of the employees' monthly salary to the personal pension account with the Bureau of Labor Insurance.

The amount of expenses of the defined contribution pension plan recognized by the Company for 2022 and 2021 was NT\$1,971 thousand and NT\$1,805 thousand, respectively.

## Defined benefit plan

The defined benefit pension regulations established by the Company in accordance with the

provisions of the Labor Standards Act, are a defined benefit plan. The employee pension is calculated based on the number of units granted according to the length of service and the approved monthly average salary at the time of retirement. Two units are granted for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. The Company makes a contribution equal to 2% of the total salaries per month as a pension fund and deposit it in the account in the name of the Labor Pension Funds Supervisory Committee with the Bank of Taiwan. In addition, the Company assess the balance in the aforementioned labor pension reserve account at the end of per year. If the account balance is insufficient to pay the pension calculated with the aforementioned method to the employees who are expected to qualify for retirement in the following year, the Company will make a contribution to make up for the difference by the end of March of the following year.

The Ministry of Labor allocates the assets accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund. The investment using the fund is made by its own and by a brokerage and managed actively and passively according to the medium- and long-term investment strategies. Considering market, credit, liquidity, and other risks, the Ministry of Labor has set fund risk limits and control plans to flexibly achieve the target return without the need to take an excessive risk. For the use of this fund, the minimum income from the annual final accounts should not be lower than the income calculated at the local bank's interest rate for two-year time deposits. If there is any shortage, it should be made up by the national treasury after approval by the competent authority. As the Company has no right to participate in the operation and management of the fund, it is unable to disclose the fair values of the plan assets classified in accordance with paragraph 142 of IAS 19. As of December 31, 2022, the Company plans to contribute NT\$51 thousand to the defined benefit plan for the following year.

The table below summarizes the costs of the defined benefit plan recognized in profit or loss:

|                                 | 2022 | 2021 |
|---------------------------------|------|------|
| Current service cost            | \$-  | \$-  |
| Interest cost                   | 110  | 82   |
| Estimated return on plan assets | (62) | (29) |
| Total                           | \$48 | \$53 |

The reconciliation of the present value of the defined benefit obligation and the fair value of plan assets is as follows:

|                            | 2022.12.31 | 2021.12.31 |
|----------------------------|------------|------------|
| Defined benefit obligation | \$12,419   | \$12,597   |

|   | 2022.12.31 | 2021.12.31 |
|---|------------|------------|
| Fair value of plan assets                   |            | (7,093)    |
| Other non-current liabilities - net defined |            |            |
| benefit liabilities (assets) recognized     | \$12,419   | \$5,504    |

Reconciliation of net defined benefit liabilities (assets)

|  | Present value of the defined benefit obligation | Fair value of plan assets | Net defined<br>benefit<br>liabilities<br>(assets) |
|--|---|---------------------------|---|
| 2021.01.01   | \$19,591  | \$(6,996)                 | \$12,595  |
| Current service cost                                       | -   |                           |   |

| Experience adjustments                                     | (48)  | -                         | (48)  |
| Remeasurement of defined benefit assets                    | -   | (556)                     | (556)   |
| Subtotal   | (288)   | (556)                     | (844)   |

|                         | Present value of the defined |               | Net defined benefit |
|-------------------------|------------------------------|---------------|---------------------|
|                         | benefit                      | Fair value of | liabilities         |
|                         | obligation                   | plan assets   | (assets)            |
| Employer's contribution | -                            | (51)          | (51)                |
| Others                  |                              | 7,762         | 7,762               |
| 2022.12.31              | \$12,419                     | \$-           | \$12,419            |

The main assumptions below are used to determine the Company's defined benefit plan:

|                          | 2022.12.31 | 2021.12.31 |  |
|--------------------------|------------|------------|--|
| Discount rate            | 1.48%      | 0.87%      |  |
| Expected salary increase | 1.00%      | 0.50%      |  |

Sensitivity analysis for each major actuarial assumption:

|                                   | 20         | 2022              |            | 21         |
|-----------------------------------|------------|-------------------|------------|------------|
|                                   | Increase   | Increase Decrease |            | Decrease   |
|                                   | in defined | in defined        | in defined | in defined |
|                                   | benefit    | benefit           | benefit    | benefit    |
|                                   | obligation | obligation        | obligation | obligation |
| Increase in discount rate by 0.5% | \$-        | \$(1,052)         | \$-        | \$(1,130)  |
| Decrease in discount rate by 0.5% | 1,154      | -                 | 1,247      | -          |
| Expected salary increase by 0.5%  | 1,154      | -                 | 1,245      | -          |
| Expected salary decrease by 0.5%  | -          | (1,062)           | -          | (920)      |

The sensitivity analysis above is based on the impact of a single assumption (e.g., discount rate or expected salary) which changed while the other conditions remain unchanged on the defined benefit obligation. As some actuarial assumptions are related to each other, in practice, the fact that only a single actuarial assumption changed is rare, so there are limitations for this analysis.

The methods and assumptions used in the sensitivity analysis for this period are the same as those for the prior period.

## (1) Ordinary shares

As of both December 31, 2022 and 2021, the Company's authorized capital was NT\$1,500,000 thousand, and issued share capital amounted to NT\$1,032,082 thousand in 103,208,229 shares, with a par value of NT\$10.

## (2) Capital surplus

|                            | 2022.12.31 | 2021.12.31 |
|----------------------------|------------|------------|
| Additional paid-in capital | \$948,152  | \$948,152  |
| Treasury shares traded     | 10,253     | 10,253     |
| Total                      | \$958,405  | \$958,405  |

As per law, paid-in capital shall not be used for any purpose except for making up for the Company's losses. When the Company has no loss, a certain percentage of the paid-in capital from the stock premium and the gift can be applied to replenish the capital per year. The aforementioned paid-in capital can be allocated in cash to shareholders in proportion to their shareholdings.

### (3) Earnings distribution and dividend policy

### A. Earnings distribution

According to the Articles of Incorporation, where the Company has net income after tax for a fiscal year, the income shall be first used for paying taxes, offsetting a cumulative deficit, providing 10% of the remaining profit as a legal reserve unless it has reached the total amount of the Company's paid-in capital. The special reserve shall be appropriated or reversed in accordance with the provisions of the Act or the competent authority. The Board of Directors shall prepare a proposal for the surplus distribution of the remaining surplus, together with any undistributed surplus at the beginning of the period, and submit it to the shareholders' meeting for resolution on the distribution of dividends to shareholders.

### B. Dividend policy

The Company's dividend policy is to distribute dividends to shareholders in cash or in shares, with cash dividends being no less than 10% of the total dividends, in accordance with the Company's current and future development plans, taking into account the investment environment, capital requirements and domestic and international competition, as well as the interests of shareholders.

C. As the Company has cumulative losses for 2022 and 2021, there was no earnings distribution proposal made by the Board of Directors s and resolved by the shareholders' meeting.

See Note 6.23 for details of the basis for estimation and recognized amounts of employee remuneration and director remuneration.

### (4) Legal reserve

As per the Company Act, the Company shall provide a legal reserve unless its total amount has reached the amount of the total capital. The legal reserve may be used to offset a deficit. When the Company has no loss, the portion of the legal reserve that exceeds 25% of the paid-in capital may be used to distribute shares or cash to shareholders in proportion to their shareholdings.

### (5) Special reserve

When distributing the distributable earnings, the Company retroactively sets aside a special reserve for the difference between the balance of the special reserve and the net deduction of other equity items as per law when the IFRS is adopted for the first time. If there is a subsequent reversal of the net deduction of other equity, the special reserve may be reversed for the portion of the net deduction of other equity reversed to distribute earnings.

In accordance with the Letter Jin-Guan-Zheng- Fa No. 1090150022 issued by the FSC dated March 31, 2021, a special reserve shall be set aside for the unrealized revaluation gains and cumulative translation adjustment (gains), which were reclassified to retained earnings on the conversion date due to the adoption of exemptions under IFRS 1 "First-time Adoption of International Financial Reporting Standards" when IFRS was first adopted. When the Company uses, disposes of, or reclassifies the relevant assets later, it may reverse the portion of the special reserve in the same percentage to distribute earnings.

## 20. Operating revenue

| _                           | 2022        | 2021        |

### 22. Leasing

### (1) The Company as a lessee

The Company has leased in a number of different assets, including buildings and machinery and equipment. The lease term of each contract is three years. Some of the contracts stipulate that the lessee, without the lessor's consent, shall not lend, sublease, transfer, or use in other disguised methods all or part of the leased property, or transfer the right to lease to another party.

The impact of leasing on the Company's financial position, financial performance, and cash

# flows is specified below:

## A. Amounts recognized in the balance sheet

## (a) Right-of-use assets

# Carrying amount of right-of-use assets

|                         | 2022.12.31 | 2021.12.31 |
|-------------------------|------------|------------|
| Buildings               | \$5,408    | \$-        |
| Machinery and equipment | 10,644     |            |
| Total                   | \$16,052   | \$-        |

## (b) Lease liabilities

|                   | 2022.12.31 | 2021.12.31 |
|-------------------|------------|------------|
| Lease liabilities | \$15,203   | <u>\$-</u> |
|                   |            |            |
| Current           | \$5,743    | \$-        |
| Non-current       | 9,460      |            |
| Total             | \$15,203   | \$-        |

## B. Amounts recognized in the statement of comprehensive income

# Depreciation of right-of-use assets

|                         | 2022    | 2021 |
|-------------------------|---------|------|
| Buildings               | \$126   | \$-  |
| Machinery and equipment | 1,406   |      |
| Total                   | \$1,532 | \$-  |

## C. Lessee's income and expenses related to leasing activities

|  | 2022    | 2021    |
|--|---------|---------|
| Expenses relating to short-term leases | \$2,293 | \$2,193 |

### D. Lessee's cash outflows from leasing activities

The amounts of the Company's cash outflows from the leasing activities during 2022 and 2021 were NT\$4,888 thousand and NT\$2,193 thousand.

## (2) The Company as a lessor

Please refer to Note 6.10 for details of the disclosures of the investment property owned by the Company. The investment property owned by the Group is classified as an operating lease as almost all the risks and rewards attached to the ownership of the underlying asset are not transferred.

|   | 2022     | 2021     |
|---|----------|----------|
| Lease income recognized under operating |          |          |
| leases                                  |          |          |
| Income related to fixed lease payments  | \$11,082 | \$10,685 |

The undiscounted lease payments of the operating lease contracts signed by the Company to be received and the total amount for the remaining years as of December 31, 2022 and 2021 are as follows:

|                                      | 2022.12.31 | 2021.12.31 |
|--------------------------------------|------------|------------|
| Less than one year                   | \$9,360    | \$9,360    |
| More than one year but less than two |            |            |
| years                                | 9,734      | 9,360      |
| More than two years but less than    |            |            |
| three years                          | 9,734      | 9,734      |
| More than three years but less than  |            |            |
| four years                           | 9,734      | 9,734      |
| More than four years but less than   |            |            |
| five years                           | 10,124     | 9,734      |
| More than five years                 | 10,968     | 21,092     |
| Total                                | \$59,654   | \$69,014   |

23. Employee benefits, depreciation, depletion, and amortization expenses by function is as

#### follows:

| By function           |           | 2022      |          |           | 2021      |          |

| directors             |           |           |          |           |           |          |
| Other employee        | 1,867     | 4,799     | 6,666    | 1,065     | 3,963     | 5,028    |
| benefit expenses      |           |           |          |           |           |          |
| Depreciation expenses | 31,608    | 20,931    | 52,539   | 27,899    | 19,526    | 47,425   |

Notes: 1. As of December 31, 2022 and 2021, the Company has 70 and 70 employees, respectively, of which the number of directors who did not concurrently serve as employees was five for both years.

- 2. Companies whose stocks are listed on Taiwan Stock Exchange or Taipei Exchange shall disclose the following information additionally:
  - (1) The average employee benefit expenses for this year and the prior year were NT\$938 thousand and NT\$820 thousand, respectively.
  - (2) The average employee salaries for this year and the prior year were NT\$734 thousand and NT\$664 thousand, respectively.
  - (3) The average employee salary increase is 10.54%.
  - (4) The Company has set up an Audit Committee to replace supervisors in accordance with the regulations, so the remuneration to the supervisors was not recognized.
  - (5) The Company's remuneration policy: In accordance with the Articles of Incorporation, the Company shall provide 3.6%–8.6% of a profit, if any, as employee remuneration and no greater than 3.6% as directors' remuneration, while the Company shall reserve an amount in advance to offset a cumulative deficit, if any. Regarding employee remuneration, in addition to the base salary, the Company pays out bonuses based on operating performance. For the annual salary increase, the salary adjustment increase items and amounts are determined based

on each employee's job level and performance. In addition, as per Article 4 of the Articles of Incorporation, when the directors of the Company perform their duties, it may pay monthly remuneration to them regardless of the company's profitability. The remuneration shall be determined by the resolution of the Board of Directors depending on their duties and the level of their participation in the Company's daily operations and management. The Remuneration Committee's suggestions about the remuneration to directors and managers shall be submitted to the Board of Directors for a resolution in accordance with regulations.

In accordance with the Articles of Incorporation, the Company shall provide 3.6%–8.6% of a profit, if any, as employee remuneration and no greater than 3.6% as directors' remuneration, while the Company shall reserve an amount in advance to offset a cumulative deficit, if any. The above employee remuneration may be distributed in stock or cash, which shall be approved by half of all directors present at a board meeting attended by more than two-thirds of all directors and then reported to the shareholders' meeting. Please visit the Market Observation Post System (MOPS) for information on employee remuneration and directors' remuneration approved by the Board of Directors.

As of December 31, 2022 and 2021, the Company still has a deficit to be compensated, so no employee remuneration and director remuneration were estimated.

### 24. Non-operating income and expenses

### (1) Other income

| 2021  | 93,554    | 2031 |
| 2022  | 81,565    | 2032 |
| Total | \$764,912 |      |

# (6) Income tax return filings and approval

As of December 31, 2022, the income tax turns filed by the Company are as follows:

|             | Income tax return filings and |
|-------------|-------------------------------|
|             | approval                      |
| The Company | Approved up to 2020           |

#### 27. Earnings per share

The basic earnings per share is calculated with the net income attributable to the holders of the ordinary shares of the parent company divided by the weighted average number of ordinary share outstanding in the current period.

The diluted earnings per share is calculated by with the net income attributable to the holders of the ordinary shares of the parent company (after being adjusted for the effect of dilution) divided by the weighted average number of ordinary shares outstanding during the year, plus the weighted average number of ordinary shares to be issued when all dilutive potential ordinary shares were converted into ordinary shares.

|  | 2022       | 2021       |
|--|------------|------------|
| (1) Basic earnings per share                       |            |            |
| Net income (loss) for this period (in thousands of |            |            |
| NTD)   | \$(98,817) | \$(98,383) |
| Weighted average number of ordinary shares for     |            | _          |
| the basis earnings per share (in thousand shares)  | 103,208    | 103,208    |
| Basic earnings (losses) per share (NTD)            | \$(0.96)   | \$(0.95)   |

#### (2) Diluted earnings per share

| Short-term borrowings Payables Lease liabilities (current and non-current) | \$720,000<br>88,946 | \$603,000  |

Note: Including cash and cash equivalents, financial assets at amortized cost, notes receivable, as well as accounts receivable and other receivables.

#### 2. Financial risk management objectives and policies

The Company's financial risk management objectives are mainly to manage market, credit, and liquidity risks related to operating activities. The Company identifies, measures, and manages the above risks as per its policies and risk preferences.

The Company has established appropriate policies, procedures, and internal control system in accordance with applicable regulations on the above financial risk management; important financial activities should be reviewed by the Board of Directors and the Audit Committee in accordance with applicable regulations and the internal control system. During the implementation of the financial management activities, the Company should comply with the applicable regulations on financial risk management.

#### 3. Market risk

The Company's market risk refers to the risk arising from the fluctuations in the fair values or cash flows of financial instruments due to changes in market prices. Market risk mainly includes exchange rate risk and interest rate risk.

In practice, one movement by a single change in risk variables is rare, and changes in risk variables are always interrelated; however, the sensitivity analysis of the following risks did not consider the interaction between relevant risks and variables.

#### Exchange rate risk

The Company's exchange rate risk is mainly related to operating activities (when a currency used for income or expenses is different from the Company's functional currency) and net investment in foreign operations.

The Company's foreign currency receivables and foreign currency payables are partially in the same currency. Thus, there will be a natural hedging effect for a part of the foreign currency position; also, the net investment in foreign operations is a strategic investment, so the Company has not adopted a hedging approach thereto.

The sensitivity analysis of the Company's exchange rate risk is mainly focused on the main foreign currency monetary items on the end date of the financial reporting period and the impact of relevant foreign currency appreciation/depreciation on the Company's profit and loss and equity. The Company's exchange rate risk is mainly affected by fluctuations in the exchange rates of USD. The sensitivity analysis information is as follows:

When the NTD appreciated/depreciated by 1% against the USD, the Company's profit or loss for the year ended December 31, 2022 and 2021 would have decreased/increased by NT\$642 thousand and NT\$420 thousand, respectively.

#### Interest rate risk

Interest rate risk refers to the risk of fluctuations in the fair value of financial instruments or future cash flows due to the changes in market interest rates. The Company's interest rate risk is mainly from investments at floating rates as well as borrowings at fixed and floating rates, which are classified as loans and receivables.

The sensitivity analysis of the Company's interest rate risk was mainly focused on investments and borrowings at floating rates at the end date of the financial reporting period. With an assumption that such investments and borrowings are held for one fiscal year, when the interest rate increased/decreased by 0.1%, the Company's profit or loss for 2022 and 2021 would have decreased/increased by NT\$1,200 thousand and NT\$1,164 thousand, respectively.

#### Equity price risk

The fair values of unlisted equity securities held by the Company will be affected by the uncertainty about their future values. The unlisted equity securities held by the Company are included in the category measured at fair value through other comprehensive income. The Company manages the price risk of equity securities by diversifying investments and setting limits for investments in single and overall equity securities. The information on the investment portfolio of equity securities should be regularly provided to the Company's senior management, and the Board of Directors should review and approve all decisions about investments in equity securities.

The fair values of other equity instruments belong to Level 3. Please refer to Note 12.8 for the sensitivity analysis information.

#### 4. Credit risk management

Credit risk refers to the risk of financial loss arising from the default by counterparties on contract obligations. The Company's credit risk is derived from its operating activities (mainly from accounts and notes receivables) and financial activities (mainly from bank deposits and various financial instruments).

Each unit of the Company follows the credit risk policy, procedures, and control mechanism to manage credit risk. The credit risk assessment of all transaction counterparties is based on factors, such as each counterparty's financial position, ratings by credit rating agencies, historical trading experience from the past, the current economic environment, and the Company's internal rating criteria. The Company also uses certain credit enhancement tools (such as advance sales receipts and insurance) at appropriate times to reduce specific counterparties' credit risk.

As of December 31, 2022 and 2021, the Company's accounts receivable from the top ten clients accounted for 84.34% and 81.32% of the balances of the Company's accounts

receivable, respectively. The credit concentration risk for the remaining receivables is relatively insignificant.

The Company's finance department manages the credit risk of bank deposits, fixed-income securities, and other financial instruments in accordance with the Company's policies. The Company's counterparties are determined based on internal control procedures, such as banks with good credit ratings, financial institutions with investment-grade ratings, corporate organizations, and government agencies, and there is no major concern about their contract performance, so there is no significant credit risk.

The Company adopts the IFRS 9 standard to assess expected credit losses. Except for an allowance for losses on receivables that is estimated at lifetime expected credit losses, for investments in debt instruments that are not measured at fair value through profit or loss and purchased due to a low credit risk, the Group assesses if the credit risk arising from such investments has increased significantly since the initial recognition on each balance sheet date, to determine the method of estimating an allowance for losses and an loss ratio.

Also, when the Company believes that a financial asset cannot be reasonably expected to be recovered as per the assessment (e.g., the issuer or the debtor has significant financial difficulties or has gone bankrupt), it will be written off.

#### 5. Liquidity risk management

The Company maintains financial flexibility through cash and cash equivalents, bank borrowings, and other relevant contracts. The table below summarizes the maturity of the payments contained in the contracts of the Company's financial liabilities. It is compiled based on the earliest possible date for repayment and its undiscounted cash flow. The amounts listed also include the agreed interest. For the interest cash flow paid at floating interest rates, the undiscounted amount of interest is derived from the yield curve at the end of the reporting period.

#### Non-derivative financial instruments

| Less than 1 |           |           | 5 years or   |          |             |  |

| 2021.12.31 | \$603,000  | \$633,288  | \$2,250   | \$1,238,538       |

#### 7. Fair values of financial instruments

#### (1) Valuation techniques and assumptions adopted to measure the fair values

Fair value is the price that can be received from a sale of an asset or paid to transfer a liability in an orderly transaction between market participants. The methods and assumptions adopted by the Company to measure or disclose the fair values of its financial assets and financial liabilities are as follows:

- A. The carrying amounts of cash and cash equivalents, receivables, payables, and other current liabilities are reasonable approximations of their carrying amounts, mainly due to the short durations of such instruments.
- B. The fair values of equity instruments not traded in an active market (unlisted companies' stocks) are estimated with a market approach. The fair values are estimated at the prices of the transactions of the same or comparable companies' equity instruments in the market and other relevant information (such as discount for lack of marketability, price-earnings ratios of similar companies' stocks, or price-to-book ratios of similar companies' stocks).
- C. Regarding debt instrument investments without quoted prices in an active market, bank borrowings, and other non-current liabilities, the fair values are determined based on the counterparties' quotes or valuation techniques. The valuation techniques are determined on the basis of discounted cash flow analysis; the assumptions about interest rates and discount rates are made with reference to on similar instruments (such as the Taipei Exchange's yield curves for reference, the average quotes of Reuters commercial paper interest rates, and credit risks).
- D.As for derivative financial instruments without quoted prices in an active market, if they are non-option derivatives, their fair values are determined based on the counterparties' quotes or the yield curves that apply during the duration of the discounted cash flow analysis; if they are option derivatives, the fair values are determined based on counterparties' quotes, appropriate option pricing models (such as Black-Scholes) or other valuation approaches (such as Monte Carlo Simulation).

#### (2) Fair values of financial instruments at amortized cost

Except as stated in the table below, the carrying amounts of the Company's financial assets and financial liabilities at amortized cost are reasonable approximations of the fair values thereof.

(3) Information on the financial instrument fair value hierarchy

See Note 12.8 for information on the Company's financial instrument fair value hierarchy.

### 8. Fair value hierarchy

#### (1) Definitions of fair value levels

All assets and liabilities measured or disclosed at fair value are the lowest level inputs, which are important to the overall fair value measurement, classified to the fair value levels to which they belong. The input at each level is as follows:

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities on the measurement date.

Level 2: Inputs, other than quoted market prices within Level 1 that are observable, either directly or indirectly, for assets or liabilities.

Level 3: The unobservable input value of an asset or liability.

For assets and liabilities that are recognized in the financial statements on a repetitive basis, the classification is reevaluated at the end of each reporting period to determine whether there is a transfer between the fair value levels.

#### (2) Information on hierarchy of fair value measurement

The Company does not have assets measured at fair value on a non-recurring basis. The information on the fair value levels of assets and liabilities on a recurring basis is shown below:

December 31, 2022:

|                                | Level 1 | Level 2 | Level 3 | Total   |
|--------------------------------|---------|---------|---------|---------|
| Assets at fair value:          |         |         |         |         |
| Financial assets at fair value |         |         |         |         |
| through other comprehensive    |         |         |         |         |
| income                         |         |         |         |         |
| Stocks                         | \$-     | \$-     | \$9,333 | \$9,333 |

#### December 31, 2021:

|                                | Level 1 | Level 2 | Level 3 | Total   |
|--------------------------------|---------|---------|---------|---------|
| Assets at fair value:          |         |         |         |         |
| Financial assets at fair value |         |         |         |         |
| through other comprehensive    |         |         |         |         |
| income                         |         |         |         |         |
| Stocks                         | \$-     | \$-     | \$3,333 | \$3,333 |

#### Transfer between Level 1 and Level 2 fair values

The Company's assets and liabilities measured at fair value on a recurring basis during 2022 and 2021 were not transferred between Level 1 and Level 2.

#### Details of movements at Level 3 fair value on a recurring basis

If the Company's assets and liabilities measured at fair value on a recurring basis that belong to Level 3 fair value during the years ended December 31, 2022 and 2021, the reconciliation of the opening and ending balances is listed as follows:

|                      | Assets                         |
|----------------------|--------------------------------|
|                      | Measured at fair value through |
|                      | other comprehensive income     |
|                      | Stocks                         |
| January 1, 2022      | \$3,333                        |
| Acquired during 2022 | 6,000                          |
| December 31, 2022    | \$9,333                        |
|                      |                                |
|                      | Assets                         |
|                      | Measured at fair value through |
|                      | other comprehensive income     |
|                      | Stocks                         |
| January 1, 2021      | \$3,333                        |
| December 31, 2021    | \$3,333                        |

# Significant unobservable Level 3 fair value inputs

Regarding the Company's assets at Level 3 fair value on a recurring basis, the significant unobservable inputs at fair value are as follows:

December 31, 2022:

|   | Valuation<br>techniques | Significant<br>unobservable<br>inputs |    | Relations<br>between input<br>and fair value                   | Sensitivity analysis of the relations between inputs and fair values  |
|---|-------------------------|---------------------------------------|----|--|---|
| Financial assets: Financial assets at fair value through other comprehensive income | _                       |                                       |    |  |   |
| Stocks  | Market<br>approach      | Discount for lack of marketability    | -% | The higher the illiquidity, the lower the estimated fair value | When the percentage of lack of marketability increased (decreased) by 10%, the Group's equity would have decreased/increased by NT\$933 |

thousand.

#### December 31, 2021:

|  | Valuation  | Significant unobservable           | Quantitative | Relations between input | Sensitivity analysis of the relations between inputs and |
|--|------------|------------------------------------|--------------|-------------------------|--|
|  | techniques | inputs                             | information  | and fair value          | fair values  |
| Financial assets: Financial assets at fair value through other comprehensive income Stocks | Market     | Discount for lack of marketability | -%           | The higher the          |  |

# Valuation process for Level 3 fair value

The Company's finance department is responsible for fair value verification, using data from independent sources to bring the valuation results closer to the market, confirming that the sources of the data are independent, reliable, consistent with other resources and represent executable prices, while analyzing the changes in the value of assets and liabilities that must be remeasured or re-valuated in accordance with the Company's accounting policies at each balance date, to ensure that the valuation results are reasonable.

(3) Information on those not measured at fair value but need to be disclosed

December 31, 2022:

|                               | Level 1 | Level 2 | Level 3  | Total    |
|-------------------------------|---------|---------|----------|----------|
| Assets with only fair value   |         |         |          |          |
| disclosed:                    |         |         |          |          |
| Investment property (see Note |         |         |          |          |
| 6.10)                         | \$-     | \$-     | \$59,269 | \$59,269 |
| December 31, 2021:            | Level 1 | Level 2 | Level 3  | Total    |
| Assets with only fair value   |         |         |          |          |
| disclosed:                    |         |         |          |          |
| Investment property (see Note |         |         |          |          |
| 6.10)                         | \$-     | \$-     | \$61,474 | \$61,474 |

9. Information on the foreign currency financial assets and liabilities with significant impact is as follows:

The Company's foreign currency financial assets and liabilities with significant impact are as follows:

Unit of currency: In thousands of dollars 2022.12.31 Foreign currency Exchange rate NTD Financial assets Monetary items: \$2,099 USD 30.75 \$64,522 Non-monetary items: USD \$4,675 30.71 \$143,560

|                     |                  | 2021.12.31    |           |  |  |  |  |
|---------------------|------------------|---------------|-----------|--|--|--|--|
|                     | Foreign currency | Exchange rate | NTD       |  |  |  |  |
